## Philosophy Statement

In the creative side of the world, it is fairly common for one to be “innovatively altered” and “unusual” if a designer or an artist. As designers, we are imaginative individuals that recognize a level of emotion beyond the structure needed to design for function and safety. The strong connection to emotion is what compel us through our design process. Designers are alike for which we do not design for ourselves; we create for others. Some designers and artists may be “unusual” and “strangely different” but it is not a flaw. This is part of the individual nature to encounter problems and provide innovative solutions that are useful to others. A connection of emotion increases the designer’s edge on impacting “good design” in the lives of others.
