This Project is brought to you for free and open access by the School of Human Sciences at SFA ScholarWorks. It has been accepted for inclusion in Interior Design Senior Projects by an authorized administrator of SFA ScholarWorks. For more information, please contact cdsscholarworks@sfasu.edu.
Design Philosophy

My design philosophy is to create an area that is not only aesthetically pleasing, but functional. Whether this is residential or commercial, I want you to feel comfortable about your surroundings. I want you to be able to enjoy the environment around you and feel right at home. This can be with commercial design also. I do not want someone to feel as if they are in a hospital. White walls feel institutional. I want to design places that make you feel at ease and comfortable, even if it is a place you do not necessarily want to be, such as a hospital or nursing home.

Design Philosophy

My design philosophy is to create an area that is not only aesthetically pleasing, but functional. Whether this be residential or commercial, I want you to feel comfortable about your surroundings. I want you to be able to enjoy the environment around you and feel right at home. This can be with commercial design also. I do not want someone to feel as if they are in a hospital. White walls feel institutional. I want to design places that make you feel at ease and comfortable, even if it is a place you do not necessarily want to be, such as a hospital or nursing home.
Commercial Designs
The red arrow shows the section view of my restaurant. The goal of this project was to design a unique, hip restaurant located in downtown Dallas.
Residential Designs
The goal of this project was to create two separate areas; one for playing poker, as well as other games, and another for visiting. Symmetrical design, proper space planning, along with variety and contrast made this project successful.
This project was created with a universal design approach. The purpose was to create a space that any person of any circumstance would be able to use.

Pillow
Bed Frame
Bedding
Half Wall
3D Modeling
The purpose of this project was to create a commercial space. Skills shown include:

- Model Making
- Space Planning
- Design and Décor
Hand Drafting
Skills shown include:

- Space Planning
- Sketching
- Line work
- Craftsmanship
Computer Aided Designs
Stone Haven Assisted Living Apartments

One Bedroom Apartment

Studio Apartment

One Bedroom Perspective

This project was created with a universal design approach. The purpose was to design apartments tailored to the needs of elderly citizens in wheelchairs.
This project was created with a universal design approach as well. With nurses stations located at each end, all residents are visible. The space is aesthetically pleasing with the use of four atriums and a garden area.
