## Philosophy

Design is a reflection of where you have been and what inspires you. It is a creative combination of form, function, texture, pattern, color and codes that work together in a space to create a desired feeling and solution.

## Introduction/ Professional Goals & Interests

I have always had a passion for art and helping people and interior design allows me to utilize art and design while creating accessible, green solutions to better the safety, health and general welfare of the public. I would like to gain experience in commercial design. I have some experience in residential design, but would like to expand my horizons and find where my passion for interior design truly lies.
