Introductions

Discussion format

Expectations?

Why here, why now?

1

Re-starting the conversation
about Open Access on campus

2

Open Access policy, statement
or mandate?

3

Strategies and practices

4

Maintaining momentum and
faculty interest

5

When the plan falls apart?

Collective wisdom says

Final thoughts

Questions?

What did we learn?

Collective wisdom says...

- There's a benefit to top-down approach
Provost – Dean – Administration
- Open Access not a disruption, others say it has to be
- Institutions with OA policy are few, with real mandate even less
- Most Institutions still in planning stages, still generating buy-in
- Open Access publications not considered for tenure
- Find champions to promote OA efforts
- Several Institutions use indexing and analytics to show impact
to create buy-in from on campus stakeholders

Collective wisdom says

- Promote buy-in through workshops, make part of faculty orientation sessions, offer work in alternative formats (nursing clinical base--videos)
- Offer Open Access for specific materials
 - ETD's, Open Educational Resources (OER),
 - Research Data to meet compliance by funding agencies
 - Student research in Institutional Repository (IR)
 - Student dance & music recitals in IR
(access to certain viewers by stud.id & password)
- Faculty more receptive when Open Access not mentioned
- Keep it simple
 - Faculty don't have time to be creative with it, they would rather not do much
