Introduction 1

Documentation Efforts 1

Methods of Vessel Analysis 2

Archeological Context of the Sites 5

Big Cypress Creek Basin Sites 7

| Vessel Recordation Forms, G. W. Rumsey Site (41CP3) | 11 |
| Vessel Recordation Forms, Tuck Carpenter Site (41CP5) | 62 |
| Vessel Recordation Forms, Harold Williams (41CP10) | 252 |
| Vessel Recordation Forms, Possibly Albert Hilton Farm (Harold Williams Site), Camp County | 272 |
| Vessel Recordation Forms, B. J. Horton Site (41CP20) | 275 |
| Vessel Recordation Forms, Pug Wilson Site (41CP76) | 303 |
| Vessel Recordation Forms, Cecil Guest Site (41CP78) | 305 |
| Vessel Recordation Form, Boyd Farm, Camp County | 323 |
| Vessel Recordation Forms, Lineburger Site (41CP493), Camp County | 324 |
| Vessel Recordation Forms, Avinger Rest Stop/Carol Owens Site (41CS132), Cass County, Texas | 326 |
| Vessel Recordation Forms, Unknown Site near Harleton, Lake O’ the Pines, Harrison County, Texas | 328 |
| Vessel Recordation Forms, Lone Star Lake Site (41MX65) | 329 |
| Vessel Recordation Forms, Keith Site (41TT11) | 366 |
| Vessel Recordation Forms, Alex Justiss Site (41TT13) | 374 |
| Vessel Recordation Forms, Graydon Adkins, Site 2 (41UR17) | 380 |
| Vessel Recordation Forms, Graydon Adkins, Site 1 (41UR21) | 390 |
| Vessel Recordation Forms, Keeling Site, Upshur County, Texas | 393 |
| Vessel Recordation Forms, Moughon Site, Upshur County, Texas | 425 |

Sulphur River Basin Site 427

| Vessel Recordation Form, Red Martin, Cass County, Texas | 427 |
## Table of Contents, cont.

Neches-Angelina River Basin Sites 428

- Vessel Recordation Forms, Unknown Cherokee County Site 428
- Vessel Recordation Forms, Deshazo Site (41NA27) 431
- Vessel Recordation Forms, Stephens Farm Site (41NA202) 443
- Vessel Recordation Form, Indian Creek Site, Nacogdoches County, Texas 449

Sabine River Basin Site 450

- Vessel Recordation Form, Bison, Area B (16SA30/X16SA4) 451

### Pottery Vessel Comparisons and Ceramic Traditions 452

- Vessel Forms 452
- Vessel Sizes 454
- Rim and Lip Form 457
- Temper and Paste 461
- Firing Conditions 463
- Decorative Methods 466

  - Fine Wares 466
  - Utility Wares 471

- Lip Notching 481
- Pigments 482

### Pipes 485

- Platform pipes 485
- Elbow pipes 486

### Large Chipped Bifaces 487

### Conclusions 488

List of Figures

Figure 1. Locations of counties and parishes in East Texas and Northwest Louisiana that have sites represented in the Robert L. Turner, Jr. and Tommy Johns collections. Drawn by Sandra Hannum.

Figure 2. Defined varieties of Ripley Engraved and other engraved motifs on carinated bowls and compound bowls: a, var. McKinney; b, var. Gandy; c, var. Galt; d, var. Caldwell; e, var. Cash; f, var. Carpenter; g, var. Pilgrims; h, var. Williams; i, var. Reed; j, horizontal diamond, var. unspecified; k, interlocking diamond, var. unspecified.

Figure 3. Ripley Engraved, var. Ripley bottle motifs.

Figure 4. Wilder Engraved, var. Wilder bottle motifs, and var. unspecified motifs: a-c, Wilder Engraved, var. Wilder; d, Wilder Engraved, var. unspecified.

Figure 5. Turner Engraved and defined varieties: a-b, Turner Engraved, var. Turner; c-d, Turner Engraved, var. Horton.

Figure 6. Location of sites with documented vessel collections in the Big Cypress Creek basin in Northeast Texas: 1, Tuck Carpenter; 2, Johns; 3, Harold Williams; 4, Guest; 5, Horton; 6, Alex Justiss; 7, Keith; 8, Lone Star Lake; 9, Rumsey; 10, Keeling; 11, Moughon; 12, Graydon Adkins #1; 13, Graydon Adkins #2; 14, Lineburger; 15, Pug Wilson; and 16, Patton.

Figure 7. cf. Bullard Brushed jar from the Rumsey site, Vessel 12.

Figure 8. Punctated-appliqued-brushed jar, Rumsey site, Vessel 13.

Figure 9. Brushed-punctated jar, Rumsey site, Vessel 14.

Figure 10. Wilder Engraved, var. Wilder bottle, Rumsey site, Vessel 15.

Figure 11. cf. Maydelle Incised or Canton Incised jar, Rumsey site, Vessel 16.

Figure 12. Ripley Engraved, var. Pilgrims bowl, Rumsey site, Vessel 17.

Figure 13. Punctated jar, Rumsey site, Vessel 18.

Figure 14. Ripley Engraved, var. McKinney carinated bowl rim sherds, Rumsey site, Vessel 19a.

Figure 15. cf. Ripley Engraved, var. Pilgrims carinated bowl, Rumsey site, Vessel 19b.

Figure 16. Ripley Engraved, var. McKinney carinated bowl rim sherds, Rumsey site, Vessel 21.
List of Figures, cont.

Figure 17. La Rue Neck Banded jar, Rumsey site, Vessel 22.

Figure 18. Incised-punctated jar, Rumsey site, Vessel 23.

Figure 19. Wilder Engraved, var. Wilder bottle, Rumsey site, Vessel 24.

Figure 20. Taylor Engraved bottle, Rumsey site, Vessel 25.

Figure 21. Engraved bottle of undetermined type, Rumsey site, Vessel 26.

Figure 22. Plain bottle, Rumsey site, Vessel 27.

Figure 23. Wilder Engraved, var. Wilder bottle, Rumsey site, Vessel 28.

Figure 24. Taylor Engraved bottle, Rumsey site, Vessel 29.

Figure 25. cf. Dunkin Incised jar, Rumsey site, Vessel 30.

Figure 26. cf. Mockingbird Punctated jar, Rumsey site, Vessel 31.

Figure 27. Interior engraved bowl, Rumsey site, Vessel 32.

Figure 28. Unidentified engraved bottle, Rumsey site, Vessel 33.

Figure 29. Ripley Engraved, var. unspecified compound bowl, Rumsey site, Vessel 34.

Figure 30. cf. Cass Appliqued jar, Rumsey site, Vessel 35.

Figure 31. Incised-punctated jar, Rumsey site, Vessel 36.

Figure 32. Miniature incised carinated bowl, Rumsey site, Vessel 37.

Figure 33. Plain bowl from the Rumsey site, Vessel 40.

Figure 34. Plain carinated bowl, Rumsey site, Vessel 41.

Figure 35. Punctated-appliqued compound bowl, Rumsey site, Vessel 42.

Figure 36. cf. Belcher Engraved, var. Belcher carinated bowl, Rumsey site, Vessel 43.

Figure 37. Unidentified engraved compound bowl, Rumsey site, Vessel 45a.

Figure 38. Engraved jar of unknown type, Rumsey site, Vessel 45b.
List of Figures, cont.

Figure 39. Incised-punctated deep bowl, Rumsey site, Vessel 46.

Figure 40. Harleton Appliqued jar, Rumsey site, Vessel 47.

Figure 41. Ripley Engraved, var. unspecified carinated bowl, Rumsey site, Vessel 49.

Figure 42. Incised jar, Rumsey site, Vessel 50.

Figure 43. Taylor Engraved carinated bowl, Rumsey site, Vessel 51.

Figure 44. Maydelle Incised jar, Rumsey site, Vessel 52.

Figure 45. Punctated-incised jar, Rumsey site, Vessel 53.

Figure 46. Ripley Engraved, var. McKinney carinated bowl, Rumsey site, Vessel 54a.

Figure 47. Brushed-punctated jar, Rumsey site, Vessel 54b.

Figure 48. cf. Karnack Brushed-Incised jar, Rumsey site, Vessel 55.

Figure 49. Red-slipped bowl, Rumsey site, Vessel 56.

Figure 50. Ripley Engraved, var. Gandy carinated bowl, Rumsey site, Vessel 57.

Figure 51. cf. Killough Pinched bowl, Rumsey site, Vessel 58.

Figure 52. Wilder Engraved, var. Wilder bowl, Rumsey site, Vessel 59.

Figure 53. cf. Hood Engraved effigy bowl, Rumsey site, Vessel 60.

Figure 54. Ripley Engraved, var. unspecified bottle, Rumsey site, Vessel 61.

Figure 55. Ripley Engraved, var. Carpenter carinated bowl, Rumsey site, Vessel 62.

Figure 56. Ripley Engraved, var. Galt compound bowl, Rumsey site, Vessel 63.

Figure 57. Ripley Engraved, var. Carpenter carinated bowl rim sherds, Rumsey site, Vessel 64.

Figure 58. Cass Appliqued jar, Tuck Carpenter site, Burial 1, Pot 2.

Figure 59. Ripley Engraved, var. unspecified carinated bowl rim sherds, Burial 1, Pot 4, Tuck Carpenter site.
List of Figures, cont.

Figure 60. Ripley Engraved, *var. Galt* carinated bowl, Burial 1, Pot 6, Tuck Carpenter site.

Figure 61. Ripley Engraved, *var. Cash* compound bowl, Burial 2, Pot 2, Tuck Carpenter site.

Figure 62. Incised-punctated-brushed jar, Burial 2, Pot 3, Tuck Carpenter site.

Figure 63. Appliqued jar, Burial 2, Pot 4, Tuck Carpenter site.

Figure 64. cf. Ripley Engraved, *var. Pilgrims* carinated bowl, Burial 2, Pot 5, Tuck Carpenter site.

Figure 65. Wilder Engraved, *var. Wilder* bottle, Burial 2, Pot 11, Tuck Carpenter site.

Figure 66. Plain jar, Burial 3, Pot 2, Tuck Carpenter site.

Figure 67. Ripley Engraved, *var. McKinney* carinated bowl, Burial 3, Pot 3, Tuck Carpenter site.

Figure 68. Ripley Engraved, *var. unspecified* carinated bowl, Burial 3, Pot 5, Tuck Carpenter site.

Figure 69. Ripley Engraved, *var. Galt* carinated bowl, Burial 3, Pot 6, Tuck Carpenter site.

Figure 70. Hood Engraved effigy bowl, Burial 4, Pot 1, Tuck Carpenter site.

Figure 71. Incised-punctated jar, Burial 4, Pot 2, Tuck Carpenter site.

Figure 72. Ripley Engraved, *var. Galt* compound bowl, Burial 4, Pot 6, Tuck Carpenter site.

Figure 73. Ripley Engraved, *var. unspecified* carinated bowl, Burial 4, Pot 7, Tuck Carpenter site.

Figure 74. Ripley Engraved, *var. Gandy* carinated bowl, Burial 4, Pot 8, Tuck Carpenter site.

Figure 75. La Rue Neck Banded jar, Burial 5, Pot 2, Tuck Carpenter site.

Figure 76. Incised jar, Burial 5, Pot 5, Tuck Carpenter site.

Figure 77. Ripley Engraved, *var. unspecified* bottle, Burial 5, Pot 6, Tuck Carpenter site.
List of Figures, cont.

Figure 78. cf. Pease Brushed-Incised jar, Burial 6, Pot 1, Tuck Carpenter site.

Figure 79. Ripley Engraved, *var. Carpenter* carinated bowl rim sherd, Burial 6, Pot 2, Tuck Carpenter site.

Figure 80. Brushed-punctated jar, Burial 6, Pot 3, Tuck Carpenter site.

Figure 81. Ripley Engraved, *var. Carpenter* compound bowl, Burial 6, Pot 7, Tuck Carpenter site.

Figure 82. Ripley Engraved, *var. Carpenter* carinated bowl, Burial 6, Pot 8, Tuck Carpenter site.

Figure 83. Ripley Engraved, *var. Carpenter* carinated bowl rim sherds, Burial 7, Pot 3, Tuck Carpenter site.

Figure 84. Ripley Engraved, *var. Carpenter* carinated bowl, Burial 7, Pot 5, Tuck Carpenter site.

Figure 85. Engraved compound bowl of unidentified type, Burial 7, Pot 8, Tuck Carpenter site.

Figure 86. Moore Noded bowl, Burial 7, Pot 9, Tuck Carpenter site.

Figure 87. Ripley Engraved, *var. unspecified* bottle, Burial 7, Pot 10, Tuck Carpenter site.

Figure 88. Engraved carinated bowl of unknown type, Burial 8, Pot 1, Tuck Carpenter site.

Figure 89. Ripley Engraved, *var. Carpenter* carinated bowl, Burial 8, Pot 3, Tuck Carpenter site.

Figure 90. Ripley Engraved, *var. Carpenter* carinated bowl, Burial 8, Pot 6, Tuck Carpenter site.

Figure 91. Ripley Engraved, *var. Carpenter* carinated bowl, Burial 8, Pot 8, Tuck Carpenter site.

Figure 92. Ripley Engraved, *var. Carpenter* carinated bowl, Burial 9, Pot 5, Tuck Carpenter site.

Figure 93. Ripley-Wilder Engraved compound vessel, Burial 9, Pot 6, Tuck Carpenter site.
List of Figures, cont.

Figure 94. Ripley Engraved, *var. Carpenter* carinated bowl, Burial 9, Pot 8, Tuck Carpenter site.

Figure 95. Ripley Engraved, *var. McKinney* carinated bowl, Burial 10, Pot 2, Tuck Carpenter site.

Figure 96. Incised-punctated bowl, Burial 10, Pot 3, Tuck Carpenter site.

Figure 97. Maydelle Incised jar, Burial 11, Pot 2, Tuck Carpenter site.

Figure 98. Harleton Appliqued jar, Burial 11, Pot 4, Tuck Carpenter site.

Figure 99. Engraved jar of unknown type, Burial 11, Pot 6, Tuck Carpenter site.

Figure 100. Moore Noded bowl, Burial 11, Pot 8, Tuck Carpenter site. Note evidence of the attachment for the larger appliqued node, which subsequently fell off the vessel.

Figure 101. Ripley Engraved, *var. Gandy* carinated bowl, Burial 12, Pot 2, Tuck Carpenter site.

Figure 102. Ripley Engraved, *var. unspecified* carinated bowl, Burial 12, Pot 5, Tuck Carpenter site.

Figure 103. Ripley Engraved, *var. Ripley* engraved bottle, Burial 12, Pot 6, Tuck Carpenter site.

Figure 104. cf. Bullard Brushed rim and body sherd, Burial 12, Tuck Carpenter site.

Figure 105. Incised-punctated jar, Burial 13, Pot 2, Tuck Carpenter site.

Figure 106. Ripley Engraved, *var. Galt* carinated bowl, Burial 14, Pot 3, Tuck Carpenter site.

Figure 107. Brushed jar, Burial 14, Pot 5, Tuck Carpenter site.

Figure 108. Plain bottle, Burial 15, Pot 2, Tuck Carpenter site.

Figure 109. Punctated-incised-appliqued jar, Burial 15, Pot 4, Tuck Carpenter site.

Figure 110. Ripley Engraved, *var. Williams* carinated bowl rim sherds, Burial 15, Pot 7, Tuck Carpenter site.

Figure 111. Ripley Engraved, *var. unspecified* carinated bowl, Burial 15, Pot 8, Tuck Carpenter site.
List of Figures, cont.

Figure 112. Ripley Engraved, var. Carpenter carinated bowl, Burial 16, Pot 2, Tuck Carpenter site.

Figure 113. Ripley Engraved, var. Caldwell carinated bowl, Burial 16, Pot 7, Tuck Carpenter: a, side view of vessel; b, top view of the Redwine mode lip.

Figure 114. cf. Mockingbird Punctated jar, Burial 16, Pot 9, Tuck Carpenter site.

Figure 115. Ripley Engraved, var. Carpenter carinated bowl, Burial 17, Pot 1, Tuck Carpenter site.

Figure 116. cf. McKinney Plain jar, Burial 17, Pot 2, Tuck Carpenter site.

Figure 117. Johns Engraved bowl, Burial 17, Pot 7, Tuck Carpenter site.

Figure 118. Ripley Engraved, var. unspecified carinated bowl, Burial 18, Pot 1, Tuck Carpenter site.

Figure 119. Brushed-punctated jar rim and body sherds, Burial 19, Pot 2, Tuck Carpenter site.

Figure 120. Cass Appliqued jar, Burial 19, Pot 3, Tuck Carpenter site.

Figure 121. Ripley Engraved, var. McKinney carinated bowl, Burial 19, Pot 4, Tuck Carpenter site.

Figure 122. Wilder Engraved, var. Wilder bottle, Burial 19, Pot 10b, Tuck Carpenter site.

Figure 123. Wilder Engraved, var. Wilder bottle, Burial 19, Pot 11, Tuck Carpenter site.

Figure 124. Brushed-punctated-appliqued jar, Burial 20, Pot 1, Tuck Carpenter site.

Figure 125. cf. Harleton Appliqued jar, Burial 20, Pot 2, Tuck Carpenter site.

Figure 126. cf. Maydelle Incised jar, Burial 20, Pot 4, Tuck Carpenter site.

Figure 127. Incised-punctated jar rim sherds, Burial 21, Pot 2, Tuck Carpenter site.

Figure 128. Bullard Brushed jar, Burial 21, Pot 3, Tuck Carpenter site.

Figure 129. Ripley Engraved, var. Gandy carinated bowl, Burial 21, Pot 11a, Tuck Carpenter site.
List of Figures, cont.

Figure 130. Ripley Engraved, var. Carpenter carinated bowl, Burial 21, Pot 11b, Tuck Carpenter site.

Figure 131. Ripley Engraved, var. unspecified carinated bowl, Burial 21, Pot 12, Tuck Carpenter site.

Figure 132. Ripley Engraved, var. Gandy carinated bowl, Burial 21, Pot 13, Tuck Carpenter site.

Figure 133. Ripley Engraved, var. unspecified compound bowl, Burial 21, Pot 14, Tuck Carpenter site.

Figure 134. Punctated-incised jar, Burial 21, Pot 15, Tuck Carpenter site.

Figure 135. Ripley Engraved, var. Ripley bottle, Burial 21, Pot 16, Tuck Carpenter site.

Figure 136. Ripley Engraved, var. Carpenter carinated bowl, Burial 22, Pot 4, Tuck Carpenter site.

Figure 137. Turner Engraved, var. Turner compound bowl, Burial 22, Pot 5, Tuck Carpenter site.

Figure 138. Ripley Engraved, var. Cash compound bowl, Burial 22, Pot 8, Tuck Carpenter site.

Figure 139. Incised-punctated jar, Burial 22, Pot 9, Tuck Carpenter site.

Figure 140. Wilder Engraved, var. Wilder jar, Burial 22, Pot 11, Tuck Carpenter site.

Figure 141. Engraved compound bowl of unknown type, Burial 23, Pot 2, Tuck Carpenter site.

Figure 142. Ripley Engraved, var. Carpenter carinated bowl, Burial 23, Pot 3, Tuck Carpenter site.

Figure 143. Incised-punctated-brushed jar, Burial 23, Pot 4, Tuck Carpenter site.

Figure 144. Ripley Engraved, var. Galt jar, Burial 23, Pot 5, Tuck Carpenter site.

Figure 145. Ripley Engraved, var. Galt compound bowl, Burial 23, Pot 6, Tuck Carpenter site.

Figure 146. cf. Ripley Engraved, var. Gandy carinated bowl rim sherds, Burial 23, Pot 7, Tuck Carpenter site.
List of Figures, cont.

Figure 147. Ripley Engraved, var. Reed carinated bowl, Burial 23, Pot 8, Tuck Carpenter site.

Figure 148. Red-slipped bottle, Burial 23, Pot 9, Tuck Carpenter site.

Figure 149. La Rue Neck Banded jar, Burial 23, Pot 11, Tuck Carpenter site.

Figure 150. Punctated-appliqued-incised jar, Burial 24, Pot 2, Tuck Carpenter site.

Figure 151. cf. Ripley Engraved, var. Gandy carinated bowl, Burial 24, Pot 4, Tuck Carpenter site.

Figure 152. Ripley Engraved, var. Carpenter carinated bowl, Burial 24, Pot 6, Tuck Carpenter site.

Figure 153. Ripley Engraved, var. Carpenter compound bowl rim sherds, Burial 24, Pot 8, Tuck Carpenter site.

Figure 154. Wilder Engraved, var. unspecified bottle, Burial 25, Pot 3, Tuck Carpenter site.

Figure 155. Turner Engraved, var. Turner compound bowl, Burial 25, Pot 4, Tuck Carpenter site.

Figure 156. Ripley Engraved, var. Galt compound bowl, Burial 25, Pot 6, Tuck Carpenter site.

Figure 157. Ripley Engraved, var. unspecified compound bowl, Burial 26, Pot 2: a, upper rim panel; b, lower rim panel sherds.

Figure 158. Bullard Brushed jar, Burial 26, Pot 3, Tuck Carpenter site.

Figure 159. Ripley Engraved, var. Carpenter carinated bowl, Burial 26, Pot 4, Tuck Carpenter site.

Figure 160. Punctated jar, Burial 26, Pot 6, Tuck Carpenter site.

Figure 161. Punctated-incised-brushed jar, Burial 26, Pot 7, Tuck Carpenter site.

Figure 162. Bullard Brushed jar, Burial 26, Pot 8, Tuck Carpenter site.

Acknowledgments

We first want to thank Robert L. Turner, Jr. and Tommy Johns for their permission to document their collections from a wide variety of sites in Northeast Texas, and for doing everything in their power to make the process of collection documentation a very smooth and successful one. We also want to thank Sandra Hannum for preparing a number of the figures in this report. Bo Nelson took the many photographs used in this report. Lastly, we thank the folks at Morgan Printing for facilitating the production of this report on a CD.
Introduction

This report documents two collections of Caddo ceramic vessels, ceramic pipes, and a large chipped biface from a number of sites of prehistoric to early historic age in East Texas, specifically in the Big Cypress Creek, Sulphur River, middle Sabine River (in Sabine Parish, Louisiana), and Neches-Angelina River basins in the region (Figure 1). Most of these Caddo artifacts are from the Robert L. Turner, Jr. collection, particularly from the Tuck Carpenter site (41CP5), with the remainder being from the Tommy Johns collection. A companion report discusses the collections from the Johns site (41CP12) held by Turner and Johns (Perttula et al. 2010).

Figure 1. Locations of counties and parishes in East Texas and Northwest Louisiana that have sites represented in the Robert L. Turner, Jr. and Tommy Johns collections. Drawn by Sandra Hannum.

Documentation Efforts

In July and August 2009, the Robert L. Turner, Jr. vessel and pipe collection and the Tommy Johns collection of vessels, pipes, celts, and arrow points were fully documented. Involved in this effort was Timothy K. Perttula, Mark Walters, and Bo Nelson. As discussed below, a detailed description of each ceramic vessel or ceramic pipe was made for documentation purposes, accompanied by drawings appended to vessel documentation forms (on file, Archeological & Environmental Consultants, LLC files in Austin, Texas), where needed, of ceramic vessel decorative motifs or pipe morphology to supplement the artifact descriptions. Analysis notes and photographs were also obtained on the one large chipped biface (see below). Bo Nelson took the photographs of the two collections that we have documented for this report.

It is our intention to make this important information on Caddo collections from East Texas Caddo sites a part of the public record, as we have done recently for several other East Texas collections (Perttula et al. 2009; Perttula, Walters, and Nelson 2009). We believe that there is substantial information to be gained as a result of this effort that will be of considerable benefit in increasing the shared knowledge of Caddo archeology. Private collections are very vulnerable to the possibility of being sold, or broken up, and there are few options for the holders of these collections to ensure that they remain together and also be available for future study. Because the publication of this documentation effort would involve a sizable expense for report formatting and printing, and the funding for these sorts of publication efforts will likely remain uncertain for a considerable time, consequently, this report and accompanying figures and photographs are published on a CD for distribution. We hope that this CD, and others recently done (Perttula et al. 2009, 2010; Perttula, Walters, and Nelson 2009) by the Friends of Northeast Texas Archaeology, will eventually be uploaded on a Caddo archeology website under development.
Methods of Vessel Analysis

The large number of ceramic vessels that we proposed to study in the Robert L. Turner, Jr. and Tommy Johns collections are from generally contemporaneous prehistoric Caddo sites in the Big Cypress Creek basin, although there are a few vessels from the Sulphur, Neches/Angelina, and Sabine River basins as well. Most of the sites in the Big Cypress Creek basin date to Late Caddo Titus phase times (ca. A.D. 1430-1680), but Middle Caddo sites and vessels are also represented. The majority of the Caddo vessels in the Neches/Angelina River basins date to the Historic Caddo Allen phase (ca. A.D. 1650-1800).

To facilitate the vessel documentation and aid in comparisons with other Caddo vessel documentation projects, therefore, we established a documentation protocol to assist in the analysis of each of the vessels from the different sites. Each of the ceramic vessels in the collections is described and analyzed utilizing a consistent set of morphological, functional, and stylistic attributes modeled after the presentations in Cast et al. (2006); Gadus and Fields (1996); Gonzalez et al. (2005), Perttula et al. (1998, 2008, 2009), Perttula (2009), and Perttula (2005, ed.). The purpose of the documentation is to thoroughly characterize the character of each of the ceramic vessels in the different Caddo collections. The sections that follow provide the completed vessel recordation forms for 463 Caddo vessels from at least 22 prehistoric and/or early historic Caddo sites in East Texas (see Figure 1), as well as accompanying vessel photographic illustrations.

The following attributes were employed in the ceramic vessel study:

**Non-plastics:** Deliberate and indeterminate materials in the paste (Rice 1987:411), including a variety of tempers (grog or crushed sherds, bone, hematite, shell, quartz sands, etc.) and “particulate matter of some size.” The grog, bone, and hematite non-plastics appear to have been deliberately added to the paste as tempers. The bone used for temper had been burned and calcined, then crushed, before it was added to the paste.

**Vessel Form:** The principal vessel form categories include open containers (bowls, carinated bowls, and compound bowls) and restricted containers, including jars and bottles of several shapes and sizes. As restricted containers, jars allow access by hand, but bottles do not (Brown 1996:335). Another important vessel form, at least in burial contexts, is the effigy bowl with a modeled head (usually a bird or duck head) and a tab tail; the bird head design is also seen in much earlier (ca. A.D. 1050) Early Caddo cane matting from the Mounds Plantation site in northwestern Louisiana (Webb and McKinney 1975:Figures 17a-c and 18c). Occasionally, an effigy vessel will have a broader tab tail that supported an anthropomorphic or zoomorphic tail rider (see Suhm and Jelks 1962:Plate 24k).

Additional form attributes that were recorded on each of the vessels (depending upon their completeness) include the rim profile (outflaring or
everted, vertical or standing, and inverted), lip profile (rolled to the exterior, rounded, flat, or thinned), and base shape (flat or rounded).

**Core Colors:** Observations on ceramic cross-section colors permit consideration of oxidation patterns (Teltser 1993:Figure 2A-H; Perttula 2005, ed.), and thus the conditions under which the vessel was fired and then cooled after firing. Comments are included for these attributes on the presence and location of fire-clouding, sooting or smudging from cooking use (Skibo 1992), and the preservation and location of charred organic remains or residues.

**Wall Thickness:** Thickness was recorded in millimeters, using a vernier caliper, at the lip, along the rim, at several points along the body, and at the base when possible (only for the vessels that were not complete).

**Interior and Exterior Surface Treatment:** The primary methods of finishing the surface of the vessel include smoothing, burnishing, and polishing (Rice 1987:138), although polishing is generally rarely seen on burial vessels. Brushing is a popular method of roughening the surface (particularly the body) of large and small Middle Caddo (ca. A.D. 1200-1400) and Late Caddo (ca. A.D. 1400-1680) period cooking jars and other utility wares, as well as Historic Caddo sites (post-A.D. 1680) in certain parts of East Texas. Here it is considered a decorative treatment rather than solely a functional surface treatment (cf. Rice 1987:138), although not all Caddo ceramic analysts treat brushing as a decorative treatment (cf. Gadus et al. 2006:31). In certain fine ware vessels, brushed bodies accompanied engraved rim panels. Smoothing creates “a finer and more regular surface…[and] has a matte rather than a lustrous finish” (Rice 1987:138). Burnishing, on the other hand, creates an irregular lustrous finish marked by parallel facets left by the burnishing tool (perhaps a pebble or bone). A polished surface treatment is marked by a uniform and highly lustrous surface finish, done when the vessel is dry, but without “the pronounced parallel facets produced by burnishing leather-hard clay” (Rice 1987:138).

The application of a hematite-rich clay slip (Ferring and Perttula 1987), either red or black after firing in an oxidizing or reducing (i.e., low-oxygen) environment, is another form of surface treatment noted in these vessel assemblages, albeit very rarely. The clay slip is more frequently applied on the vessel exterior than on the interior surface, and then was either burnished or polished after it was leather-hard or dry.

**Height and Orifice Diameter:** These attributes, measured in centimeters, were recorded with a ruler.

**Diameter at Bottom of Rim and Base Diameter:** Also recorded in millimeters using a ruler, these attributes permit characterization of the overall contour and shape of the vessel. With bottles, we also obtained measurements of their maximum body diameter.
Volume: Vessel volume in liters was determined by filling (to within 1 mm of the lip) the vessel with lentil seeds, then dumping the lentil seeds in containers of known volume. In estimating the volume of vessels with holes, the vessel was first filled with a cloth that conformed to vessel contours, then the lentil seeds were poured into the depression in the cloth to within 1 mm of the top of the lip. Then they were dumped into containers of known volume. In cases where the vessels were not (or could not) be reconstructed, but measurements of height and orifice diameter were be obtained, volumes were estimated by comparison with known vessel volumes of specific forms (i.e., carinated bowl, jar, bottle, compound bowl, and bowl) in other documented Caddo vessel assemblages.

Decoration: Decorative techniques present in the vessel collections from sites in the Big Cypress, Sulphur River, middle Sabine, and Angelina/Neches River basins of East Texas include engraving and excising, incising, punctating, pinching, lip notching, brushing, neck banding, and appliquéing. On certain vessels, primarily the utility wares, combinations of decorative techniques (i.e., brushed-punctated) created the decorative elements and motifs. Engraving and lip notching were done with a sharp tool when the vessel was either leather-hard, or after it was fired, while the other decorative techniques were executed with tools (incising and punctation), by adding strips of clay to the wet body (appliqué), by crimping the coils (neck banding), using frayed sticks or grass stems (brushing) dragged across the body surface, or fingernails (certain forms of punctations and pinching), when the vessel was wet or still plastic. Excising is considered a form of engraved decoration, where the clay is deliberately and closely marked/scraped and carved away with a sharp tool, usually to create triangular elements (the pendant triangle or small tick marks), negative elements, or crescent-shaped elements or brackets that separate or serve to define scrolls (Suhm and Jelks 1962:Plate 64a–b, f).

A red clay film or wash was added to the surface (interior and/or exterior surfaces) of some vessels as a slip before they were fired. Another form of vessel decoration is the use of red (hematite or ochre) or white (kaolin clay) clay pigments that have been smeared, impressed, or rubbed into the engraved lines of certain vessels.

Type: The kinds of named ceramic types in these collections follow primarily the work of Suhm and Jelks (1962), Thurmond (1990), Kleinschmidt (1982), and Hart (1982). New types (Hood Engraved) and varieties of Poynor Engraved and Patton Engraved identified herein have been defined by Perttula (2008, 2009), and Spoonbill Engraved was recently recognized from the documentation of vessels from 41WD244 and the Spoonbill site (41WD109) in the upper Sabine River basin (Perttula et al. 2007). In this report, we also define a series of varieties of Ripley Engraved (Figure 2) that follow closely the engraved motifs illustrated by Thurmond (1990:Figure 6), and depend upon his ceramic vessel classifications of more than 740 Ripley Engraved carinated bowls and compound bowls in the Big
Cypress Creek basin, as well as recognize varieties of Ripley Engraved (Figure 3) and Wilder Engraved (Figure 4) bottles. Finally, we have recognized a new engraved type (Turner Engraved) in the Titus phase vessel collections from several sites in the Big Cypress Creek basin (Figure 5).

Figure 2. Defined varieties of Ripley Engraved and other engraved motifs on carinated bowls and compound bowls: a, var. McKinney; b, var. Gandy; c, var. Galt; d, var. Caldwell; e, var. Cash; f, var. Carpenter; g, var. Pilgrims; h, var. Williams; i, var. Reed; j, horizontal diamond, var. unspecified; k, interlocking diamond, var. unspecified.

Figure 3. Ripley Engraved, var. Ripley bottle motifs.

Figure 4. Wilder Engraved, var. Wilder bottle motifs, and var. unspecified motifs: a-c, Wilder Engraved, var. Wilder; d, Wilder Engraved, var. unspecified.

Figure 5. Turner Engraved and defined varieties: a-b, Turner Engraved, var. Turner; c-d, Turner Engraved, var. Horton.

In the sections that follow, we first discuss the archeological character of the vessels found in mortuary contexts at the various prehistoric Caddo sites represented in the Robert L. Turner, Jr. and Tommy Johns collections. Then, this vessel data is employed to make comparisons of the kinds of decorative motifs and elements found on the different kinds of vessel forms, followed by assemblage-level considerations of vessel form, vessel size, use of temper, and firing conditions, as well as the use of pigments, from mortuary vessels of different ages and ceramic traditions in the Big Cypress and Neches/Angelina stream basins. Following this is a discussion of the pottery pipes in the Robert L. Turner, Jr. collection.

Archeological Context of the Sites

Where available from existing field notes, plan maps, and published articles, the archeological context of the prehistoric Caddo ceramic vessels and pipes in the Robert L. Turner, Jr. and Tommy Johns collections are discussed on a site by site basis. Those sites not discussed below unfortunately have no available information on the archeological context of the ceramic vessels in the collections. With respect to the total number of vessels documented in this report, 438 are from sites in the Big Cypress Creek basin, one is from the middle Sabine River basin, one is from the lower Sulphur River basin, and 23 are from sites in the Neches/Angelina River basins (Table 1).

Big Cypress Creek Basin Sites

G. W. Rumsey Site (41CP3)

The G. W. Rumsey site is on Greasy Creek (Figure 6), across the creek from the Late Caddo Titus phase mound center and large community cemetery at the Shelby Mound site (41CP71) (Perttula and Nelson 2004). The site has both extensive Late Caddo habitation/midden deposits (Thurmond 1990:139), and Caddo burials of both Middle Caddo (see Turner 1997) and Late Caddo, Titus phase, age. The cemetery area is reported to be approximately 30 m from the thick Titus phase midden deposits (Thurmond 1990:139).

Figure 6. Location of sites with documented vessel collections in the Big Cypress Creek basin in Northeast Texas: 1, Tuck Carpenter; 2, Johns; 3, Harold Williams; 4, Guest; 5, Horton; 6, Alex Justiss; 7, Keith; 8, Lone Star Lake; 9, Rumsey; 10, Keeling; 11, Moughon; 12, Graydon Adkins #1; 13, Graydon Adkins #2; 14, Lineburger; 15, Pug Wilson; and 16, Patton.

The vessels in the Turner collection from the G. W. Rumsey site had been washed out of burials by flooding over a period of years beginning in the late 1920s, and continuing in the late 1930s and early 1940s. They were collected by Mr. Rumsey, and then some were eventually purchased in 1948 by Robert L. Turner, Jr. (Turner 1997) and in the 1940s by H. Perry Newell of the University of Texas (these latter vessels are at the Texas Archeological Research Laboratory at The University of Texas) (see Turner 1997:12). Turner has 54 vessels in his collection (see below). According to Thurmond (1990:139), however, it was A. T. Jackson of The University of Texas who purchased 12 vessels from the G. W. Rumsey site in 1930, and also made a surface collection.

Tuck Carpenter Site (41CP5)

The Tuck Carpenter site (41CP5), on Dry Creek several miles from its confluence with Big Cypress Creek (see Figure 6), is perhaps the best known Titus phase cemetery in the Big Cypress Creek basin. This is due to the careful analysis and reporting of the recovered funerary offerings and remains from 45 burials excavated by Turner and R. W. Walsh in the 1960s (Turner 1978, 1992). More than 95% of the graves had the bodies of single individuals laid in an extended supine position on the floor of the pit, but two burial features (Burials 21 and 23) had two individuals placed side by side in the burial pit.

The Tuck Carpenter site is a large community cemetery that was apparently used for the interment of Caddo peoples for a considerable span of time in the 15th to the 17th century A.D. The burials were laid out in an east-west direction in a number of rows (Turner 1978:Figure 3), amidst an existing midden deposit. A wide assortment of funerary offerings were placed in the graves, including 402 ceramic vessels, eight ceramic pipes, four ceramic ear spools, two wood ear ornaments, one sandstone ear spool with a copper plate covering, one sandstone ear spool, 57 Talco arrow points, 19 Maud
points, 55 Bassett points, 57 Perdiz point, one arrow point of unidentified type, one large chipped biface or Galt biface (Thurmond 1990:Table 23) of non-local chert (Thurmond 1990:144), one biface fragment, seven celts, one metate, four manos, four abrading stones, two polishing stones, one chipped gouge, deer mandibles, deer beamers, clay pigment masses, one marine shell columella bead, turtle carapaces, and mussel shells (Turner 1978:12-49).

**Harold Williams Site (41CP10)**

The Harold Williams site, also referred to as the Albert Hilton Farm in the mid-1940s when the site was initially found, was first brought to notice when a large flood (in 1943?) washed out a number of Caddo burials and ceramic vessels on a low terrace of Dry Creek, a tributary to Big Cypress Creek (Turner 1997; Turner and Smith 2003) (see Figure 6). Mr. Hilton sold the vessels he collected to several individuals, including Robert L. Turner, Jr.

In 1959, Ralph Nicholas, Ed German, and Turner excavated 19 extended Caddo burials from a Titus phase cemetery in one area of the Harold Williams site (Turner 1997; Turner and Smith 2003). Funerary offerings in these burials includes 55 ceramic vessels, one ceramic elbow pipe, a single pulley-shaped ceramic ear spool, three Bassett arrow points, 14 Talco points, an abrading stone, and three ground stone celts (Turner and Smith 2003:Table 14). Anecdotal information also suggests that more than 80 burials have actually been excavated from the site over the years, and thus that there is a ca. A.D. 1550-early 1600s Titus phase community cemetery at this place (Turner and Smith 2003:39, 54).

Archeological investigations in 1967, before and during a Texas Archeological Society Field School held at the site documented that the Harold Williams site also has Middle Caddo period habitation deposits, including a midden covering a 75 x 60 m area (ca. 1.1 acres) (Thurmond 1990:146), post holes from an oval structure, extensive amounts of daub, pit features, and three burials (with nine vessels) in Area A at the eastern end of the site. Among the funerary offerings from these burials is a bottle with an engraved rattlesnake motif (Turner and Smith 2003:Figure 12b, d-e).

**B. J. Horton Site (41CP20)**

The B. J. Horton site (41CP20) is on an upland ridge overlooking the Big Cypress Creek floodplain (see Figure 6); Walkers Creek lies a short distance to the south (Hunt et al. 1996:Figure 1). The site is primarily a Titus phase cemetery with at least 19 excavated burials (Turner 1978:Figure 33).

Ralph Nicholas, Ed German, and Robert L. Turner, Jr. excavated 15 burials at the site in September and October 1958, and several others were known to have been excavated by Alan Young in the late 1960s (Hunt et al. 1996:15). Available notes and records from several of the burials (Burials 1-5, 8-12, and 15) compiled by Turner have been reproduced by Hunt et al. (1996:Appendix F). These indicate that the following
funerary offerings were placed with the burials: 83 ceramic vessels, one ceramic pipe, two Perdiz points, one Maud point, 23 Bassett points, two Talco point, nine unidentified points, and two ground stone celts.

**Pug Wilson Site (41CP76)**

The Pug Wilson site (41CP76) is a Titus phase habitation/midden on the west side of Dry Creek, about 200 m southwest of the Tuck Carpenter site (Turner and Smith 2003:Figure 1) (see Figure 6). According to the available notes, two prehistoric Caddo burials were excavated from this site.

**Cecil Guest Site (41CP78)**

According to Turner (1978:Figure 33) a total of seven Titus phase burials had been excavated by collectors at the Cecil Guest site (41CP78). The cemetery is on Dry Creek near its confluence with Big Cypress Creek, not far (450 m) from the Harold Williams site (Turner and Smith 2003:66) (see Figure 6).

**Avinger Rest Stop/Carl Owens Site (41CS132)**

Little is known about the Avinger Rest Stop/Carol Owens site except that it is an apparent Middle Caddo cemetery (Nelson and Turner 1997:4) in the Black Cypress Bayou basin (see Figure 6). A bottle with an engraved rattlesnake motif (Nelson and Turner 1997:Figure 7d; Walters 2006:Figure 21) has been previously reported from the site.

**Lone Star Lake Site (41MX65)**

The Lone Star Lake site (41MX65) is a Titus phase cemetery on a regularly-inundated island in Ellison Creek Reservoir, an artificial reservoir on Ellison Creek, a tributary to Big Cypress Creek (see Figure 6). The site is also known as the Ellison Lake site (Turner 1978:Figure 2) and the West Island site (King and Turner 1993).

An unknown number of Titus phase burials have been excavated at the Lone Star Lake site over the last 40-50 years, including the disturbed remnants of two burials by King and Turner (1993) in 1986. Ceramic funerary offerings include vessels of Avery Engraved, Bailey Engraved, Bullard Brushed, Cowhide Stamped, Harleton Appliqued, Hodges Engraved, Karnack Brushed-Incised, Maydelle Incised, Ripley Engraved, Simms Engraved, Taylor Engraved, and Wilder Engraved (Turner 1978:Figure 33).

**Keith Site (41TT11)**

The George L. Keith site (41TT11) is located on a terrace remnant and the floodplain of Hart Creek, a southward-flowing tributary to Big Cypress Creek (see Figure 6). It had a Titus phase cemetery with at least 15 burials (with ceramic vessels, Talco arrow points, and celts) that were excavated in the 1950s by Ralph Nicholas, Ed German,
and several individuals from the Mount Pleasant, Texas, area (Robert L. Turner, Jr. notes; see also Thurmond [1990:183-184]). These burials were in a cemetery about 100 m east of the one Middle Caddo period earthen platform mound at the site, and in an area with both Middle Caddo and Titus phase habitation deposits. This mound was trenched by The University of Texas in 1934, exposing a series of sub-mound and mound platform structures, several small associated midden deposits, as well as an outdoor activity area marked by post holes, pits, and concentrations of ash and charcoal (Thurmond 1990:184).

Notes are available on Burial 1 at the Keith site, which was an extended burial oriented east-west (1.8 x 0.56 m in length and width) and set in a shallow pit cut into the clay B-horizon. Eight ceramic vessels had been placed in the grave, along with a cache of 76 pieces of lithic debris.

**Alex Justiss Site (41TT13)**

The Alex Justiss site (41TT13) is principally a 17th century Titus phase cemetery on an upland ridge landform in the Swauano Creek valley in the Big Cypress Creek basin (Bell 1981; Rogers et al. 2003) (see Figure 6). During excavations by Ralph Nicholas, Ed German, and Bob Turner in 1959, a total of 27 Caddo burials were excavated in the cemetery, with at least 182 ceramic vessels placed in the graves as funerary offerings, along with 69 arrow points (including 10 unique side-notched points, see Bell 1981:Figure 41) and a ceramic pipe (Bell 1981:Tables 4 and 5). An additional burial (Burial 28) was excavated by PBS&J prior to the expansion of SH 49 across the site (Rogers et al. 2003:Figure 10).

**Graydon Adkins, Site 2 (41UR17)**

In 1958, Ralph Nicholas, Ed German, and Robert L. Turner, Jr. excavated eight extended prehistoric Caddo burials on a floodplain rise at the Graydon Adkins #2 site (Turner 1997:Figures 11-18). Thurmond (1990:100) incorrectly states that only five burials were excavated at the site.

The site is on the eastern side of the Greasy Creek valley, almost directly opposite to the Graydon Adkins #1 site (Turner 1978:Figure 2) (see Figure 6). Funerary offerings placed with the burials include 35 vessels, a ceramic pipe, a clay pipe stem or bead, five arrow points, three dart points (Burials 2 and 6), three polishing stones, and one abrading stone (Turner 1997). The vessel forms and decorative styles on the ceramic vessels suggested to Turner (1997) that they came from Middle Caddo period burial features. In addition to the burial features, Thurmond (1990:100) reports that Nicholas et al. also tested a well-preserved midden deposit at the Graydon Adkins #2 site.

**Graydon Adkins, Site 1 (41UR21)**

The Graydon Adkins #1 site, on a floodplain rise near Greasy Creek (see Figure 6), was also excavated by Nicholas, German, and Turner in 1958, and eight burials were investigated (see Turner 1978:Figure 33; Thurmond 1990:100). These burials include
several that may be Middle Caddo features (Turner 1997), one of which (Burial 4) has a compound bowl with an engraved rattlesnake motif (Turner 1997:Figure 9e; Walters 2006), but Late Caddo burials were also apparently among those burials excavated by Nicholas et al. at the site.

Keeling Site, Upshur County, Texas

A total of 15 burials of Titus phase age were reportedly excavated at the Keeling site by collectors (Turner 1978:Figures 2 and 33). The Keeling site is located in the Greasy Creek basin, about 8 km west of the main course of Big Cypress Creek (see Figure 6).

Moughon Site, Upshur County, Texas

The Moughon site, also spelled Moughan or Maughon (Turner 1978:Figures 2 and 33), is a Titus phase cemetery in the Little Cypress Creek basin, not far to the east of the city of Gilmer (see Figure 6). According to Turner (1978:Figure 33), a total of three burials were excavated there by collectors. Vessels of the types Maydelle Incised, Bullard Brushed, Ripley Engraved (bottles and carinated bowls), var. Carpenter, var. Cash, var. Gandy, and var. Pilgrims, Wilder Engraved, var. Wilder (bottles), Pease Brushed-Incised, and Harleton Appliqued were reported to have been recovered from those burials, along with Bassett and triangular (Maud/Talco) arrow points.

More detailed notes provided by Robert L. Turner, Jr. and Tommy Johns indicates that Burial 1 (excavated May 29, 1968) at the Moughon site had three vessels, Burial 2 had 11 vessels and three arrow points, and Burial 3 had six pottery vessels and three Talco arrow points as funerary offerings. A plan of Burial 2 indicates that the individual was laid out in an extended supine position in a 1.93 m long and 1.37 m deep grave, with the head facing towards the west. Burial vessels were laid along both sides of the body and at the feet of the deceased, and the three arrow points were along the right side of the point, but not in a cluster or possible quiver.

Vessel Recordation Forms, G. W. Rumsey Site (41CP3)

There are 54 Caddo vessels in the Turner collection from the G. W. Rumsey site. All these vessels had been washed out of a prehistoric Caddo cemetery over several years, collected by the landowner, and subsequently the vessels were purchased by Robert L. Turner, Jr.

The vessels include jars (33%), carinated bowls (24%), bowls (20%), bottles (17%), and compound bowls (6%). The fine wares (51.9%) include several varieties of Ripley Engraved carinated bowls, bowls, and compound bowls (n=11), Ripley Engraved bottles (n=1), Wilder Engraved bottles (n=3), Wilder Engraved bowls (n=1), Taylor Engraved bowls (n=2), cf. Taylor Engraved carinated bowls (n=1), Hood Engraved effigy bowls (n=1), cf. Belcher Engraved carinated bowls (n=1), red-slipped bowls (n=2), engraved jars, bowls, and compound bowls of unidentified type (n=3), and engraved
bottles of unidentified type (n=2). Among the utility ware vessels (40.7%) are Bullard Brushed jars (n=2), Harleton Appliqued jars (n=1), Karnack Brushed-Incised jars (n=1), Maydelle Incised jars (n=2), La Rue Neck Banded jars (n=1), Cass Appliqued jars (n=1), Mockingbird Punctated jars (n=1), Killough Pinched bowls (n=1), a Dunkin Incised jar (n=1), a fingernail impressed effigy bowl, punctated-brushed-appliqued jars (n=1), brushed-punctated jars (n=1), punctated rim jars (n=1), a punctated-appliqued carinated bowl, incised-punctated jars and bowls (n=4), and incised carinated bowls and jars (n=2). The plain wares (7.4%) include bottles (n=1), bowls (n=2), and carinated bowls (n=1).

SITE NAME OR SITE NUMBER: G. W. Rumsey

VESSEL NO.: 12

NON-PLASTICS: grog

VESSEL FORM: Jar

RIM AND LIP FORM: Everted rim and a rounded lip

CORE COLOR: G (fired in a reducing environment and cooled in the open air)

INTERIOR SURFACE COLOR: dark grayish-brown (10YR 4/2)

EXTERIOR SURFACE COLOR: light gray (10YR 7/2)

WALL THICKNESS (RIM, BODY, AND BASE IN MM): 8.1 mm, rim

INTERIOR SURFACE TREATMENT: none

EXTERIOR SURFACE TREATMENT: smoothed on the lower body

HEIGHT (IN CM): 20.6

ORIFICE DIAMETER (IN CM): 17.8

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): 20.0

BASE DIAMETER (IN CM): 7.0

ESTIMATED VOLUME (IN LITERS): 3.3 liters

DECORATION: There is horizontal brushing on the rim, and vertical brushing on the vessel body. The body brushing extends approximately halfway down the jar body (Figure 7).
TYPE: cf. Bullard Brushed

Figure 7. cf. Bullard Brushed jar from the Rumsey site, Vessel 12.

SITE NAME OR SITE NUMBER: G. W. Rumsey

VESSEL NO.: 13

NON-PLASTICS: grog and hematite

VESSEL FORM: Jar

RIM AND LIP FORM: Everted rim and a rounded lip

CORE COLOR: H (fired in a reducing environment and cooled in the open air)

INTERIOR SURFACE COLOR: light yellowish-brown (10YR 6/4)

EXTERIOR SURFACE COLOR: very dark grayish-brown (10YR 3/2)

WALL THICKNESS (RIM, BODY, AND BASE IN MM): 6.5 mm, rim

INTERIOR SURFACE TREATMENT: smoothed

EXTERIOR SURFACE TREATMENT: none

HEIGHT (IN CM): 19.0

ORIFICE DIAMETER (IN CM): 21.6

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): 21.0

BASE DIAMETER (IN CM): 8.5

ESTIMATED VOLUME (IN LITERS): 3.7 liters

DECORATION: The rim has six panels of tool punctates divided by six sets of vertical appliqued fillets (Figure 8). The upper part of the vessel body has vertical brushing marks, while the lower part of the body has overlapping brushing marks.

TYPE: Unidentified utility ware vessel

Figure 8. Punctated-appliqued-brushed jar, Rumsey site, Vessel 13.
14

SITE NAME OR SITE NUMBER: G. W. Rumsey

VESSEL NO.: 14

NON-PLASTICS: grog

VESSEL FORM: Jar

RIM AND LIP FORM: Everted rim and a rounded lip

CORE COLOR: B (fired and cooled in a reducing environment)

INTERIOR SURFACE COLOR: dark grayish-brown (10YR 4/2)

EXTERIOR SURFACE COLOR: dark grayish-brown (10YR 4/2); fire clouding and organic residue on the rim and upper body

WALL THICKNESS (RIM, BODY, AND BASE IN MM): 6.8 mm, rim

INTERIOR SURFACE TREATMENT: smoothed

EXTERIOR SURFACE TREATMENT: none

HEIGHT (IN CM): 25.4

ORIFICE DIAMETER (IN CM): 18.5

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): 16.0

BASE DIAMETER (IN CM): 7.0

ESTIMATED VOLUME (IN LITERS): 6.1 liters

DECORATION: The rim has three widely-spaced rows of tool punctations, and the body has diagonal to near vertical brushing marks that extend to near the vessel base (Figure 9).

TYPE: Brushed-punctated utility ware vessel

Figure 9. Brushed-punctated jar, Rumsey site, Vessel 14.

SITE NAME OR SITE NUMBER: G. W. Rumsey

VESSEL NO.: 15
NON-PLASTICS: grog, bone, and hematite

VESSEL FORM: Bottle

RIM AND LIP FORM: Direct rim and an apparent rounded lip

CORE COLOR: F (fired in a reducing environment and cooled in the open air)

INTERIOR SURFACE COLOR: 10YR 6/2 (light brownish-gray)

EXTERIOR SURFACE COLOR: 10YR 6/2 (light brownish-gray); fire clouding on the base

WALL THICKNESS (RIM, BODY, AND BASE IN MM): N/A

INTERIOR SURFACE TREATMENT: none

EXTERIOR SURFACE TREATMENT: smoothed, but eroded

HEIGHT (IN CM): 13.0

ORIFICE DIAMETER (IN CM): 3.5

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): 4.9; 11.0 cm maximum body diameter

BASE DIAMETER (IN CM): 7.5

ESTIMATED VOLUME (IN LITERS): 0.39 liters

DECORATION: The vessel has an engraved curvilinear scroll repeated four times that begins at both the upper and lower parts of the body as two arms of the scroll, and meets at a small central engraved circle. There are widened cross-hatched zones on the scroll on either side of the central engraved circle (Figure 10). Scroll dividers include upper and lower engraved triangles with either hatched corners or excised areas.

TYPE: Wilder Engraved, var. Wilder

Figure 10. Wilder Engraved, var. Wilder bottle, Rumsey site, Vessel 15.

SITE NAME OR SITE NUMBER: G. W. Rumsey

VESSEL NO.: 16

NON-PLASTICS: grog
VESSEL FORM: Jar

RIM AND LIP FORM: Direct rim and a rounded lip

CORE COLOR: B (fired and cooled in a reducing environment)

INTERIOR SURFACE COLOR: grayish-brown (10YR 5/2)

EXTERIOR SURFACE COLOR: grayish-brown (10YR 5/2); organic residue on the body

WALL THICKNESS (RIM, BODY, AND BASE IN MM): 5.3 mm, rim

INTERIOR SURFACE TREATMENT: none

EXTERIOR SURFACE TREATMENT: smoothed on the body

HEIGHT (IN CM): 15.0

ORIFICE DIAMETER (IN CM): 14.8

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): 14.8

BASE DIAMETER (IN CM): 8.5

ESTIMATED VOLUME (IN LITERS): 1.3 liters

DECORATION: The rim has multiple sets of opposed diagonal incised lines (Figure 11).

TYPE: cf. Maydelle Incised or Canton Incised

Figure 11. cf. Maydelle Incised or Canton Incised jar, Rumsey site, Vessel 16.

SITE NAME OR SITE NUMBER: G. W. Rumsey

VESSEL NO.: 17

NON-PLASTICS: grog

VESSEL FORM: Bowl

RIM AND LIP FORM: Direct rim and a rounded lip

CORE COLOR: H (fired in a reducing environment and cooled in the open air)
INTERIOR SURFACE COLOR: grayish-brown (10YR 5/2)

EXTERIOR SURFACE COLOR: dark grayish-brown (10YR 4/2)

WALL THICKNESS (RIM, BODY, AND BASE IN MM): 5.5 mm, rim

INTERIOR SURFACE TREATMENT: smoothed

EXTERIOR SURFACE TREATMENT: burnished

HEIGHT (IN CM): 5.0

ORIFICE DIAMETER (IN CM): 10.7

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): N/A

BASE DIAMETER (IN CM): 5.0

ESTIMATED VOLUME (IN LITERS): 0.21 liters

DECORATION: The upper part of the bowl has an engraved panel with four sets of horizontal interlocking scrolls (Thurmond 1990:Figure 6g). The interlocking scroll elements are excised brackets, while the panel dividers are either brackets or rectangular columns (Figure 12).

TYPE: Ripley Engraved, var. Pilgrims

Figure 12. Ripley Engraved, var. Pilgrims bowl, Rumsey site, Vessel 17.

SITE NAME OR SITE NUMBER: G. W. Rumsey

VESSEL NO.: 18

NON-PLASTICS: grog and hematite

VESSEL FORM: Jar with four appliqued lugs on the rim (Figure 13)

RIM AND LIP FORM: Direct rim and rounded lip

CORE COLOR: G (fired in a reducing environment and cooled in the open air)

INTERIOR SURFACE COLOR: dark grayish-brown (10YR 4/2)
EXTERIOR SURFACE COLOR: yellowish-red (5YR 5/6); fire clouding on the body and base

WALL THICKNESS (RIM, BODY, AND BASE IN MM): 4.2 mm, rim; 4.7 mm, body

INTERIOR SURFACE TREATMENT: smoothed

EXTERIOR SURFACE TREATMENT: none

HEIGHT (IN CM): 10.0

ORIFICE DIAMETER (IN CM): 8.2

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): 7.0

BASE DIAMETER (IN CM): 5.0

ESTIMATED VOLUME (IN LITERS): 0.49 liters

DECORATION: The rim has randomly and closely-spaced tool punctates between each of the appliqued vessel lugs; the body is plain (Figure 13).

TYPE: Unidentified punctated utility ware vessel

Figure 13. Punctated jar, Rumsey site, Vessel 18.

SITE NAME OR SITE NUMBER: G. W. Rumsey

VESSEL NO.: 19a

NON-PLASTICS: bone and grog

VESSEL FORM: Carinated bowl

RIM AND LIP FORM: Direct rim and a rounded, exterior folded lip

CORE COLOR: B (fired and cooled in a reducing environment)

INTERIOR SURFACE COLOR: dark grayish-brown (10YR 4/2)

EXTERIOR SURFACE COLOR: very dark grayish-brown (10YR 3/2)

WALL THICKNESS (RIM, BODY, AND BASE IN MM): 5.7 mm, rim; 5.7 mm, body; 9.1 mm, base
INTERIOR SURFACE TREATMENT: smoothed

EXTERIOR SURFACE TREATMENT: burnished

HEIGHT (IN CM): N/A

ORIFICE DIAMETER (IN CM): 26.0

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): N/A

BASE DIAMETER (IN CM): 7.0

ESTIMATED VOLUME (IN LITERS): N/A

DECORATION: The rim has an engraved pendant triangle motif (Thurmond 1990:Figure 6a) repeated four times around the vessel. The central elements in the motif include engraved diamonds (twice) and circles (twice), each with small centrally placed spurred/rayed circles (Figure 14). The pendant triangles have been excised. A white kaolin clay pigment has been rubbed in the engraved lines.

TYPE: Ripley Engraved,
EXTERIOR SURFACE TREATMENT: burnished

HEIGHT (IN CM): 12.4

ORIFICE DIAMETER (IN CM): 25.5

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): 25.2

BASE DIAMETER (IN CM): 7.7

ESTIMATED VOLUME (IN LITERS): 1.9 liters

DECORATION: The rim has a simplified horizontal interlocking scroll motif repeated four times around the vessel. There are no connecting brackets or excised/hatched scroll dividers (see Thurmond 1990:Figure 6g) on this engraved vessel, only short vertical engraved lines in their place (Figure 15).

TYPE: cf. Ripley Engraved, var. Pilgrims

Figure 15. cf. Ripley Engraved, var. Pilgrims carinated bowl, Rumsey site, Vessel 19b.

SITE NAME OR SITE NUMBER: G. W. Rumsey

VESSEL NO.: 21

NON-PLASTICS: grog

VESSEL FORM: Carinated bowl

RIM AND LIP FORM: Direct rim and a rounded lip

CORE COLOR: F (fired in a reducing environment and cooled in the open air)

INTERIOR SURFACE COLOR: reddish-brown (5YR 5/3)

EXTERIOR SURFACE COLOR: reddish-brown (5YR 5/3); fire clouding on the base and lower body

WALL THICKNESS (RIM, BODY, AND BASE IN MM): 6.4 mm, rim; 5.9 mm, body; 8.5 mm, base

INTERIOR SURFACE TREATMENT: burnished on the rim and smoothed on the body

EXTERIOR SURFACE TREATMENT: burnished on the rim and smoothed on the body
HEIGHT (IN CM): 14.5

ORIFICE DIAMETER (IN CM): 28.0

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): 28.0

BASE DIAMETER (IN CM): 9.0

ESTIMATED VOLUME (IN LITERS): 3.3 liters

DECORATION: The rim panel has an engraved pendant triangle motif (Thurmond 1990:Figure 6a) repeated four times around the vessel. The central elements in the motif are engraved diamonds (repeated twice) that alternate with engraved circles (repeated twice); each central element has a small spurred circle at its center (Figure 16). The upper and lower pendant triangles are excised. The engraved motif is filled with a white kaolin clay pigment.

TYPE: Ripley Engraved, var. McKinney

Figure 16. Ripley Engraved, var. McKinney carinated bowl rim sherds, Rumsey site, Vessel 21.

SITE NAME OR SITE NUMBER: G. W. Rumsey

VESSEL NO.: 22

NON-PLASTICS: grog and bone

VESSEL FORM: Jar

RIM AND LIP FORM: Everted rim and a rounded lip

CORE COLOR: B (fired and cooled in a reducing environment)

INTERIOR SURFACE COLOR: very dark gray (10YR 3/1)

EXTERIOR SURFACE COLOR: very dark gray (10YR 3/1)

WALL THICKNESS (RIM, BODY, AND BASE IN MM): 8.2 mm, rim; 9.5 mm, body

INTERIOR SURFACE TREATMENT: smoothed

EXTERIOR SURFACE TREATMENT: none
HEIGHT (IN CM): 20.8

ORIFICE DIAMETER (IN CM): 19.3

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): 14.3

BASE DIAMETER (IN CM): 9.0

ESTIMATED VOLUME (IN LITERS): 3.6 liters

DECORATION: The rim has three rows of neck banding. On the vessel body, there are eight vertical appliqued ridges that have divided the body into eight panels filled with vertical brushing marks. The brushing extends to just above the vessel base (Figure 17).

TYPE: La Rue Neck Banded

Figure 17. La Rue Neck Banded jar, Rumsey site, Vessel 22.

SITE NAME OR SITE NUMBER: G. W. Rumsey

VESSEL NO.: 23

NON-PLASTICS: grog

VESSEL FORM: Jar

RIM AND LIP FORM: Everted rim and a rounded lip

CORE COLOR: G (fired in a reducing environment and cooled in the open air)

INTERIOR SURFACE COLOR: very dark grayish-brown (10YR 3/2); fire clouding and organic residue

EXTERIOR SURFACE COLOR: light yellowish-brown (10YR 6/4); fire clouding and organic residue on the rim and upper body

WALL THICKNESS (RIM, BODY, AND BASE IN MM): 6.2 mm, rim

INTERIOR SURFACE TREATMENT: smoothed

EXTERIOR SURFACE TREATMENT: smoothed on the body

HEIGHT (IN CM): 19.2

ORIFICE DIAMETER (IN CM): 19.8
DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): 19.2

BASE DIAMETER (IN CM): 6.8

ESTIMATED VOLUME (IN LITERS): 3.4 liters

DECORATION: There are two broad horizontal lines on the rim, creating a panel, one under the lip and the other at the rim-body juncture. Within the panel is a single centrally-placed row of square tool punctations (Figure 18).

TYPE: Unidentified incised-punctated utility ware vessel

**Figure 18. Incised-punctated jar, Rumsey site, Vessel 23.**

SITE NAME OR SITE NUMBER: G. W. Rumsey

VESSEL NO.: 24

NON-PLASTICS: bone and grog

VESSEL FORM: Bottle with a flaring neck

RIM AND LIP FORM: Everted rim and a rounded lip

CORE COLOR: G (fired in a reducing environment and cooled in the open air)

INTERIOR SURFACE COLOR: very dark gray (10YR 3/1)

EXTERIOR SURFACE COLOR: light reddish-brown (5YR 6/4); fire clouding on the body and base

WALL THICKNESS (RIM, BODY, AND BASE IN MM): 5.8 mm, neck

INTERIOR SURFACE TREATMENT: smoothed on the upper neck

EXTERIOR SURFACE TREATMENT: burnished

HEIGHT (IN CM): 25.3

ORIFICE DIAMETER (IN CM): 4.9

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): 6.1; 18.6 cm maximum body diameter
BASE DIAMETER (IN CM): 7.6

ESTIMATED VOLUME (IN LITERS): 0.77 liters

DECORATION: The vessel body has four panels of curvilinear engraved scrolls that meet at a central small engraved circle. The scrolls begin at upper and lower body hatched and spurred triangles. The small central circle is a circle and swastika element (Figure 19). A red clay pigment has been rubbed in the engraved lines.

TYPE: Wilder Engraved, var. Wilder

Figure 19. Wilder Engraved, var. Wilder bottle, Rumsey site, Vessel 24.

SITE NAME OR SITE NUMBER: G. W. Rumsey

VESSEL NO.: 25

NON-PLASTICS: grog, hematite, and bone

VESSEL FORM: Bottle with a straight neck

RIM AND LIP FORM: Direct rim and a rounded lip

CORE COLOR: F (fired in a reducing environment and cooled in the open air)

INTERIOR SURFACE COLOR: pale brown (10YR 6/3)

EXTERIOR SURFACE COLOR: pale brown (10YR 6/3); fire clouding on the body and base

WALL THICKNESS (RIM, BODY, AND BASE IN MM): 6.4 mm, rim

INTERIOR SURFACE TREATMENT: none

EXTERIOR SURFACE TREATMENT: smoothed

HEIGHT (IN CM): 19.9

ORIFICE DIAMETER (IN CM): 5.0

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): 4.8; 13.0 cm maximum body diameter

BASE DIAMETER (IN CM): 8.2
ESTIMATED VOLUME (IN LITERS): 0.65 liters

DECORATION: The vessel body has two separate elements: (1) a central set of two large engraved hooked arm scrolls, repeated twice on the body, and (2) four sets of large engraved concentric semi-circles (four in each set) and hatched triangles, two sets on the upper body and two sets on the lower body (Figure 20).

TYPE: Taylor Engraved

**Figure 20. Taylor Engraved bottle, Rumsey site, Vessel 25.**

SITE NAME OR SITE NUMBER: G. W. Rumsey

VESSEL NO.: 26

NON-PLASTICS: grog

VESSEL FORM: Bottle with a straight neck

RIM AND LIP FORM: Direct rim and a rounded lip

CORE COLOR: G (fired in a reducing environment and cooled in the open air)

INTERIOR SURFACE COLOR: very dark gray (10YR 3/1)

EXTERIOR SURFACE COLOR: brown (10YR 5/3); fire clouding

WALL THICKNESS (RIM, BODY, AND BASE IN MM): 7.6 mm, neck

INTERIOR SURFACE TREATMENT: none

EXTERIOR SURFACE TREATMENT: burnished

HEIGHT (IN CM): 17.0

ORIFICE DIAMETER (IN CM): 4.5

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): 4.1; 10.8 cm maximum body diameter

BASE DIAMETER (IN CM): 8.0

ESTIMATED VOLUME (IN LITERS): 0.54 liters
DECORATION: The vessel body has a series of closely-spaced curvilinear lines that were engraved between upper and lower sets of large cross-hatched engraved triangles (Figure 21). There are three sets of triangles on both the upper and lower vessel body.

The engraved decoration is reminiscent of Bailey Engraved, except that there are not two sets of curvilinear to concentric engraved lines on this bottle. Furthermore, the engraved triangles as seen on the Rumsey site vessel are either open or filled with punctations on Bailey Engraved bottles (Suhm and Jelks 1962:5 and Plate 3).

TYPE: Unidentified engraved fine ware bottle

Figure 21. Engraved bottle of undetermined type, Rumsey site, Vessel 26.

SITE NAME OR SITE NUMBER: G. W. Rumsey

VESSEL NO.: 27

NON-PLASTICS: grog

VESSEL FORM: Bottle with a short rim (Figure 22)

RIM AND LIP FORM: Direct rim and a rounded lip

CORE COLOR: B (fired and cooled in a low oxygen environment)

INTERIOR SURFACE COLOR: dark gray (10YR 4/1)

EXTERIOR SURFACE COLOR: dark gray (10YR 4/1); fire clouding

WALL THICKNESS (RIM, BODY, AND BASE IN MM): 6.4 mm, neck

INTERIOR SURFACE TREATMENT: none

EXTERIOR SURFACE TREATMENT: smoothed

HEIGHT (IN CM): 17.5; neck height is 3.7 cm

ORIFICE DIAMETER (IN CM): 4.7

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): 4.8; maximum body diameter is 12.5 cm

BASE DIAMETER (IN CM): 9.5

ESTIMATED VOLUME (IN LITERS): 0.66 liters
DECORATION: Plain (Figure 22)

TYPE: Unidentified plain ware bottle

Figure 22. Plain bottle, Rumsey site, Vessel 27.

SITE NAME OR SITE NUMBER: G. W. Rumsey

VESSEL NO.: 28

NON-PLASTICS: grog, hematite, and bone

VESSEL FORM: Bottle with a collared neck (Figure 23)

RIM AND LIP FORM: Direct rim and a rounded, exterior folded lip

CORE COLOR: F (fired in a reducing environment and cooled in the open air)

INTERIOR SURFACE COLOR: brown (10YR 5/3)

EXTERIOR SURFACE COLOR: brown (10YR 5/3)

WALL THICKNESS (RIM, BODY, AND BASE IN MM): 5.7 mm, neck

INTERIOR SURFACE TREATMENT: none

EXTERIOR SURFACE TREATMENT: smoothed on the body and burnished on the neck

HEIGHT (IN CM): 15.5

ORIFICE DIAMETER (IN CM): 4.0

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): 4.0

BASE DIAMETER (IN CM): 6.5

ESTIMATED VOLUME (IN LITERS): 0.41 liters

DECORATION: There are four repeating sets of curvilinear engraved scrolls on the vessel body. These scrolls hook around each other and meet in a small excised central circle. There is a widened zone of hatching along the outer sides of each of the scrolls (Figure 23). The scrolls begin from upper and lower engraved triangles, either plain or hatched on the corners.
TYPE: Wilder Engraved, var. Wilder

Figure 23. Wilder Engraved, var. Wilder bottle, Rumsey site, Vessel 28.

ORIFICE DIAMETER (IN CM): 11.1

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): 10.5

BASE DIAMETER (IN CM): 6.4

ESTIMATED VOLUME (IN LITERS): 0.46 liters

DECORATION: The upper part of the rim is plain. The lower rim has two separate panels of two sets of horizontal interlocking scrolls executed with small tool punctates. A large appliqued node divides the two scrolls within each panel (Figure 35). The massive strap handles have three appliqued nodes on them.

TYPE: Unidentified punctated-appliqued vessel

Figure 35. Punctated-appliqued compound bowl, Rumsey site, Vessel 42.

SITE NAME OR SITE NUMBER: G. W. Rumsey

VESSEL NO.: 43

NON-PLASTICS: grog

VESSEL FORM: Carinated bowl with two opposed strap handles (Figure 36)

RIM AND LIP FORM: Direct rim and a flat, exterior folded, lip

CORE COLOR: G (fired in a reducing environment and cooled in the open air)

INTERIOR SURFACE COLOR: very dark gray (10YR 3/1)
EXTERIOR SURFACE COLOR: very pale brown (10YR 7/4); fire clouding on the body and the base

WALL THICKNESS (RIM, BODY, AND BASE IN MM): 7.0 mm, rim

INTERIOR SURFACE TREATMENT: smoothed

EXTERIOR SURFACE TREATMENT: none (eroded)

HEIGHT (IN CM): 7.0

ORIFICE DIAMETER (IN CM): 12.8

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): 11.7

BASE DIAMETER (IN CM): 5.2

ESTIMATED VOLUME (IN LITERS): 0.54 liters

DECORATION: The engraved design is difficult to discern on the eroded exterior vessel surface, other than that there is a centrally placed horizontal engraved line on the rim panel, and two opposed appliqued nodes on the rim; the latter suggest the Belcher Engraved, var. Belcher typological identification (see Schambach and Miller 1984; Webb 1959). Each strap handle has three appliqued nodes (Figure 36).

Figure 36. cf. Belcher Engraved, var. Belcher carinated bowl, Rumsey site, Vessel 43.

SITE NAME OR SITE NUMBER: G. W. Rumsey

VESSEL NO.: 44

NON-PLASTICS: grog and bone

VESSEL FORM: Shallow bowl

RIM AND LIP FORM: Everted rim and a rounded lip

CORE COLOR: F (fired in a reducing environment and cooled in the open air)

INTERIOR SURFACE COLOR: strong brown (7.5YR 5/6); fire clouding on the rim, body, and base
EXTERIOR SURFACE COLOR: red (2.5YR 4/6); fire clouding on the base

WALL THICKNESS (RIM, BODY, AND BASE IN MM): 8.2 mm, rim

INTERIOR SURFACE TREATMENT: smoothed

EXTERIOR SURFACE TREATMENT: burnished

HEIGHT (IN CM): 4.2

ORIFICE DIAMETER (IN CM): 16.5

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): N/A

BASE DIAMETER (IN CM): 7.5

ESTIMATED VOLUME (IN LITERS): 0.28 liters

DECORATION: The vessel has an exterior red slip.

TYPE: Unidentified red-slipped fine ware vessel

SITE NAME OR SITE NUMBER: G. W. Rumsey

VESSEL NO.: 45a

NON-PLASTICS: grog

VESSEL FORM: Compound bowl, with a collar separating the upper and lower panels (Figure 37)

RIM AND LIP FORM: Direct rim and a rounded lip

CORE COLOR: B (fired and cooled in a reducing environment)

INTERIOR SURFACE COLOR: very dark gray (10YR 3/1)

EXTERIOR SURFACE COLOR: very dark grayish-brown (10YR 3/2); fire clouding

WALL THICKNESS (RIM, BODY, AND BASE IN MM): 5.2 mm, rim

INTERIOR SURFACE TREATMENT: smoothed

EXTERIOR SURFACE TREATMENT: burnished
HEIGHT (IN CM): 8.8

ORIFICE DIAMETER (IN CM): 14.0

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): 15.0

BASE DIAMETER (IN CM): 8.0

ESTIMATED VOLUME (IN LITERS): 0.99 liters

DECORATION: The lower rim panel has an idiosyncratic engraved motif consisting of triangles and ovals on either side of a centrally-placed meandering scroll (Figure 37). The triangles (nine in number) have negative ovals or circles within them, outlined by cross-hatching or hatching, while the seven circles or ovals have small negative ovals or circles (five in number), are filled with cross-hatched engraved lines (two in number), or are plain (one such oval).

TYPE: Unidentified fine ware vessel

Figure 37. Unidentified engraved compound bowl, Rumsey site, Vessel 45a.

SITE NAME OR SITE NUMBER: G. W. Rumsey

VESSEL NO.: 45b

NON-PLASTICS: grog

VESSEL FORM: Jar with two small loop handles

RIM AND LIP FORM: Everted rim and a rounded lip

CORE COLOR: F (fired in a reducing environment and cooled in the open air)

INTERIOR SURFACE COLOR: dark reddish-brown (5YR 3/2)

EXTERIOR SURFACE COLOR: dark reddish-brown (5YR 3/2)

WALL THICKNESS (RIM, BODY, AND BASE IN MM): 3.9 mm, rim

INTERIOR SURFACE TREATMENT: smoothed on the rim

EXTERIOR SURFACE TREATMENT: burnished

HEIGHT (IN CM): 6.5
ORIFICE DIAMETER (IN CM): 9.8
DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): 6.5
BASE DIAMETER (IN CM): 5.9
ESTIMATED VOLUME (IN LITERS): 0.38 liters

DECORATION: There is a single horizontal engraved line at the rim-body juncture. Pendant from that line onto the body are two sets of three vertical engraved lines, two of the engraved lines in one set ending in hooked arms (Figure 38), the others simply extending towards the vessel base. The vessel is also slipped on both interior and exterior surfaces. Similar red-slipped and engraved vessels have been documented from Late McCurtain phase sites on the Red River (Perino 1983:Figure 7a-c) and from unknown Caddo sites in southwestern Arkansas (Bonds 2006:Figure 395).

TYPE: Unidentified engraved fine ware vessel

Figure 38. Engraved jar of unknown type, Rumsey site, Vessel 45b.

SITE NAME OR SITE NUMBER: G. W. Rumsey
VESSEL NO.: 46
NON-PLASTICS: grog
VESSEL FORM: Deep bowl
RIM AND LIP FORM: Direct rim and a rounded lip
CORE COLOR: F (fired in a reducing environment and cooled in the open air)
INTERIOR SURFACE COLOR: brown (7.5YR 5/4)
EXTERIOR SURFACE COLOR: brown (7.5YR 5/4)
WALL THICKNESS (RIM, BODY, AND BASE IN MM): 4.9 mm, rim
INTERIOR SURFACE TREATMENT: smoothed on the rim
EXTERIOR SURFACE TREATMENT: none
HEIGHT (IN CM): 11.0
ORIFICE DIAMETER (IN CM): 12.5
DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): N/A

BASE DIAMETER (IN CM): 8.3

ESTIMATED VOLUME (IN LITERS): 1.1 liters

DECORATION: The vessel body has six diagonal to curvilinear incised panels filled with tool punctates. The top of the panels is defined by a single horizontal incised line that encircles the vessel (Figure 39). Within each of the panels is a single small oval to semi-circular incised zone filled with punctations.

TYPE: Unidentified utility ware vessel

Figure 39. Incised-punctated deep bowl, Rumsey site, Vessel 46.

SITE NAME OR SITE NUMBER: G. W. Rumsey

VESSEL NO.: 47

NON-PLASTICS: grog

VESSEL FORM: Jar with four strap handles and four rim peaks (Figure 40)

RIM AND LIP FORM: Everted rim and a rounded, exterior folded lip

CORE COLOR: G (fired in a reducing environment and cooled in the open air)

INTERIOR SURFACE COLOR: very dark gray (10YR 3/1); fire clouding on rim, body, and base

EXTERIOR SURFACE COLOR: pale brown (10YR 6/3); fire clouding on the body and base

WALL THICKNESS (RIM, BODY, AND BASE IN MM): 10.0 mm, rim

INTERIOR SURFACE TREATMENT: smoothed

EXTERIOR SURFACE TREATMENT: none

HEIGHT (IN CM): 15.5

ORIFICE DIAMETER (IN CM): 18.4

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): 16.5
BASE DIAMETER (IN CM): 8.3

ESTIMATED VOLUME (IN LITERS): 1.7 liters

DECORATION: The rim is covered with tool punctations, and there is a horizontal appliqued fillet at the rim-body juncture; the strap handles are decorated with three vertical pinched rows. On the body are four sets of conjoined appliqued fillet semi-circles and triangles, each of which has a centrally-placed appliqued circle. Within each circle is a large appliqued node covered with small tool punctates. Areas on the body between the appliqued fillet elements have opposed, diagonal, and vertical incised lines (Figure 40).

TYPE: Harleton Appliqued

**Vessel Recordation Forms, Tuck Carpenter Site (41CP5)**

The Robert L. Turner, Jr. collection has 200 vessels from the excavations at the Tuck Carpenter site, approximately 50% of the total number of vessels recovered from the excavation of 45 Titus phase burials (Turner 1978). By vessel form, Turner’s collection includes carinated bowls (42.5%), jars (29.5%), compound bowls (11.5%), bottles (9.5%), bowls (6.5%), and one chalice (0.5%), a very rare vessel form in the Northeast Texas region.

The fine wares (69% of the present sample) are represented by several varieties of Ripley Engraved carinated bowls, compound bowls, jars, and bowls (n=96), as well as Johns Engraved bowls (n=1), Simms Engraved carinated bowls (n=1), a Turner Engraved chalice, and Turner Engraved compound and carinated bowls (n=7). There are also Wilder Engraved bottles (n=8), including var. Wilder, Wilder Engraved jars (n=3), a stacked Wilder Engraved-Ripley Engraved bottle, and Ripley Engraved bottles (n=7), including var. Ripley. Hood Engraved effigy bowls (n=2), and an unidentified engraved effigy bowl (n=1) are also among the vessels from the Tuck Carpenter site. Finally, there are a few engraved bowls, carinated bowls, compound bowls, and jars of unidentified types (n=11), among them two red-slipped bottles.

The various utility wares (26%) include jars of Cass Appliqued (n=3), La Rue Neck Banded (n=3), Bullard Brushed (n=4), Harleton Appliqued (n=6), McKinney Plain (n=1), cf. Pease Brushed-Incised (n=1), Maydelle Incised (n=3), and Mockingbird Punctated (n=4). Moore Noded bowls (n=2) are another utility ware at the Tuck Carpenter site. Given the current status of classification of Caddo utility wares in East Texas (cf. Suhm and Jelks 1962), there are jars and bowls of unidentified types with incised-brushed (n=1), incised-punctated-brushed (n=1), incised (n=2), incised-punctated (n=8), incised-punctated-appliqued (n=3), appliqued (n=1), brushed-punctated (n=2), brushed-punctated-incised (n=1), brushed (n=2), brushed-appliqued (n=2), brushed-punctated-appliqued (n=1), and punctated (n=1) decorative elements.

Plain ware vessels (5%) are also present in the mortuary ceramic assemblage at the Tuck Carpenter site. They include jars (n=2), bottles (n=1), carinated bowls (n=4), effigy bowls (n=1), and bowls (n=2).

**SITE NAME OR SITE NUMBER:** Tuck Carpenter

**VESSEL NO.:** Burial 1, Pot 2
NON-PLASTICS: grog and hematite

VESSEL FORM: Jar with a short rim (Figure 58)

RIM AND LIP FORM: Everted rim and a rounded lip

CORE COLOR: G (fired in a reducing environment and cooled in the open air)

INTERIOR SURFACE COLOR: black (10YR 2/1); organic residue on the rim and body

EXTERIOR SURFACE COLOR: light yellowish-brown (10YR 6/4); organic residue on the rim and body

WALL THICKNESS (RIM, BODY, AND BASE IN MM): 6.7 mm, rim

INTERIOR SURFACE TREATMENT: smoothed

EXTERIOR SURFACE TREATMENT: none

HEIGHT (IN CM): 20.5

ORIFICE DIAMETER (IN CM): 16.0

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): 15.6

BASE DIAMETER (IN CM): 8.0

ESTIMATED VOLUME (IN LITERS): 2.9 liters

DECORATION: There are three rows of tool punctations on the rim, one below the lip, one midway down the rim, and the third at the rim-body juncture. The body has 24 vertical appliqued ridges that extend from near the rim-body juncture to the vessel base (Figure 58).

TYPE: Cass Appliqued

Figure 58. Cass Appliqued jar, Tuck Carpenter site, Burial 1, Pot 2.

SITE NAME OR SITE NUMBER: Tuck Carpenter

VESSEL NO.: Burial 1, Pot 4

NON-PLASTICS: grog
VESSEL FORM: Carinated bowl

RIM AND LIP FORM: Direct rim and a rounded, exterior folded lip

CORE COLOR: G (fired in a reducing environment and cooled in the open air)

INTERIOR SURFACE COLOR: very dark gray (10YR 3/1)

EXTERIOR SURFACE COLOR: pale brown (10YR 6/3)

WALL THICKNESS (RIM, BODY, AND BASE IN MM): 7.8 mm, rim; 7.7 mm, body; 11.0 mm, base

INTERIOR SURFACE TREATMENT: smoothed

EXTERIOR SURFACE TREATMENT: burnished

HEIGHT (IN CM): N/A

ORIFICE DIAMETER (IN CM): 32.0

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): N/A

BASE DIAMETER (IN CM): 9.1

ESTIMATED VOLUME (IN LITERS): N/A

DECORATION: The rim panel has an engraved scroll motif (Ripley Engraved, var. Gandy) repeated four times. The upper and lower scroll lines have engraved pendant triangles, as with Ripley Engraved, var. McKinney, along with central engraved diamond elements (Figure 59).

TYPE: Ripley Engraved, var. unspecified

Figure 59. Ripley Engraved, var. unspecified carinated bowl rim sherds, Burial 1, Pot 4, Tuck Carpenter site.

SITE NAME OR SITE NUMBER: Tuck Carpenter

VESSEL NO.: Burial 1, Pot 6

NON-PLASTICS: grog and hematite

VESSEL FORM: Carinated bowl
RIM AND LIP FORM: Direct rim and a rounded, exterior folded lip

CORE COLOR: F (fired in a reducing environment and cooled in the open air)

INTERIOR SURFACE COLOR: light yellowish-brown (10YR 6/4)

EXTERIOR SURFACE COLOR: light yellowish-brown (10YR 6/4); fire clouding on the body

WALL THICKNESS (RIM, BODY, AND BASE IN MM): N/A

INTERIOR SURFACE TREATMENT: burnished

EXTERIOR SURFACE TREATMENT: smoothed

HEIGHT (IN CM): 11.7

ORIFICE DIAMETER (IN CM): 29.0

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): 29.0

BASE DIAMETER (IN CM): 7.5

ESTIMATED VOLUME (IN LITERS): 2.0 liters

DECORATION: The rim panel has an engraved scroll and circle motif repeated four times around the vessel. The central engraved circle has a smaller circle-in-cross element within it (Figure 60). There is an interior engraved line at the carination. A white clay pigment has also been rubbed in the exterior engraved lines.

TYPE: Ripley Engraved, var. Galt

Figure 60. Ripley Engraved, var. Galt carinated bowl, Burial 1, Pot 6, Tuck Carpenter site.

SITE NAME OR SITE NUMBER: Tuck Carpenter

VESSEL NO.: Burial 2, Pot 2

NON-PLASTICS: grog

VESSEL FORM: Compound bowl

RIM AND LIP FORM: Everted rim and a rounded, exterior folded lip
CORE COLOR: G (fired in a reducing environment and cooled in the open air)

INTERIOR SURFACE COLOR: dark gray (10YR 4/1)

EXTERIOR SURFACE COLOR: pale brown (10YR 6/3); organic residue on the upper and lower rim panels

WALL THICKNESS (RIM, BODY, AND BASE IN MM): 9.4 mm, body

INTERIOR SURFACE TREATMENT: smoothed

EXTERIOR SURFACE TREATMENT: burnished

HEIGHT (IN CM): 12.4+

ORIFICE DIAMETER (IN CM): 43.0

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): N/A

BASE DIAMETER (IN CM): N/A

ESTIMATED VOLUME (IN LITERS): 4.2+ liters

DECORATION: The upper rim panel has three widely-spaced horizontal engraved lines. The lower rim panel has an engraved circle and nested triangle motif (Thurmond 1990:Figure 6e) repeated two times around the vessel. The central engraved circle has a small cross-in-circle element within it (Figure 61), while the nested triangle motif has a central oval element within it that also contains a single small dash or spur.

TYPE: Ripley Engraved, *var. Cash*

Figure 61. Ripley Engraved, *var. Cash* compound bowl, Burial 2, Pot 2, Tuck Carpenter site.

SITE NAME OR SITE NUMBER: Tuck Carpenter

VESSEL NO.: Burial 2, Pot 3

NON-PLASTICS: grog

VESSEL FORM: Jar

RIM AND LIP FORM: Everted rim and a rounded lip

CORE COLOR: F (fired in a reducing environment and cooled in the open air)
INTERIOR SURFACE COLOR: light yellowish-brown (10YR 6/4); organic residue and fire clouding

EXTERIOR SURFACE COLOR: light yellowish-brown (10YR 6/4); organic residue and fire clouding

WALL THICKNESS (RIM, BODY, AND BASE IN MM): 8.2 mm, rim; 8.4 mm, body

INTERIOR SURFACE TREATMENT: smoothed

EXTERIOR SURFACE TREATMENT: smoothed on the lower body

HEIGHT (IN CM): 19.0

ORIFICE DIAMETER (IN CM): 15.6

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): 13.3

BASE DIAMETER (IN CM): 7.3

ESTIMATED VOLUME (IN LITERS): 2.7 liters

DECORATION: The rim has opposed diagonal incised panels each separated from the other by a single vertical incised line. There are rows of tool punctations under the lip and at the rim-body juncture. The vessel body has vertical brushing marks that extend to within 3.5 cm of the base (Figure 62).

TYPE: Unidentified brushed-incised-punctated utility ware

Figure 62. Incised-punctated-brushed jar, Burial 2, Pot 3, Tuck Carpenter site.

SITE NAME OR SITE NUMBER: Tuck Carpenter

VESSEL NO.: Burial 2, Pot 4

NON-PLASTICS: grog

VESSEL FORM: Jar

RIM AND LIP FORM: Everted rim and a flat lip

CORE COLOR: A (fired and cooled in an oxidizing environment)
INTERIOR SURFACE COLOR: light yellowish-brown (10YR 6/4); organic residue and fire clouding on the rim and body

EXTERIOR SURFACE COLOR: light yellowish-brown (10YR 6/4)

WALL THICKNESS (RIM, BODY, AND BASE IN MM): 7.3 mm, rim; 8.2 mm, body

INTERIOR SURFACE TREATMENT: smoothed

EXTERIOR SURFACE TREATMENT: smoothed on the body

HEIGHT (IN CM): 15.4

ORIFICE DIAMETER (IN CM): 15.8

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): 12.9

BASE DIAMETER (IN CM): 7.7

ESTIMATED VOLUME (IN LITERS): 1.5 liters

DECORATION: There are six vertical appliqued ridges on the rim and the vessel body. They are spaced so that the appliqued ridges on the rim occur above, but between, two appliqued ridges on the vessel body. The appliqued ridges on the body extend midway down the vessel body (Figure 63).

TYPE: Unidentified appliqued utility ware

Figure 63. Appliqued jar, Burial 2, Pot 4, Tuck Carpenter site.

SITE NAME OR SITE NUMBER: Tuck Carpenter

VESSEL NO.: Burial 2, Pot 5

NON-PLASTICS: grog and hematite

VESSEL FORM: Carinated bowl

RIM AND LIP FORM: Direct rim and a rounded, exterior folded lip

CORE COLOR: G (fired in a reducing environment and cooled in the open air)

INTERIOR SURFACE COLOR: very dark gray (10YR 3/1)

EXTERIOR SURFACE COLOR: brown (7.5YR 4/3)
WALL THICKNESS (RIM, BODY, AND BASE IN MM): 6.4 mm, rim; 6.3 mm, body

INTERIOR SURFACE TREATMENT: smoothed

EXTERIOR SURFACE TREATMENT: burnished

HEIGHT (IN CM): 18.3

ORIFICE DIAMETER (IN CM): 24.0

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): 24.2

BASE DIAMETER (IN CM): N/A

ESTIMATED VOLUME (IN LITERS): 3.9 liters

DECORATION: The rim panel has an engraved interlocking horizontal scroll motif repeated four times around the vessel. The middle and lower horizontal scroll lines have small triangular tick marks on them (Figure 64). A red clay pigment has been rubbed in the engraved lines.

TYPE: cf. Ripley Engraved, var. Pilgrims

**Figure 64. cf. Ripley Engraved, var. Pilgrims carinated bowl, Burial 2, Pot 5, Tuck Carpenter site.**

SITE NAME OR SITE NUMBER: Tuck Carpenter

VESSEL NO.: Burial 2, Pot 11

NON-PLASTICS: grog

VESSEL FORM: Bottle with a slightly flaring neck

RIM AND LIP FORM: Everted rim and a rounded lip

CORE COLOR: A (fired and cooled in an oxidizing environment)

INTERIOR SURFACE COLOR: reddish-brown (2.5YR 5/4)

EXTERIOR SURFACE COLOR: red (2.5YR 5/6)

WALL THICKNESS (RIM, BODY, AND BASE IN MM): 6.4 mm, neck
INTERIOR SURFACE TREATMENT: none

EXTERIOR SURFACE TREATMENT: burnished

HEIGHT (IN CM): 10.4

ORIFICE DIAMETER (IN CM): 3.8

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): 3.7; maximum body diameter is 7.3 cm

BASE DIAMETER (IN CM): 3.9

ESTIMATED VOLUME (IN LITERS): 0.16 liters

DECORATION: The vessel body has a curvilinear scroll with two arms that meet at a small excised circle; the scroll is repeated three times around the bottle. There are also expanded excised zones along each arm of the scrolls, opposite the central excised circle. Each arm of the scroll begins at a triangle with an excised negative oval within it (Figure 65). The exterior vessel surface is red-slipped.

TYPE: Wilder Engraved, var. Wilder

**Figure 65.** Wilder Engraved, *var. Wilder* bottle, Burial 2, Pot 11, Tuck Carpenter site.

SITE NAME OR SITE NUMBER: Tuck Carpenter

VESSEL NO.: Burial 3, Pot 2

NON-PLASTICS: grog

VESSEL FORM: Jar

RIM AND LIP FORM: Everted rim and a rounded lip

CORE COLOR: F (fired in a reducing environment and cooled in the open air)

INTERIOR SURFACE COLOR: light yellowish-brown (10YR 6/4)

EXTERIOR SURFACE COLOR: light yellowish-brown (10YR 6/4); fire clouding on the body

WALL THICKNESS (RIM, BODY, AND BASE IN MM): 6.3 mm, rim; 6.4 mm, body; 13.5 mm, base
INTERIOR SURFACE TREATMENT: smoothed

EXTERIOR SURFACE TREATMENT: smoothed

HEIGHT (IN CM): 11.5

ORIFICE DIAMETER (IN CM): 10.0

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): N/A

BASE DIAMETER (IN CM): 6.6

ESTIMATED VOLUME (IN LITERS): 0.69 liters

DECORATION: Plain (Figure 66)

TYPE: Unidentified plain ware vessel

**Figure 66. Plain jar, Burial 3, Pot 2, Tuck Carpenter site.**

SITE NAME OR SITE NUMBER: Tuck Carpenter

VESSEL NO.: Burial 3, Pot 3

NON-PLASTICS: grog

VESSEL FORM: Carinated bowl

RIM AND LIP FORM: Direct rim and a rounded, exterior folded lip

CORE COLOR: F (fired in a reducing environment and cooled in the open air)

INTERIOR SURFACE COLOR: pale brown (10YR 6/3); fire clouding on the body and base

EXTERIOR SURFACE COLOR: pale brown (10YR 6/3); fire clouding on the base

WALL THICKNESS (RIM, BODY, AND BASE IN MM): 6.0 mm, rim; 5.4 mm, body

INTERIOR SURFACE TREATMENT: smoothed

EXTERIOR SURFACE TREATMENT: burnished

HEIGHT (IN CM): 11.6
ORIFICE DIAMETER (IN CM): 27.9

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): 27.6

BASE DIAMETER (IN CM): 7.6

ESTIMATED VOLUME (IN LITERS): 1.9 liters

DECORATION: The rim panel has an engraved pendant triangle motif (Thurmond 1990:Figure 6a) repeated four times around the vessel. The central elements in the motif are alternating large central circles and diamonds. The central circles have a small internal circle with four excised rays (Figure 67), while the central diamonds have a single smaller diamond within them. A white clay pigment has been rubbed in the engraved lines.

TYPE: Ripley Engraved, var. McKinney

Figure 67. Ripley Engraved, var. McKinney carinated bowl, Burial 3, Pot 3, Tuck Carpenter site.

SITE NAME OR SITE NUMBER: Tuck Carpenter

VESSEL NO.: Burial 3, Pot 5

NON-PLASTICS: grog

VESSEL FORM: Carinated bowl

RIM AND LIP FORM: Direct rim and a rounded lip

CORE COLOR: B (fired and cooled in a reducing environment)

INTERIOR SURFACE COLOR: very dark gray (10YR 3/1)

EXTERIOR SURFACE COLOR: very dark gray (10YR 3/1)

WALL THICKNESS (RIM, BODY, AND BASE IN MM): 6.0 mm, rim

INTERIOR SURFACE TREATMENT: smoothed on the rim

EXTERIOR SURFACE TREATMENT: burnished

HEIGHT (IN CM): 6.8
ORIFICE DIAMETER (IN CM): 16.4

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): 14.2

BASE DIAMETER (IN CM): 7.0

ESTIMATED VOLUME (IN LITERS): 0.67 liters

DECORATION: The rim panel has an engraved scroll motif repeated four times around the vessel. Instead of upper and lower scroll fill zones, however, the upper and lower parts of the motif have engraved pendant triangles, as seen on Ripley Engraved, var. McKinney vessels (Figure 68). Each motif is divided by an excised bracket.

TYPE: Ripley Engraved, var. unspecified

Figure 68. Ripley Engraved, var. unspecified carinated bowl, Burial 3, Pot 5, Tuck Carpenter site.

SITE NAME OR SITE NUMBER: Tuck Carpenter

VESSEL NO.: Burial 3, Pot 6

NON-PLASTICS: grog

ORIFICE DIAMETER (IN CM): 25.0

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): 25.0

BASE DIAMETER (IN CM): N/A

ESTIMATED VOLUME (IN LITERS): 1.7+ liters

DECORATION: The upper rim panel has three widely-spaced horizontal engraved lines. The lower rim panel has an engraved scroll and circle motif repeated four times around the vessel (Figure 72). The large central circle element has a smaller circle within it that has five excised spurs along its margins; two of these smaller circles also have a very
small centrally-placed circle within them. The upper and lower scroll fill zones have negative ovals outlined with excised areas, and those negative ovals in the lower scroll fill zones also have small spurs or dashes along the open edge of the oval (cf. Thurmond 1990:Figure 6d-e, h). A white clay pigment has also been rubbed in the engraved lines.

INTERIOR SURFACE COLOR: dark gray (10YR 4/1)

EXTERIOR SURFACE COLOR: light yellowish-brown (10YR 6/4); organic residue on the rim and body; fire clouding on rim and body

WALL THICKNESS (RIM, BODY, AND BASE IN MM): 6.0 mm, rim

INTERIOR SURFACE TREATMENT: smoothed

EXTERIOR SURFACE TREATMENT: smoothed on the body

HEIGHT (IN CM): 27.6

ORIFICE DIAMETER (IN CM): 17.6

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): 15.0

BASE DIAMETER (IN CM): 10.4

ESTIMATED VOLUME (IN LITERS): 6.3 liters

DECORATION: The rim has horizontal brushing marks. The vessel body has 61 rows of closely-spaced vertical fingernail punctates that extend from the rim-body juncture to 6.0 cm above the base (Figure 78).

TYPE: cf. Pease Brushed-Incised

**Figure 78. cf. Pease Brushed-Incised jar, Burial 6, Pot 1, Tuck Carpenter site.**

SITE NAME OR SITE NUMBER: Tuck Carpenter

VESSEL NO.: Burial 6, Pot 2

NON-PLASTICS: grog

VESSEL FORM: Carinated bowl

RIM AND LIP FORM: Direct rim and a rounded, exterior folded lip

CORE COLOR: B (fired and cooled in a reducing environment)
INTERIOR SURFACE COLOR: very dark gray (10YR 3/1); fire clouding on the body

EXTERIOR SURFACE COLOR: very dark gray (10YR 3/1); fire clouding on the rim and body

WALL THICKNESS (RIM, BODY, AND BASE IN MM): 6.2 mm, body; 10.0 mm, base

INTERIOR SURFACE TREATMENT: smoothed

EXTERIOR SURFACE TREATMENT: burnished

HEIGHT (IN CM): 18.8

ORIFICE DIAMETER (IN CM): 28.0

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): 27.8

BASE DIAMETER (IN CM): 8.2

ESTIMATED VOLUME (IN LITERS): 4.7 liters

DECORATION: The rim panel has an engraved continuous scroll motif (Thurmond 1990:Figure 6f) repeated six times around the vessel (Figure 79). Upper and lower scroll fill zones include ovals and triangular excised areas. A white clay pigment has also been rubbed in the engraved lines.

TYPE: Ripley Engraved, var. Carpenter

Figure 79. Ripley Engraved, var. Carpenter carinated bowl rim sherd, Burial 6, Pot 2, Tuck Carpenter site.

SITE NAME OR SITE NUMBER: Tuck Carpenter

VESSEL NO.: Burial 6, Pot 3

NON-PLASTICS: grog

VESSEL FORM: Jar

RIM AND LIP FORM: Everted rim and a rounded lip

CORE COLOR: G (fired in a reducing environment and cooled in the open air)
INTERIOR SURFACE COLOR: very dark gray (10YR 3/1)

EXTERIOR SURFACE COLOR: light yellowish-brown (10YR 6/4); organic residue on the rim and body

WALL THICKNESS (RIM, BODY, AND BASE IN MM): 6.5 mm, rim

INTERIOR SURFACE TREATMENT: smoothed

EXTERIOR SURFACE TREATMENT: smoothed on the lower body

HEIGHT (IN CM): 21.7

ORIFICE DIAMETER (IN CM): 18.0

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): 17.7

BASE DIAMETER (IN CM): 11.0

ESTIMATED VOLUME (IN LITERS): 3.5 liters

DECORATION: The rim has randomly placed tool punctations that cover the rim surface, while the body has vertical brushing marks that extend to 4.5 cm above the vessel base (Figure 80).

TYPE: Unidentified brushed-punctated utility ware vessel

Figure 80. Brushed-punctated jar, Burial 6, Pot 3, Tuck Carpenter site.

SITE NAME OR SITE NUMBER: Tuck Carpenter

VESSEL NO.: Burial 6, Pot 5

NON-PLASTICS: grog

VESSEL FORM: Carinated bowl

RIM AND LIP FORM: Direct rim and a rounded, exterior folded lip

CORE COLOR: F (fired in a reducing environment and cooled in the open air)

INTERIOR SURFACE COLOR: light yellowish-brown (10YR 6/4); fire clouding on the rim, body, and base
EXTERIOR SURFACE COLOR: light yellowish-brown (10YR 6/4); fire clouding on the rim and body; organic residue on the rim

WALL THICKNESS (RIM, BODY, AND BASE IN MM): 6.7 mm, body

INTERIOR SURFACE TREATMENT: smoothed

EXTERIOR SURFACE TREATMENT: burnished

HEIGHT (IN CM): 14.0

ORIFICE DIAMETER (IN CM): 31.0

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): 31.0

BASE DIAMETER (IN CM): 9.0

ESTIMATED VOLUME (IN LITERS): 3.9 liters

DECORATION: The rim panel has an engraved continuous scroll motif repeated four times around the vessel. The scroll fill zones are curvilinear in shape, and two sets have large excised triangular areas and small negative ovals. The other two sets have curvilinear engraved lines, one with tick marks, as well as a small negative oval with a central spur element. There is also an interior engraved line at the carination and encircling the vessel base.

TYPE: cf. Ripley Engraved, var. Carpenter

SITE NAME OR SITE NUMBER: Tuck Carpenter

VESSEL NO.: Burial 6, Pot 7

NON-PLASTICS: grog

VESSEL FORM: Compound bowl; there is at least one suspension hole on the upper rim panel. The vessel is glauconite-stained on both interior and exterior vessel surfaces (Figure 81).

RIM AND LIP FORM: Everted rim and a rounded lip

CORE COLOR: B (fired and cooled in a reducing environment)

INTERIOR SURFACE COLOR: very dark gray (10YR 3/1)

EXTERIOR SURFACE COLOR: very dark gray (10YR 3/1)
WALL THICKNESS (RIM, BODY, AND BASE IN MM): 6.2 mm, rim

INTERIOR SURFACE TREATMENT: burnished

EXTERIOR SURFACE TREATMENT: burnished

HEIGHT (IN CM): 6.6

ORIFICE DIAMETER (IN CM): 9.8

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): 8.4

BASE DIAMETER (IN CM): 3.6

ESTIMATED VOLUME (IN LITERS): 0.51 liters

DECORATION: The upper rim panel has three broadly-spaced horizontal engraved lines. The lower rim panel has an engraved continuous scroll motif (Thurmond 1990:Figure 6f) repeated four times around the vessel (Figure 81). There is also a single engraved line on the interior of the vessel that encircles the base. The scroll fill zones include a single excised triangle. A red clay pigment has also been rubbed in the engraved lines.

TYPE: Ripley Engraved, var. Carpenter

ORIFICE DIAMETER (IN CM): 23.0
Diameter at bottom of rim or neck (in cm): 23.6

Base diameter (in cm): 6.8

Estimated volume (in liters): 1.3 liters

Decoration: The upper rim panel has two widely-spaced horizontal engraved lines. Between them are four sets of semi-circles that are nested under and across the rim peaks. Two of these semi-circles have a single internal engraved and open triangle, and the other two have a single internal semi-circle (Figure 85). Also on the upper rim panel between the rim peaks are alternating diagonal engraved lines on either side of excised pendant triangles, reminiscent of both Turner Engraved, var. Turner and var. Horton vessels, though these as currently defined occur on the lower rim panel on Turner Engraved vessels (see Figure 5a, c). The lower rim panel is plain on this vessel.

Type: Unidentified engraved fine ware

Figure 85. Engraved compound bowl of unidentified type, Burial 7, Pot 8, Tuck Carpenter site.

Site name or site number: Tuck Carpenter

Vessel no.: Burial 7, Pot 9

Non-plastics: bone and grog

Vessel form: Bowl, rattle

Rim and lip form: Inverted rim and a rounded lip

Core color: B (fired and cooled in a reducing environment)

Interior surface color: very dark gray (10YR 3/1)

Exterior surface color: very dark gray (10YR 3/1)

Wall thickness (rim, body, and base in mm): 5.3 mm, rim

Interior surface treatment: smoothed

Exterior surface treatment: none

Height (in cm): 7.9
ORIFICE DIAMETER (IN CM): 11.7

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): N/A

BASE DIAMETER (IN CM): 7.4

ESTIMATED VOLUME (IN LITERS): 0.37 liters

DECORATION: There are four to five rows of small appliqued nodes covering the rim and body of the vessel, as well as two opposing large appliqued nodes on opposite sides of the vessel (Figure 86).

TYPE: Moore Noded

Figure 86. Moore Noded bowl, Burial 7, Pot 9, Tuck Carpenter site.

SITE NAME OR SITE NUMBER: Tuck Carpenter

VESSEL NO.: Burial 7, Pot 10

NON-PLASTICS: grog

EXTERIOR SURFACE COLOR: light yellowish-brown (10YR 6/4)

WALL THICKNESS (RIM, BODY, AND BASE IN MM): 6.0 mm, rim; 6.2 mm, body

INTERIOR SURFACE TREATMENT: burnished

EXTERIOR SURFACE TREATMENT: burnished

HEIGHT (IN CM): 9.8

ORIFICE DIAMETER (IN CM): 15.1

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): 11.9

BASE DIAMETER (IN CM): 10.0

ESTIMATED VOLUME (IN LITERS): 0.89 liters

DECORATION: The rim has three widely-spaced horizontal engraved lines. The vessel body has four engraved panels defined by two vertical engraved lines, one on each side of the panels, and each panel has a central engraved circle (Figure 99). Within the central circle is a smaller excised circle. To either side of the central circle, but within the panel, are excised brackets with single engraved spurs.

TYPE: Unidentified engraved fine ware

**Figure 99. Engraved jar of unknown type, Burial 11, Pot 6, Tuck Carpenter site.**

SITE NAME OR SITE NUMBER: Tuck Carpenter

VESSEL NO.: Burial 11, Pot 8

NON-PLASTICS: grog and bone

VESSEL FORM: rattle bowl (Figure 100); there are pieces of glauconite within the vessel

RIM AND LIP FORM: inverted rim and a rounded lip

CORE COLOR: B (fired and cooled in a reducing environment)
INTERIOR SURFACE COLOR: very dark gray (10YR 3/1)

EXTERIOR SURFACE COLOR: very dark gray (10YR 3/1)

WALL THICKNESS (RIM, BODY, AND BASE IN MM): 6.1 mm, rim

INTERIOR SURFACE TREATMENT: smoothed

EXTERIOR SURFACE TREATMENT: none

HEIGHT (IN CM): 5.0

ORIFICE DIAMETER (IN CM): 7.0

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): N/A

BASE DIAMETER (IN CM): 6.0

ESTIMATED VOLUME (IN LITERS): 0.14 liters

DECORATION: There are appliqued nodes in three to four rows covering the entire exterior vessel surface (Figure 100). These surround two opposed larger (30 mm in diameter) appliqued nodes that would have held rattle stones.

TYPE: Moore Noded

Figure 100. Moore Noded bowl, Burial 11, Pot 8, Tuck Carpenter site. Note evidence of the attachment for the larger appliqued node, which subsequently fell off the vessel.

SITE NAME OR SITE NUMBER: Tuck Carpenter

VESSEL NO.: Burial 12, Pot 2

NON-PLASTICS: grog

VESSEL FORM: Carinated bowl

RIM AND LIP FORM: Direct rim and a rounded, exterior folded lip

CORE COLOR: F (fired in a reducing environment and cooled in the open air)

INTERIOR SURFACE COLOR: light yellowish-brown (10YR 6/4)

EXTERIOR SURFACE COLOR: light yellowish-brown (10YR 6/4)
WALL THICKNESS (RIM, BODY, AND BASE IN MM): 7.1 mm, rim

INTERIOR SURFACE TREATMENT: smoothed

EXTERIOR SURFACE TREATMENT: burnished

HEIGHT (IN CM): 12.5

ORIFICE DIAMETER (IN CM): 28.2

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): 28.0

BASE DIAMETER (IN CM): 8.0

ESTIMATED VOLUME (IN LITERS): 2.1 liters

DECORATION: The rim panel has an engraved scroll motif (Thurmond 1990:Figure 6b) repeated four times around the vessel. The scroll dividers include negative and backward-shaped S elements (Figure 101).

TYPE: Ripley Engraved, var. Gandy

Figure 101. Ripley Engraved, var. Gandy carinated bowl, Burial 12, Pot 2, Tuck Carpenter site.

SITE NAME OR SITE NUMBER: Tuck Carpenter

VESSEL NO.: Burial 12, Pot 5

NON-PLASTICS: grog and bone

VESSEL FORM: Carinated bowl

RIM AND LIP FORM: Direct rim and a rounded, exterior folded lip

CORE COLOR: B (fired and cooled in a reducing environment)

INTERIOR SURFACE COLOR: very dark gray (10YR 3/1)

EXTERIOR SURFACE COLOR: very dark gray (10YR 3/1)

WALL THICKNESS (RIM, BODY, AND BASE IN MM): 6.3 mm, rim

INTERIOR SURFACE TREATMENT: burnished
EXTERIOR SURFACE TREATMENT: burnished

HEIGHT (IN CM): 7.0

ORIFICE DIAMETER (IN CM): 15.2

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): 12.6

BASE DIAMETER (IN CM): 6.7

ESTIMATED VOLUME (IN LITERS): 0.64 liters

DECORATION: The rim panel has an engraved scroll motif repeated four times around the vessel. The scrolls are divided by excised and cross-hatched engraved brackets, while the scroll fill zones have negative ovals and rectangles with excised triangles and tick marks, or are cross-hatched (Figure 102). There is an interior engraved line at the vessel carination.

TYPE: Ripley Engraved, var. unspecified, but resembles var. Gandy

Figure 102. Ripley Engraved, var. unspecified carinated bowl, Burial 12, Pot 5, Tuck Carpenter site.

SITE NAME OR SITE NUMBER: Tuck Carpenter

VESSEL NO.: Burial 12, Pot 6

NON-PLASTICS: grog

VESSEL FORM: Bottle with a slightly flaring neck, and a square body with four body peaks (Figure 103)

RIM AND LIP FORM: Direct rim and a rounded lip

CORE COLOR: B (fired and cooled in a reducing environment)

INTERIOR SURFACE COLOR: black (10YR 2/1)

EXTERIOR SURFACE COLOR: black (10YR 2/1)

WALL THICKNESS (RIM, BODY, AND BASE IN MM): 5.5 mm, neck

INTERIOR SURFACE TREATMENT: smoothed on the upper neck
EXTERIOR SURFACE TREATMENT: burnished

HEIGHT (IN CM): 14.5

ORIFICE DIAMETER (IN CM): 4.5

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): 4.9; 9.1 maximum body diameter

BASE DIAMETER (IN CM): 6.9

ESTIMATED VOLUME (IN LITERS): 0.40 liters

DECORATION: The vessel body has alternating concentric circle (centered on the body peaks) and diamond elements repeated four times each; these elements are centered over the body peaks (Figure 103). The engraved diamonds have a small central circle within them, while the concentric circles are comprised of three engraved circles, one of which has triangular tick marks. Above each set of concentric circles is a curvilinear fill zone with two negative ovals and hatched lines; one of the negative ovals has a small engraved spur within it. A red clay pigment has been rubbed in the engraved lines.

TYPE: Ripley Engraved, var. Ripley

DECORATION: The rim has an engraved pendant triangle motif (Thurmond 1990:Figure 6a) repeated four times around the vessel. The central element is an engraved circle, and each of the four large circles have a small central negative circle with four excised rays (Figure 121). There is also an interior horizontal engraved line at the vessel carination.

TYPE: Ripley Engraved, var. McKinney

Figure 121. Ripley Engraved, var. McKinney carinated bowl, Burial 19, Pot 4, Tuck Carpenter site.

SITE NAME OR SITE NUMBER: Tuck Carpenter

VESSEL NO.: Burial 19, Pot 10a

NON-PLASTICS: grog

VESSEL FORM: Carinated bowl

RIM AND LIP FORM: Direct rim and a rounded, exterior folded lip

CORE COLOR: G (fired in a reducing environment and cooled in the open air)

INTERIOR SURFACE COLOR: very dark gray (10YR 3/1)

EXTERIOR SURFACE COLOR: very dark gray (10YR 3/1)

WALL THICKNESS (RIM, BODY, AND BASE IN MM): 5.9 mm, rim; 6.6 mm, body

INTERIOR SURFACE TREATMENT: smoothed

EXTERIOR SURFACE TREATMENT: burnished

HEIGHT (IN CM): N/A

ORIFICE DIAMETER (IN CM): 20.0

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): 19.8

BASE DIAMETER (IN CM): N/A

ESTIMATED VOLUME (IN LITERS): N/A
DECORATION: The rim panel has an engraved scroll motif repeated four times around the rim. Scroll dividers are excised brackets, and the scroll fill zones include a narrow, horizontal, excised area, and a single excised pendant triangle.

TYPE: Ripley Engraved, var. unspecified

SITE NAME OR SITE NUMBER: Tuck Carpenter

VESSEL NO.: Burial 19, Pot 10b

NON-PLASTICS: grog

VESSEL FORM: Bottle

RIM AND LIP FORM: missing

CORE COLOR: B (fired and cooled in a reducing environment)

INTERIOR SURFACE COLOR: dark gray (10YR 4/1)

EXTERIOR SURFACE COLOR: very dark gray (10YR 3/1)

WALL THICKNESS (RIM, BODY, AND BASE IN MM): 6.9 mm, rim

INTERIOR SURFACE TREATMENT: none

EXTERIOR SURFACE TREATMENT: burnished

HEIGHT (IN CM): N/A

ORIFICE DIAMETER (IN CM): N/A

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): N/A

BASE DIAMETER (IN CM): N/A

ESTIMATED VOLUME (IN LITERS): N/A

DECORATION: The vessel body has engraved curvilinear scrolls with two arms that meet at a small cross-hatched circle; the scrolls are repeated four times. There are expanded cross-hatched areas on each scroll arm that are opposite the central circle (Figure 122). The scrolls themselves begin from upper and lower hatched engraved triangles.

TYPE: Wilder Engraved, var. Wilder
Figure 122. Wilder Engraved, *var. Wilder* bottle, Burial 19, Pot 10b, Tuck Carpenter site.

SITE NAME OR SITE NUMBER: Tuck Carpenter

VESSEL NO.: Burial 19, Pot 11

NON-PLASTICS: grog

VESSEL FORM: Bottle with a straight to flaring neck and four body peaks (Figure 123)

RIM AND LIP FORM: Direct rim and a rounded, exterior folded lip

CORE COLOR: F (fired in a reducing environment and cooled in the open air)

INTERIOR SURFACE COLOR: pale brown (10YR 6/3)

EXTERIOR SURFACE COLOR: grayish-brown (10YR 5/2); fire clouding on the rim, body, and base

WALL THICKNESS (RIM, BODY, AND BASE IN MM): 4.0 mm, neck

INTERIOR SURFACE TREATMENT: smoothed at the top of the neck

EXTERIOR SURFACE TREATMENT: burnished

HEIGHT (IN CM): 19.2

ORIFICE DIAMETER (IN CM): 4.5

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): 5.3; maximum body diameter is 14.5 cm

BASE DIAMETER (IN CM): 9.0

ESTIMATED VOLUME (IN LITERS): 0.69 liters

DECORATION: The vessel body has a curvilinear engraved scroll motif repeated four times whose two arms curve around each other and meet at a central and open engraved circle; in this case, the central engraved circle surrounds each of the four body peaks (Figure 123). The scrolls have widened areas on each arm that are filled with hatched lines. The upper and lower scroll arms begin at the apex of upper and lower triangular elements with cross-hatched corners. A red clay pigment has been rubbed in the engraved lines.
TYPE: Wilder Engraved, var. Wilder

HEIGHT (IN CM): 5.3

ORIFICE DIAMETER (IN CM): 11.6

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): 10.2

BASE DIAMETER (IN CM): 4.8

ESTIMATED VOLUME (IN LITERS): 0.37 liters

DECORATION: The rim panel has four sets of nested engraved triangle motifs around the vessel. Each set includes an excised triangle with a negative oval within it, as well as a large triangle nested above it; the apex of both points towards the vessel rim. There are also two small excised triangles with negative ovals pendant from the rim, and on either side of the larger nested triangle element (Figure 131). There are also interior engraved lines at the carination and around the base.

TYPE: Ripley Engraved, var. unspecified, but cf. var. Williams

BASE DIAMETER (IN CM): 5.7

ESTIMATED VOLUME (IN LITERS): 2.1 liters

DECORATION: The short rim has horizontal brushing marks, with two rows of tool punctations pushed through the brushing, one at the rim-body juncture. The vessel body has widely-spaced vertical incised lines that extend to within 4.0 cm of the base (Figure 143).

TYPE: Unidentified incised-punctated-brushed utility ware

**Figure 143. Incised-punctated-brushed jar, Burial 23, Pot 4, Tuck Carpenter site.**

SITE NAME OR SITE NUMBER: Tuck Carpenter

VESSEL NO.: Burial 23, Pot 5

NON-PLASTICS: grog

VESSEL FORM: Jar

RIM AND LIP FORM: Everted rim and a rounded lip

CORE COLOR: G (fired in a reducing environment and cooled in the open air)

INTERIOR SURFACE COLOR: black (10YR 2/1)

EXTERIOR SURFACE COLOR: light yellowish-brown (10YR 6/4); fire clouding on the rim, body, and the base

WALL THICKNESS (RIM, BODY, AND BASE IN MM): 6.5 mm, rim

INTERIOR SURFACE TREATMENT: smoothed

EXTERIOR SURFACE TREATMENT: smoothed

HEIGHT (IN CM): 13.0

ORIFICE DIAMETER (IN CM): 16.7

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): 12.9

BASE DIAMETER (IN CM): 8.5

ESTIMATED VOLUME (IN LITERS): 1.3 liters
DECORATION: The rim has two widely-spaced horizontal engraved lines. The vessel body has an engraved panel with a scroll and circle motif repeated four times around the vessel. The central circles have a single internal circle with seven triangular tick marks or excised rays on it. The upper and lower scroll fill zones are rectangular to curvilinear zones with triangular tick marks along their outer engraved lines (Figure 144).

TYPE: Ripley Engraved, var. Galt

**Figure 144. Ripley Engraved, var. Galt jar, Burial 23, Pot 5, Tuck Carpenter site.**

SITE NAME OR SITE NUMBER: Tuck Carpenter

VESSEL NO.: Burial 23, Pot 6

NON-PLASTICS: grog

VESSEL FORM: Compound bowl

RIM AND LIP FORM: Everted rim and a rounded, exterior folded lip

CORE COLOR: F (fired in a reducing environment and cooled in the open air)

INTERIOR SURFACE COLOR: light yellowish-brown (10YR 6/4); fire clouding on the body and base

EXTERIOR SURFACE COLOR: light yellowish-brown (10YR 6/4); fire clouding on the body and base

WALL THICKNESS (RIM, BODY, AND BASE IN MM): 4.3-5.0 mm, rim; 4.9 mm, body

INTERIOR SURFACE TREATMENT: smoothed

EXTERIOR SURFACE TREATMENT: burnished

HEIGHT (IN CM): 8.2

ORIFICE DIAMETER (IN CM): 14.0

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): 13.3

BASE DIAMETER (IN CM): 7.5

ESTIMATED VOLUME (IN LITERS): 0.92 liters
DECORATION: The upper rim panel has three widely-spaced horizontal engraved lines. The lower rim panel has an engraved scroll and circle motif (Thurmond 1990:Figure 6c) repeated four times around the vessel (Figure 145). A white clay pigment has also been rubbed in the engraved lines.

TYPE: Ripley Engraved, var. Galt

Figure 145. Ripley Engraved, var. Galt compound bowl, Burial 23, Pot 6, Tuck Carpenter site.

SITE NAME OR SITE NUMBER: Tuck Carpenter

VESSEL NO.: Burial 23, Pot 7

NON-PLASTICS: grog and bone

VESSEL FORM: Carinated bowl

RIM AND LIP FORM: Direct rim with a rounded, exterior folded lip

CORE COLOR: B (fired and cooled in a reducing environment)

INTERIOR SURFACE COLOR: grayish-brown (10YR 5/2)

EXTERIOR SURFACE COLOR: grayish-brown (10YR 5/2); fire clouding on the rim, body, and base

WALL THICKNESS (RIM, BODY, AND BASE IN MM): 6.5 mm, rim; 6.7 mm, body; 7.2 mm, base

INTERIOR SURFACE TREATMENT: smoothed

EXTERIOR SURFACE TREATMENT: burnished

HEIGHT (IN CM): 17.0

ORIFICE DIAMETER (IN CM): 21.0

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): 20.0

BASE DIAMETER (IN CM): N/A

ESTIMATED VOLUME (IN LITERS): 3.2 liters
DECORATION: The rim has an engraved motif that is repeated seven times around the vessel. The motif differs from the classic scroll in that the scroll itself contains both upper and lower circles instead of a simple scroll line (see Thurmond 1990:Figure 6b). These engraved circles have a small internal circle with excised rays. The scroll dividers are excised brackets with negative backward S-shaped elements (Figure 146). A white clay pigment has also been rubbed in the engraved lines.

TYPE: cf. Ripley Engraved, *var. Gandy*

EXTERIOR SURFACE TREATMENT: burnished

HEIGHT (IN CM): 7.5

ORIFICE DIAMETER (IN CM): 14.8

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): 14.6

BASE DIAMETER (IN CM): 7.3

ESTIMATED VOLUME (IN LITERS): 0.67 liters
DECORATION: The rim panel has an engraved bisected diamond motif repeated four times around the vessel (Figure 147). Three times the motif consists of one large bisected diamond and one small excised bisected diamond, as well as upper and lower excised triangles; the fourth time also has two bisected diamonds, but the large one only fills half the panel and has a single horizontal engraved line emerging from its apex. Each of the motifs are divided by a single vertical engraved line. The vessel also has an interior engraved line at the carination point.

NON-PLASTICS: grog and bone

VESSEL FORM: Jar with four rim peaks and four appliqued loop handles under the rim peaks (Figure 165)

RIM AND LIP FORM: Direct rim and a rounded, exterior folded lip

CORE COLOR: G (fired in a reducing environment and cooled in the open air)

INTERIOR SURFACE COLOR: dark grayish-brown (10YR 4/2)

EXTERIOR SURFACE COLOR: pale brown (10YR 6/3); fire clouding on the body and base; organic residue on the rim and body

WALL THICKNESS (RIM, BODY, AND BASE IN MM): 5.3 mm, rim

INTERIOR SURFACE TREATMENT: smoothed

EXTERIOR SURFACE TREATMENT: none

HEIGHT (IN CM): 16.0; 16.5 cm at the rim peaks

ORIFICE DIAMETER (IN CM): 16.4

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): 16.0
BASE DIAMETER (IN CM): 8.0

ESTIMATED VOLUME (IN LITERS): 2.3 liters

DECORATION: The rim and rim peaks have randomly placed tool punctates. The vessel body has four repeating and alternating sets of appliqued fillet chevrons (four or five appliqued lines) that extend to just above the vessel base (Figure 165).

TYPE: Harleton Appliqued

**Figure 165. Harleton Appliqued jar, Burial 27, Pot 5, Tuck Carpenter site.**

SITE NAME OR SITE NUMBER: Tuck Carpenter

VESSEL NO.: Burial 27, Pot 7

NON-PLASTICS: bone, hematite, and grog

VESSEL FORM: Jar with four rim peaks and two strap handles (Figure 166)

RIM AND LIP FORM: Everted rim and a rounded lip

CORE COLOR: G (fired in a reducing environment and cooled in the open air)

INTERIOR SURFACE COLOR: grayish-brown (10YR 5/2)

EXTERIOR SURFACE COLOR: pale brown (10YR 6/3); organic residue on the rim and body

WALL THICKNESS (RIM, BODY, AND BASE IN MM): 7.3 mm, rim; 6.9 mm, body; 7.0 mm, base

INTERIOR SURFACE TREATMENT: smoothed

EXTERIOR SURFACE TREATMENT: none

HEIGHT (IN CM): 11.4+

ORIFICE DIAMETER (IN CM): 14.0

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): N/A

BASE DIAMETER (IN CM): N/A

ESTIMATED VOLUME (IN LITERS): 0.96+ liters
DECORATION: The vessel rim has horizontal brushing marks; the strap handles are covered with punctations. The vessel body has four sets of appliqued fillet circles. Inside each circle is a smaller incised circle, a short horizontal appliqued fillet, and a small centrally-placed appliqued node. The large appliqued fillet circles were laid down atop a large incised circle, which is visible where the fillet has broken away from the vessel surface (Figure 166).

TYPE: Harleton Appliqued

Figure 166. Harleton Appliqued jar, Burial 27, Pot 7, Tuck Carpenter site.

SITE NAME OR SITE NUMBER: Tuck Carpenter

WALL THICKNESS (RIM, BODY, AND BASE IN MM): 6.2 mm, rim; 7.5 mm, body

INTERIOR SURFACE TREATMENT: smoothed

EXTERIOR SURFACE TREATMENT: smoothed on the body

HEIGHT (IN CM): 17.6

ORIFICE DIAMETER (IN CM): 16.0

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): 15.0

BASE DIAMETER (IN CM): 7.0

ESTIMATED VOLUME (IN LITERS): 2.5 liters

DECORATION: The rim has three rows of tool punctations, as well as appliqued lugs under each rim peak (Figure 184). The vessel body has four sets of vertical appliqued fillets, centered under the rim peaks and lugs, that extend to within 2.5 cm of the base.

TYPE: cf. Mockingbird Punctated

Figure 184. cf. Mockingbird Punctated jar, Burial 32, Pot 7, Tuck Carpenter site.
SITE NAME OR SITE NUMBER: Tuck Carpenter

VESSEL NO.: Burial 32, Pot 8

NON-PLASTICS: grog

VESSEL FORM: Carinated bowl

RIM AND LIP FORM: Direct rim and a flat lip

CORE COLOR: B (fired and cooled in a reducing environment)

INTERIOR SURFACE COLOR: very dark gray (10YR 3/1)

EXTERIOR SURFACE COLOR: very dark gray (10YR 3/1)

WALL THICKNESS (RIM, BODY, AND BASE IN MM): 5.3 mm, rim; 5.7 mm, body

INTERIOR SURFACE TREATMENT: smoothed

EXTERIOR SURFACE TREATMENT: smoothed

HEIGHT (IN CM): 6.0

ORIFICE DIAMETER (IN CM): 15.4

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): 13.0

BASE DIAMETER (IN CM): 5.7

ESTIMATED VOLUME (IN LITERS): 0.55 liters

DECORATION: The rim has an engraved scroll motif that is repeated twice around the vessel. The most distinctive part of the scroll motif on this vessel is that each of the scroll lines have large diamonds at their centers; the diamonds have a small excised circle and rays within them. The scrolls end in hooked arms that originate at the scroll and from the scroll fill zone. There are rows of pendant triangles on the rim that alternate with the scroll fill zones. A white clay pigment has been rubbed in the engraved lines. There is also a single horizontal engraved line at the carination point on the vessel interior.

TYPE: Ripley Engraved, var. unspecified or Taylor Engraved
SITE NAME OR SITE NUMBER: Tuck Carpenter

VESSEL NO.: Burial 32, Pot 9

NON-PLASTICS: grog

NON-PLASTICS: grog

VESSEL FORM: Bottle with a squat body and a slightly flaring neck (Figure 205)

RIM AND LIP FORM: Direct rim and a rounded lip

CORE COLOR: B (fired and cooled in a reducing environment)

INTERIOR SURFACE COLOR: dark grayish-brown (10YR 4/2)

EXTERIOR SURFACE COLOR: dark grayish-brown (10YR 4/2); fire clouding

WALL THICKNESS (RIM, BODY, AND BASE IN MM): none

INTERIOR SURFACE TREATMENT: burnished

EXTERIOR SURFACE TREATMENT: 12.8

HEIGHT (IN CM): 3.5

ORIFICE DIAMETER (IN CM):

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): 4.4; maximum body diameter is 13.2 cm

BASE DIAMETER (IN CM): 5.5

ESTIMATED VOLUME (IN LITERS): 0.28 liters

DECORATION: The vessel body has engraved curvilinear scrolls, that repeat four times, whose upper and lower arms circle around each other, but do not meet (hooked arm scrolls) (Figure 205). The two arms of the scroll have widened cross-hatched areas at the ends of the arms. The scrolls begin from the apex of upper and lower triangles, and there are also four rectangular cross-hatched zones above each hooked arm scroll motif. A red clay pigment has also been rubbed in the engraved lines.

TYPE: Wilder Engraved, var. unspecified

Figure 205. Wilder Engraved, var. unspecified bottle, Burial 36, Pot 11, Tuck Carpenter site.
SITE NAME OR SITE NUMBER: Tuck Carpenter

VESSEL NO.: Burial 37, Pot 1

NON-PLASTICS: grog and bone

VESSEL FORM: Effigy bowl with a tab tail; the effigy head is missing (Figure 206)

RIM AND LIP FORM: Direct rim and a rounded lip

CORE COLOR: B (fired and cooled in a reducing environment)

INTERIOR SURFACE COLOR: very dark gray (10YR 3/1)

EXTERIOR SURFACE COLOR: very dark grayish-brown (10YR 3/2)

WALL THICKNESS (RIM, BODY, AND BASE IN MM): 6.8 mm, rim; 7.2 mm, body; 9.1 mm, base

INTERIOR SURFACE TREATMENT: burnished

EXTERIOR SURFACE TREATMENT: burnished

HEIGHT (IN CM): 4.2

ORIFICE DIAMETER (IN CM): 12.0

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): N/A

BASE DIAMETER (IN CM): 5.5

ESTIMATED VOLUME (IN LITERS): 0.20 liters

DECORATION: There are two horizontal engraved lines on the rim (Figure 206). The lines dip down under both the tab tail and effigy head attachments.

TYPE: Hood Engraved

Figure 206. Hood Engraved effigy bowl, Burial 37, Pot 1, Tuck Carpenter site.

SITE NAME OR SITE NUMBER: Tuck Carpenter

VESSEL NO.: Burial 37, Pot 2
NON-PLASTICS: grog

VESSEL FORM: Carinated bowl

RIM AND LIP FORM: Direct rim and a rounded, exterior folded lip

CORE COLOR: G (fired in a reducing environment and cooled in the open air)

INTERIOR SURFACE COLOR: very dark gray (10YR 3/1)

EXTERIOR SURFACE COLOR: light yellowish-brown (10YR 6/4); fire clouding on the body and base

WALL THICKNESS (RIM, BODY, AND BASE IN MM): 6.4 mm, rim

INTERIOR SURFACE TREATMENT: smoothed

EXTERIOR SURFACE TREATMENT: burnished

HEIGHT (IN CM): 11.0

ORIFICE DIAMETER (IN CM): 20.4

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): 20.1

BASE DIAMETER (IN CM): 6.4

ESTIMATED VOLUME (IN LITERS): 1.3 liters

DECORATION: The rim has an engraved scroll and circle motif (Thurmond 1990:Figure 6c) repeated four times around the vessel. Each of the central circles has a smaller circle within it. The upper and lower scroll fill zones have a negative horizontal S-shaped element instead of ovals or negative ovals (Figure 207). A white clay pigment has also been rubbed in the engraved lines.

TYPE: Ripley Engraved, var. Galt

Figure 207. Ripley Engraved, var. Galt carinated bowl, Burial 37, Pot 2, Tuck Carpenter site.

SITE NAME OR SITE NUMBER: Tuck Carpenter

VESSEL NO.: Burial 37, Pot 4

NON-PLASTICS: bone and grog

ESTIMATED VOLUME (IN LITERS): 0.63 liters

DECORATION: The rim panel has an engraved bisected diamond motif repeated four times around the vessel. The bisected diamond is open, and there is a small cross-hatched bisected diamond within it, pendant from one of the two vertical engraved lines that separate the motifs from each other (Figure 224). There is also an interior horizontal engraved line at the vessel carination.

TYPE: Ripley Engraved, var. Reed

Figure 224. Ripley Engraved, var. Reed carinated bowl, Burial 42, Pot 7, Tuck Carpenter site.

SITE NAME OR SITE NUMBER: Tuck Carpenter

VESSEL NO.: Burial 43, Pot 1

NON-PLASTICS: grog

VESSEL FORM: Carinated bowl

RIM AND LIP FORM: Direct rim and a rounded, exterior folded lip

CORE COLOR: B (fired and cooled in a reducing environment)

INTERIOR SURFACE COLOR: black (10YR 2/1)

EXTERIOR SURFACE COLOR: black (10YR 2/1)

WALL THICKNESS (RIM, BODY, AND BASE IN MM): 5.7 mm, rim; 6.3 mm, body
INTERIOR SURFACE TREATMENT: smoothed

EXTERIOR SURFACE TREATMENT: burnished

HEIGHT (IN CM): 8.5

ORIFICE DIAMETER (IN CM): 16.0

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): 14.5

BASE DIAMETER (IN CM): 7.0

ESTIMATED VOLUME (IN LITERS): 0.82 liters

DECORATION: The rim panel has an engraved continuous scroll motif that is repeated five times around the vessel. The upper and lower scroll fill zones consist of hatched triangles (Figure 225). A white clay pigment has been rubbed in the engraved lines.

TYPE: Ripley Engraved, var. Carpenter

ORIFICE DIAMETER (IN CM): 10.2

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): 9.3

BASE DIAMETER (IN CM): 5.8

ESTIMATED VOLUME (IN LITERS): 0.36 liters

DECORATION: The rim panel has an engraved pendant triangle motif (Thurmond 1990:Figure 6a) repeated four times around the vessel. The central element of the motif is a small central engraved circle, rather than alternating circles and diamonds. A white clay pigment has also been rubbed in the engraved lines.

TYPE: Ripley Engraved, var. McKinney

Vessel Recordation Forms, Harold Williams (41CP10)

There are 21 Caddo ceramic vessels from the Harold Williams site in the Turner collections. Eight of them are likely from Middle Caddo period burials, while the others are from burials J, K, N, and S from the large Titus phase cemetery at the site (Turner 1997; Turner and Smith 2003).

The likely Middle Caddo vessels from the site include both fine wares, utility wares, and plain wares. The fine wares are represented by a red-slipped Spoonbill Engraved carinated bowl, a large bottle with an engraved rattlesnake motif, an engraved bowl, and an engraved-punctated Washington Square Paneled compound bowl. Among the utility wares is a very large rim punctated jar, a very large brushed jar, and a large cf. Pease Brushed-Incised jar. There is also one plain bowl.

The Titus phase ceramics in the collection are primarily from engraved fine wares (77%). These include Wilder Engraved jars (n=1) and bottles (n=2), several varieties of Ripley Engraved carinated bowls (n=3) and compound bowls (n=1), a Turner Engraved, var. Horton carinated bowl, a small engraved bottle, and a miniature engraved carinated bowl. The utility wares are represented by cf. Mockingbird Punctated jars (n=2), and a brushed-appliqued jar.

BASE DIAMETER (IN CM): 7.0
ESTIMATED VOLUME (IN LITERS): 1.0 liters

DECORATION: The rim has horizontal brushing marks. The rim has four sets of two appliqued nodes under each rim peak, and there are four sets of three vertical appliqued ridges that extend towards the vessel base (Figure 244).

TYPE: Unidentified brushed-appliqued vessel

**Figure 244. Brushed-appliqued jar, Burial K, Pot 5, Harold Williams site.**

SITE NAME OR SITE NUMBER: Harold Williams

VESSEL NO.: Burial K, Pot 7

NON-PLASTICS: grog

VESSEL FORM: Compound bowl with four rim peaks (Figure 245)

RIM AND LIP FORM: Direct rim with a rounded, exterior folded lip

CORE COLOR: B (fired and cooled in a reducing environment)

INTERIOR SURFACE COLOR: very dark grayish-brown (10YR 3/2)

EXTERIOR SURFACE COLOR: very dark grayish-brown (10YR 3/2)

WALL THICKNESS (RIM, BODY, AND BASE IN MM): 7.2 mm, rim

INTERIOR SURFACE TREATMENT: burnished

EXTERIOR SURFACE TREATMENT: burnished

HEIGHT (IN CM): 10.6; 12.0 cm at rim peaks

ORIFICE DIAMETER (IN CM): 19.0
DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): 18.4

BASE DIAMETER (IN CM): 7.3

ESTIMATED VOLUME (IN LITERS): 1.2 liters

DECORATION: The upper rim panel has three broadly-spaced horizontal engraved lines. The lower rim panel has 12 large cross-hatched engraved triangles separated by engraved dashes just above the vessel carination. On each of the rim peaks is a negative oval outlined by excising (Figure 245).

TYPE: Turner Engraved, var. Horton

Figure 245. Turner Engraved, var. Horton compound bowl, Burial K, Pot 7, Harold Williams site.

SITE NAME OR SITE NUMBER: Harold Williams

VESSEL NO.: Burial N, Pot 2

NON-PLASTICS: grog

VESSEL FORM: Compound bowl with four rim peaks

RIM AND LIP FORM: Everted rim and a rounded lip

CORE COLOR: B (fired and cooled in a reducing environment)

INTERIOR SURFACE COLOR: very dark gray (10YR 3/1)

EXTERIOR SURFACE COLOR: very dark gray (10YR 3/1)

WALL THICKNESS (RIM, BODY, AND BASE IN MM): 5.2 mm, rim; 4.9 mm, body

INTERIOR SURFACE TREATMENT: none

EXTERIOR SURFACE TREATMENT: burnished

HEIGHT (IN CM): 8.0

ORIFICE DIAMETER (IN CM): 13.5

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): 12.0

BASE DIAMETER (IN CM): 5.5
ESTIMATED VOLUME (IN LITERS): 0.86 liters

DECORATION: The upper rim panel has two horizontal engraved lines. Each of the four rim peaks has a negative oval-shaped area outlined by excising. The lower panel has a circle and nested triangle engraved motif (see Thurmond 1990:Figure 6e) repeated four times around the vessel. Each circle has a central engraved dot.

TYPE: Ripley Engraved, var. Cash

SITE NAME OR SITE NUMBER: Harold Williams

VESSEL NO.: Burial N, Pot 3

NON-PLASTICS: grog

VESSEL FORM: Jar

RIM AND LIP FORM: Everted rim and a rounded lip

CORE COLOR: G (fired in a reducing environment and cooled in the open air)

INTERIOR SURFACE COLOR: dark gray (10YR 4/1); fire clouding

EXTERIOR SURFACE COLOR: very pale brown (10YR 7/3); fire clouding

WALL THICKNESS (RIM, BODY, AND BASE IN MM): 7.0 mm, rim; 6.4 mm, body; 10.3 mm, base

INTERIOR SURFACE TREATMENT: smoothed

EXTERIOR SURFACE TREATMENT: none

HEIGHT (IN CM): 16.1

ORIFICE DIAMETER (IN CM): 12.0

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): 11.9

BASE DIAMETER (IN CM): 6.0

ESTIMATED VOLUME (IN LITERS): 1.7 liters

DECORATION: Three rows of tool punctates on the rim, one under the lip, a second midway down the rim, and the third at the rim-body juncture (Figure 246).
TYPE: cf. Mockingbird Punctated

Figure 246. cf. Mockingbird Punctated jar, Burial N, Pot 3, Harold Williams site.

SITE NAME OR SITE NUMBER: Harold Williams

VESSEL NO.: Burial S, Pot 1

NON-PLASTICS: grog

VESSEL FORM: Bottle

RIM AND LIP FORM: Direct rim and a rounded lip

CORE COLOR: F (fired in a reducing environment and cooled in the open air)

INTERIOR SURFACE COLOR: light yellowish-brown (10YR 6/4)

EXTERIOR SURFACE COLOR: light yellowish-brown (10YR 6/4); fire clouding on the body and rim

WALL THICKNESS (RIM, BODY, AND BASE IN MM): 5.4 mm, rim

INTERIOR SURFACE TREATMENT: none

EXTERIOR SURFACE TREATMENT: smoothed

HEIGHT (IN CM): 9.4

ORIFICE DIAMETER (IN CM): 3.5

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): 3.9; 5.8 cm maximum body diameter

BASE DIAMETER (IN CM): 4.9

ESTIMATED VOLUME (IN LITERS): 0.18 liters

DECORATION: The vessel body has three horizontal engraved lines on it, two closely-spaced lines under the neck and the other just above the vessel base (Figure 247).

TYPE: Unidentified fine ware bottle

Figure 247. Engraved bottle, Burial S, Pot 1, Harold Williams site.

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): 13.0

BASE DIAMETER (IN CM): 4.5

ESTIMATED VOLUME (IN LITERS): 1.1 liters
DECORATION: The upper rim panel has four horizontal engraved lines. The lower rim has three sets of horizontal interlocking scrolls and interconnecting brackets executed with tool punctates. There are also horizontal rows of tool punctates at the carination and at the juncture of the upper and lower rim panel (Figure 258).

TYPE: Washington Square Paneled (see Hart 1982)

Figure 258. Washington Square Paneled compound bowl, Harold Williams site, Area A.

Vessel Recordation Forms, Possibly Albert Hilton Farm (Harold Williams Site), Camp County

According to the notes of Robert L. Turner, Jr., three vessels in his collection may be from the Albert Hilton Farm (otherwise known as the Harold Williams site, 41CP10) but the provenience is not clear, except that it is known that they come from a Camp County, Texas Caddo site. The three vessels include a Ripley Engraved carinated bowl, a Turner Engraved compound bowl, and a Harleton Appliqued jar.

SITE NAME OR SITE NUMBER: possibly Albert Hilton Farm

VESSEL NO.: Camp Co. 6

NON-PLASTICS: grog

VESSEL FORM: Jar

RIM AND LIP FORM: Everted rim and a rounded lip

CORE COLOR: G (fired in a reducing environment and cooled in the open air)

INTERIOR SURFACE COLOR: very dark grayish-brown (10YR 3/2)

EXTERIOR SURFACE COLOR: yellowish-brown (10YR 5/4)

WALL THICKNESS (RIM, BODY, AND BASE IN MM): 6.0 mm, rim

INTERIOR SURFACE TREATMENT: smoothed

EXTERIOR SURFACE TREATMENT: none

HEIGHT (IN CM): 14.8

ORIFICE DIAMETER (IN CM): 12.8
DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): 10.9

BASE DIAMETER (IN CM): 7.0

ESTIMATED VOLUME (IN LITERS): 1.1 liters

DECORATION: The rim has three widely-spaced horizontal rows of tool punctations: under the lip, midway down the rim, and at the rim-body juncture. The body has six alternating appliqued fillet chevrons that extend to near the vessel base. Within the uppermost chevron in each set is a single large appliqued node (Figure 259).

TYPE: Harleton Appliqued

**Figure 259. Harleton Appliqued jar, possibly Albert Hilton Farm.**

SITE NAME OR SITE NUMBER: possibly Albert Hilton Farm

VESSEL NO.: Camp Co. 9

NON-PLASTICS: grog

VESSEL FORM: Compound bowl with four rim peaks (Figure 260)

RIM AND LIP FORM: Direct rim and a rounded, exterior folded lip

CORE COLOR: B (fired and cooled in a reducing environment)

INTERIOR SURFACE COLOR: very dark gray (10YR 3/1)

EXTERIOR SURFACE COLOR: very dark grayish-brown (10YR 3/2)

WALL THICKNESS (RIM, BODY, AND BASE IN MM): 7.0 mm, rim

INTERIOR SURFACE TREATMENT: burnished

EXTERIOR SURFACE TREATMENT: burnished

HEIGHT (IN CM): 7.6; 8.8 cm at the rim peaks

ORIFICE DIAMETER (IN CM): 19.2

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): 17.2

BASE DIAMETER (IN CM): 7.5
ESTIMATED VOLUME (IN LITERS): 1.2 liters

DECORATION: The upper rim panel is plain. The lower rim panel has a single horizontal engraved line at the top of the panel and a series (n=18) of large excised pendant triangles whose apex points towards the vessel body (Figure 260). A white clay pigment has been rubbed in the engraved lines.

TYPE: Turner Engraved, var. Turner

Figure 260. Turner Engraved, var. Turner compound bowl, possibly Albert Hilton Farm.

SITE NAME OR SITE NUMBER: possibly Albert Hilton Farm

VESSEL NO.: Camp Co. 10

NON-PLASTICS: grog

VESSEL FORM: Carinated bowl

RIM AND LIP FORM: Inverted rim and a rounded, exterior folded lip

CORE COLOR: B (fired and cooled in a reducing environment)

INTERIOR SURFACE COLOR: dark gray (10YR 4/1)

EXTERIOR SURFACE COLOR: very dark gray (10YR 3/1)

WALL THICKNESS (RIM, BODY, AND BASE IN MM): 5.4 mm, rim; 6.1 mm, body; 9.6 mm, base

INTERIOR SURFACE TREATMENT: smoothed

EXTERIOR SURFACE TREATMENT: burnished on the body

HEIGHT (IN CM): 6.0

ORIFICE DIAMETER (IN CM): 12.0

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): 12.8

BASE DIAMETER (IN CM): 7.0

ESTIMATED VOLUME (IN LITERS): 0.43 liters
DECORATION: The rim panel has an engraved scroll motif repeated four times around the vessel (Figure 261). The scroll dividers are engraved and spurred brackets, not S-shaped elements (cf. Thurmond 1990:Figure 6b). A Red clay pigment has been rubbed in the engraved lines.

TYPE: Ripley Engraved, var. Gandy

Figure 261. Ripley Engraved, var. Gandy carinated bowl, possibly Albert Hilton Farm.

Vessel Recordation Forms, B. J. Horton Site (41CP20)

A total of 30 Caddo vessels from the B. J. Horton site are in the Robert L. Turner collections, several more than were mentioned in Hunt et al.’s (1996:Appendix F) summary of the collection. The vessels are from Burial 1 (n=1), Burial 2 (n=8), Burial 4 (n=7), Burial 10 (n=10), and Burial 15 (n=4).

The documented vessels include both utility wares (n=7, 23.3%) and fine wares (n=20, 66.7%), as well as plain bowls (n=1), compound bowls (n=1), and jars (n=1). Among the utility wares are Karnack Brushed-Incised jars (n=1), cf. Pease Brushed-Incised jars (n=1), La Rue Neck Banded jars (n=1), Mockingbird Punctated jars (n=1), brushed-punctated jars (n=1), incised jars (n=1), and punctated jars (n=1). The fine wares include several decorated varieties of Ripley Engraved carinated bowls and compound bowls (n=9), Simms Engraved carinated bowls (n=1), Turner Engraved compound bowls (n=1), Hood Engraved effigy bowls (n=1), Wilder Engraved bottles (n=1), Ripley Engraved bottles (n=1), other engraved carinated bowls and compound bowls (n=4, including one that may be a Turner Engraved vessel), and unidentified engraved bottles (n=2).

SITE NAME OR SITE NUMBER: B. J. Horton

VESSEL NO.: Burial 2, Pot 6

NON-PLASTICS: grog and hematite

VESSEL FORM: Bowl; described as a “small cup-like pot” in Hunt et al. (1996:F-7)

RIM AND LIP FORM: Direct rim and a rounded lip

CORE COLOR: A (fired and cooled in an oxidizing environment)

INTERIOR SURFACE COLOR: light yellowish-brown (10YR 6/4)

EXTERIOR SURFACE COLOR: light yellowish-brown (10YR 6/4); fire clouding on the body

WALL THICKNESS (RIM, BODY, AND BASE IN MM): 4.9 mm, rim

INTERIOR SURFACE TREATMENT: smoothed

EXTERIOR SURFACE TREATMENT: smoothed

HEIGHT (IN CM): 9.4

ORIFICE DIAMETER (IN CM): 11.1

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): N/A

BASE DIAMETER (IN CM): 5.8

ESTIMATED VOLUME (IN LITERS): 0.42 liters

DECORATION: Plain (Figure 266)

TYPE: Unidentified plain ware vessel
Figure 266. Plain bowl, Burial 2, Pot 6, B. J. Horton site.

SITE NAME OR SITE NUMBER: B. J. Horton

VESSEL NO.: Burial 2, Pot 7

NON-PLASTICS: grog

VESSEL FORM: Compound bowl with four rim peaks (Figure 267)

RIM AND LIP FORM: Everted rim and a rounded, exterior folded lip

CORE COLOR: B (fired and cooled in a reducing environment)

INTERIOR SURFACE COLOR: very dark gray (10YR 3/1)

EXTERIOR SURFACE COLOR: very dark gray (10YR 3/1)

WALL THICKNESS (RIM, BODY, AND BASE IN MM): 6.5 mm, rim; 7.0 mm, body

INTERIOR SURFACE TREATMENT: smoothed on the rim

EXTERIOR SURFACE TREATMENT: burnished

HEIGHT (IN CM): 7.8; 9.0 cm at the rim peaks

ORIFICE DIAMETER (IN CM): 15.8

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): 13.0

BASE DIAMETER (IN CM): 7.1

ESTIMATED VOLUME (IN LITERS): 0.98 liters

DECORATION: Plain (Figure 267)

TYPE: Unidentified plain ware vessel

Figure 267. Plain compound bowl, Burial 2, Pot 7, B. J. Horton site.

SITE NAME OR SITE NUMBER: B. J. Horton

VESSEL NO.: Burial 2, Pot 9
NON-PLASTICS: grog and bone

VESSEL FORM: Globular carinated bowl

RIM AND LIP FORM: Direct rim and a rounded, exterior folded lip

CORE COLOR: G (fired in a reducing environment and cooled in the open air)

INTERIOR SURFACE COLOR: dark gray (10YR 4/1)

EXTERIOR SURFACE COLOR: very pale brown (10YR 7/3)

WALL THICKNESS (RIM, BODY, AND BASE IN MM): N/A

INTERIOR SURFACE TREATMENT: none

EXTERIOR SURFACE TREATMENT: smoothed

HEIGHT (IN CM): 18.4

ORIFICE DIAMETER (IN CM): 17.2

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): 17.8

BASE DIAMETER (IN CM): 9.9

ESTIMATED VOLUME (IN LITERS): 2.8 liters

DECORATION: The rim panel is plain, but the body has alternating engraved semi-circles repeated eight times around the vessel (Figure 268). The lower part of the vessel body has four broadly-spaced horizontal engraved lines, the last just above the vessel base.

TYPE: Unidentified engraved fine ware vessel

Figure 268. Engraved carinated bowl of unknown type, Burial 2, Pot 9, B. J. Horton site.

SITE NAME OR SITE NUMBER: B. J. Horton

VESSEL NO.: Burial 2, Pot 10

NON-PLASTICS: grog

VESSEL FORM: Four-cornered bottle with a square base (Figure 269)
RIM AND LIP FORM: Everted rim and a rounded lip

CORE COLOR: F (fired in a reducing environment and cooled in the open air)

INTERIOR SURFACE COLOR: light brownish-gray (10YR 6/2)

EXTERIOR SURFACE COLOR: light brownish-gray (10YR 6/2)

WALL THICKNESS (RIM, BODY, AND BASE IN MM): 7.2 mm, neck

INTERIOR SURFACE TREATMENT: none

EXTERIOR SURFACE TREATMENT: smoothed

HEIGHT (IN CM): 7.0; neck is 3.0 cm in height

ORIFICE DIAMETER (IN CM): 4.5

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): 4.1; maximum body diameter is 7.0 cm

BASE DIAMETER (IN CM): 5.5

ESTIMATED VOLUME (IN LITERS): 0.15 liters

DECORATION: The vessel body has poorly executed hatched triangles, hatched ladders, ovals, and semi-circles in no apparent repeated pattern on the vessel body, set between upper and lower horizontal engraved lines (Figure 269).

TYPE: Unidentified engraved fine ware vessel

Figure 269. Engraved bottle, Burial 2, Pot 10, B. J. Horton site.

SITE NAME OR SITE NUMBER: B. J. Horton

VESSEL NO.: Burial 4, Pot 3. In Hunt et al. (1996:F-11), Pot 3 is listed as a large brushed vessel, which this vessel is assuredly not.

NON-PLASTICS: grog

VESSEL FORM: Compound bowl with four rim peaks (Figure 270)

RIM AND LIP FORM: Everted rim and a rounded, exterior folded lip
CORE COLOR: G (fired in a reducing environment and cooled in the open air)

INTERIOR SURFACE COLOR: dark grayish-brown (10YR 4/2); organic residue on the body

EXTERIOR SURFACE COLOR: brown (10YR 4/3); organic residue on the body

WALL THICKNESS (RIM, BODY, AND BASE IN MM): 4.8 mm, rim; 4.7 mm, body; 7.5 mm, base

INTERIOR SURFACE TREATMENT: burnished

EXTERIOR SURFACE TREATMENT: burnished

HEIGHT (IN CM): 7.5

ORIFICE DIAMETER (IN CM): 13.0

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): 14.0

BASE DIAMETER (IN CM): 7.0

ESTIMATED VOLUME (IN LITERS): 0.74 liters

DECORATION: The upper rim panel is plain. There are teardrop-shaped excised areas in engraved ovals on the rim peaks (as seen on some Turner Engraved, var. Horton vessels). The lower rim panel has an engraved continuous scroll motif repeated eight times around the vessel (Figure 270).

TYPE: cf. Ripley Engraved, var. Carpenter

**Figure 270. cf. Ripley Engraved, var. Carpenter compound bowl, Burial 4, Pot 3, B. J. Horton site.**

SITE NAME OR SITE NUMBER: B. J. Horton

VESSEL NO.: Burial 4, Pot 4

NON-PLASTICS: grog

VESSEL FORM: Carinated bowl

RIM AND LIP FORM: Inverted rim and a rounded, exterior folded lip

CORE COLOR: F (fired in a reducing environment and cooled in the open air)
INTERIOR SURFACE COLOR: brown (10YR 5/3)

EXTERIOR SURFACE COLOR: brown (10YR 5/3)

WALL THICKNESS (RIM, BODY, AND BASE IN MM): 5.1 mm, rim; 6.3 mm, body

INTERIOR SURFACE TREATMENT: smoothed

EXTERIOR SURFACE TREATMENT: smoothed

HEIGHT (IN CM): 10.0

ORIFICE DIAMETER (IN CM): 20.0

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): 21.0

BASE DIAMETER (IN CM): N/A; rounded base

ESTIMATED VOLUME (IN LITERS): 1.8 liters

DECORATION: There are a series of eight engraved concentric semi-circles on the rim panel, and the outermost circle has short spur-like lines. The engraved concentric semi-circles are divided by cross-hatched brackets (Figure 271).

TYPE: Simms Engraved

**Figure 271. Simms Engraved carinated bowl, Burial 4, Pot 4, B. J. Horton site.**

SITE NAME OR SITE NUMBER: B. J. Horton

VESSEL NO.: Burial 4, Pot 5

NON-PLASTICS: grog

VESSEL FORM: Jar

RIM AND LIP FORM: missing

CORE COLOR: F (fired in a reducing environment and cooled in the open air)

INTERIOR SURFACE COLOR: yellowish-brown (10YR 5/4)

EXTERIOR SURFACE COLOR: brown (10YR 5/3); fire clouding on the vessel body
WALL THICKNESS (RIM, BODY, AND BASE IN MM): 7.6 mm, body

INTERIOR SURFACE TREATMENT: smoothed

EXTERIOR SURFACE TREATMENT: none

HEIGHT (IN CM): 6.0+

ORIFICE DIAMETER (IN CM): 11.5

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): N/A

BASE DIAMETER (IN CM): 7.0

ESTIMATED VOLUME (IN LITERS): 0.41+ liters

DECORATION: The vessel body has panels of vertical brushing divided by four vertical appliqued fillets. The fillets and brushing extend to within 2.0 cm of the base (Figure 272).

TYPE: cf. Pease Brushed-Incised

**Figure 272. cf. Pease Brushed-Incised jar, Burial 4, Pot 5, B. J. Horton site.**

SITE NAME OR SITE NUMBER: B. J. Horton

VESSEL NO.: Burial 4, Pot 6

NON-PLASTICS: grog

VESSEL FORM: Compound bowl with four rim peaks (Figure 273)

RIM AND LIP FORM: Everted rim and a rounded, exterior folded lip

CORE COLOR: H (fired in a reducing environment and cooled in the open air)

INTERIOR SURFACE COLOR: grayish-brown (10YR 5/2)

EXTERIOR SURFACE COLOR: dark grayish-brown (10YR 4/2)

WALL THICKNESS (RIM, BODY, AND BASE IN MM): 6.1 mm, rim

INTERIOR SURFACE TREATMENT: smoothed

EXTERIOR SURFACE TREATMENT: smoothed
HEIGHT (IN CM): 6.5; 9.0 cm height at the rim peaks

ORIFICE DIAMETER (IN CM): 19.0

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): 14.0

BASE DIAMETER (IN CM): 7.0

ESTIMATED VOLUME (IN LITERS): 1.4 liters

DECORATION: The upper rim panel is plain, but each rim peak has an engraved and excised oval with a single spur or short hooked arm, as seen on the circle and nested triangle (Thurmond 1990:Figure 6e) and alternating nested triangle (Thurmond 1990:Figure 6h) motifs defined for different varieties of Ripley Engraved. The lower rim panel has two widely-spaced horizontal engraved lines (Figure 273).

TYPE: Unidentified engraved fine ware vessel, cf. Turner Engraved, var. unspecified or var. Horton?

Figure 273. Engraved compound bowl of unknown type, Burial 4, Pot 6, B. J. Horton site.

SITE NAME OR SITE NUMBER: B. J. Horton

VESSEL NO.: Burial 4, Pot 8

NON-PLASTICS: grog

VESSEL FORM: Bottle

RIM AND LIP FORM: Direct rim and a rounded lip

CORE COLOR: G (fired in a reducing environment and cooled in the open air)

INTERIOR SURFACE COLOR: dark gray (10YR 4/1)

EXTERIOR SURFACE COLOR: yellowish-brown (10YR 5/4)

WALL THICKNESS (RIM, BODY, AND BASE IN MM): 6.5 mm, rim; 6.4 mm, body; 9.2 mm, base

INTERIOR SURFACE TREATMENT: none

EXTERIOR SURFACE TREATMENT: smoothed
HEIGHT (IN CM): N/A

ORIFICE DIAMETER (IN CM): N/A

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): N/A

BASE DIAMETER (IN CM): 8.5

ESTIMATED VOLUME (IN LITERS): N/A

DECORATION: The vessel body has arcing curvilinear scrolls that meet at a small central cross-hatched engraved circle. The scrolls also have widened cross-hatched areas to either side of the scrolls. The arms of the scrolls originate from upper and lower engraved triangles.

TYPE: Wilder Engraved, var. Wilder

SITE NAME OR SITE NUMBER: B. J. Horton

VESSEL NO.: Burial 4, Pot 11

NON-PLASTICS: grog

VESSEL FORM: Carinated bowl

RIM AND LIP FORM: Direct rim and a rounded, exterior folded lip

CORE COLOR: F (fired in a reducing environment and cooled in the open air)

INTERIOR SURFACE COLOR: brown (7.5YR 5/4)

EXTERIOR SURFACE COLOR: brown (7.5YR 5/4)

WALL THICKNESS (RIM, BODY, AND BASE IN MM): 5.3 mm, rim; 5.1 mm, body; 7.6 mm, base

INTERIOR SURFACE TREATMENT: smoothed

EXTERIOR SURFACE TREATMENT: burnished

HEIGHT (IN CM): N/A

ORIFICE DIAMETER (IN CM): 28.0
DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): N/A

BASE DIAMETER (IN CM): N/A

ESTIMATED VOLUME (IN LITERS): N/A

DECORATION: The rim panel has an engraved continuous scroll motif repeated four times around the vessel. This decoration differs from the archetypal motif (see Thurmond 1990:Figure 6f) in that the scroll fill zones lack engraved ovals and there are engraved pendant triangles on the outer line of the scroll fill zone. There is also a single interior engraved line at the vessel carination.

TYPE: cf. Ripley Engraved, var. Carpenter

SITE NAME OR SITE NUMBER: B. J. Horton

VESSEL NO.: Burial 4, Pot 12

NON-PLASTICS: grog

VESSEL FORM: Compound bowl

RIM AND LIP FORM: Direct rim and a rounded, exterior folded lip

CORE COLOR: F (fired in a reducing environment and cooled in the open air)

INTERIOR SURFACE COLOR: red (10R 3/6)

EXTERIOR SURFACE COLOR: red (10R 3/6)

WALL THICKNESS (RIM, BODY, AND BASE IN MM): 5.1 mm, rim; 5.8 mm, body; 8.9 mm, base

INTERIOR SURFACE TREATMENT: burnished

EXTERIOR SURFACE TREATMENT: burnished

HEIGHT (IN CM): 9.5

ORIFICE DIAMETER (IN CM): 16.0

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): 15.5

BASE DIAMETER (IN CM): 6.5
ESTIMATED VOLUME (IN LITERS): 1.2 liters

DECORATION: The upper rim panel has two widely-spaced horizontal engraved lines. The lower rim panel has upper and lower cross-hatched engraved pendant triangles, eight on the upper part of the panel, and four on the lower part (Figure 274). Between each of the pendant triangles on the upper part of the panel is either a short vertical or curvilinear engraved line that reaches only midway down the panel. The vessel has a red slip on both vessel surfaces, and a white pigment has been rubbed in the engraved lines.

TYPE: Turner Engraved, var. Turner

Figure 274. Turner Engraved, var. Turner compound bowl, Burial 4, Pot 12, B. J. Horton site.

SITE NAME OR SITE NUMBER: B. J. Horton

VESSEL NO.: Burial 10, Pot 1

NON-PLASTICS: grog

VESSEL FORM: jar with two small strap handles and two rim peaks (Figure 275)

RIM AND LIP FORM: Everted rim and a rounded lip

CORE COLOR: B (fired and cooled in a reducing environment)

INTERIOR SURFACE COLOR: black (10YR 2/1)

EXTERIOR SURFACE COLOR: very dark gray (10YR 3/1)

WALL THICKNESS (RIM, BODY, AND BASE IN MM): 5.4 mm, rim; 4.6 mm, body

INTERIOR SURFACE TREATMENT: smoothed

EXTERIOR SURFACE TREATMENT: none

HEIGHT (IN CM): 14.8

ORIFICE DIAMETER (IN CM): 13.0

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): 11.7

BASE DIAMETER (IN CM): 8.0

ESTIMATED VOLUME (IN LITERS): 1.2 liters
DECORATION: The rim has two rows of neck banding, while the vessel body has four widely-spaced horizontal rows of linear punctations in four panels defined by vertical appliqued ridges that extend from the rim-body juncture to just above the vessel base (Figure 275).

TYPE: La Rue Neck Banded

**Figure 275. La Rue Neck Banded jar, Burial 10, Pot 1, B. J. Horton site.**

SITE NAME OR SITE NUMBER: B. J. Horton

CORE COLOR: B (fired and cooled in a reducing environment)

INTERIOR SURFACE COLOR: dark gray (10YR 4/1)
EXTERIOR SURFACE COLOR: dark gray (10YR 4/1)

WALL THICKNESS (RIM, BODY, AND BASE IN MM): 5.2 mm, rim

INTERIOR SURFACE TREATMENT: smoothed

EXTERIOR SURFACE TREATMENT: smoothed

HEIGHT (IN CM): 10.4

ORIFICE DIAMETER (IN CM): 10.5

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): 10.5

BASE DIAMETER (IN CM): 6.0

ESTIMATED VOLUME (IN LITERS): 0.88 liters

DECORATION: There are four equally-spaced appliqued nodes on the vessel at the rim-body juncture (Figure 287).

TYPE: Unidentified appliqued utility ware vessel

Figure 287. Appliqued jar, Burial 15, Pot 4, B. J. Horton site.

SITE NAME OR SITE NUMBER: B. J. Horton

VESSEL NO.: Burial 15, Pot 5

NON-PLASTICS: grog

VESSEL FORM: Bowl

RIM AND LIP FORM: Direct rim and a rounded, exterior folded lip

CORE COLOR: F (fired in a reducing environment and cooled in the open air)

INTERIOR SURFACE COLOR: red (2.5YR 4/6)

EXTERIOR SURFACE COLOR: red (2.5YR 4/6)

WALL THICKNESS (RIM, BODY, AND BASE IN MM): 6.3 mm, rim; 8.3 mm, body; 10.3 mm, base

INTERIOR SURFACE TREATMENT: burnished
EXTERIOR SURFACE TREATMENT: burnished

HEIGHT (IN CM): 8.0

ORIFICE DIAMETER (IN CM): 14.0

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): N/A

BASE DIAMETER (IN CM): 8.8

ESTIMATED VOLUME (IN LITERS): 0.45 liters

DECORATION: The rim panel has an engraved bisected diamond motif (see Thurmond 1990:Figure 6j) repeated six times around the vessel. The bisected diamond motif includes two opposed triangles whose apexes touch; within each large triangle are smaller excised triangles (Figure 288). There are two horizontal engraved lines on the interior of the vessel. The vessel is also red-slipped on both interior and exterior vessel surfaces.

TYPE: Ripley Engraved, var. Reed

Figure 288. Ripley Engraved, var. Reed bowl, Burial 15, Pot 5, B. J. Horton site.

Vessel Recordation Forms, Pug Wilson Site (41CP76)

Both of the Titus phase vessels documented from the Pug Wilson site are from a single burial (Burial 2) excavated there some years ago; no other details are available on the archeological context of these materials. The two vessels include a Wilder Engraved, var. Wilder jar and a Ripley Engraved, var. McKinney carinated bowl.

SITE NAME OR SITE NUMBER: Pug Wilson

VESSEL NO.: Burial 2, Pot 1

NON-PLASTICS: grog

VESSEL FORM: Jar

RIM AND LIP FORM: Everted rim and a rounded, exterior folded lip

CORE COLOR: B (fired and cooled in a reducing environment)

INTERIOR SURFACE COLOR: black (10YR 2/1)

EXTERIOR SURFACE COLOR: black (10YR 2/1)
WALL THICKNESS (RIM, BODY, AND BASE IN MM): 10.0 mm, rim

INTERIOR SURFACE TREATMENT: smoothed

EXTERIOR SURFACE TREATMENT: burnished

HEIGHT (IN CM): 15.0

ORIFICE DIAMETER (IN CM): 14.9

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): 11.4

BASE DIAMETER (IN CM): 6.6

ESTIMATED VOLUME (IN LITERS): 1.34 liters

DECORATION: The rim has three widely-spaced horizontal engraved lines. The vessel body has a curvilinear scroll element repeated four times that is composed of arcing engraved lines that start from hatched and spurred triangles at the top and bottom of the body that meet at a central engraved circle. The central circle has either a small inner circle (two times) or engraved and hatched swastika elements (twice) (Figure 289). There are two broad zones of hatching along each scroll line, above the below the central engraved circle. A red clay pigment has been rubbed in the engraved lines.

TYPE: Wilder Engraved, var. Wilder

Figure 289. Wilder Engraved, var. Wilder jar, Burial 2, Pot 1, Pug Wilson site.

SITE NAME OR SITE NUMBER: Pug Wilson

VESSEL NO.: Burial 2, Pot 2

NON-PLASTICS: grog

VESSEL FORM: Carinated bowl

RIM AND LIP FORM: Direct rim and a rounded, exterior folded lip

CORE COLOR: G (fired in a reducing environment and cooled in the open air)

INTERIOR SURFACE COLOR: very dark gray (10YR 3/1)

EXTERIOR SURFACE COLOR: pale brown (10YR 6/3); fire clouding on the base
WALL THICKNESS (RIM, BODY, AND BASE IN MM): 6.8 mm, rim

INTERIOR SURFACE TREATMENT: smoothed

EXTERIOR SURFACE TREATMENT: burnished

HEIGHT (IN CM): 5.1

ORIFICE DIAMETER (IN CM): 11.3

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): 8.8

BASE DIAMETER (IN CM): 4.5

ESTIMATED VOLUME (IN LITERS): 0.35 liters

DECORATION: The rim panel has an engraved pendant triangle motif (Thurmond 1990:Figure 6a) with alternating circle or diamond central elements repeated twice around the vessel. Each circle has a smaller circle within it, while the two central diamond elements have smaller internal excised diamonds with tick marks or excised rays at each corner of the diamond (Figure 290).

TYPE: Ripley Engraved, var. McKinney

Figure 290. Ripley Engraved, var. McKinney carinated bowl, Burial 2, Pot 2, Pug Wilson site.

Vessels Recordation Forms, Cecil Guest Site (41CP78)

There are a total of 19 vessels in the Robert L. Turner, Jr. collection from the Cecil Guest site, including 18 vessels from four different burials (Burials 1-3 and 6). The 19 vessels include plain jars (n=2), plain carinated bowls (n=1), plain bowls (n=1), Maydelle Incised jars (n=1), La Rue Neck Banded jars (n=1), brushed jars (n=1), punctated-incised jars (n=1), an incised-punctated vessel with a Ripley scroll motif, Ripley Engraved carinated bowls and compound bowls (n=5), Taylor Engraved carinated bowls (n=1), other engraved carinated bowls and bowls (n=3), and engraved bottles (n=1) of unidentified type.

SITE NAME OR SITE NUMBER: Cecil Guest

VESSEL NO.: Burial 1, Camp Co. 65

NON-PLASTICS: grog

VESSEL FORM: Carinated bowl
RIM AND LIP FORM: Direct rim and a rounded lip

CORE COLOR: B (fired and cooled in a reducing environment)

INTERIOR SURFACE COLOR: grayish-brown (10YR 5/2)

EXTERIOR SURFACE COLOR: grayish-brown (10YR 5/2)

WALL THICKNESS (RIM, BODY, AND BASE IN MM): 5.5 mm, rim; 5.8 mm, body; 6.0 mm, base

INTERIOR SURFACE TREATMENT: smoothed

EXTERIOR SURFACE TREATMENT: smoothed

HEIGHT (IN CM): 7.5

ORIFICE DIAMETER (IN CM): 18.0

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): 18.0

BASE DIAMETER (IN CM): 6.5

ESTIMATED VOLUME (IN LITERS): 0.81 liters

DECORATION: The rim has six engraved bisected diamond panels (Thurmond 1990:Figure 6j) around the vessel. The panels are divided by sets of three vertical engraved lines, and the corners of each panel have cross-hatched triangles.

TYPE: Ripley Engraved, var. Reed

SITE NAME OR SITE NUMBER: Cecil Guest

**DECORATION:** The rim has five rows of tool punctations, and a single horizontal incised line at the rim-body juncture. The vessel body is divided into four panels with vertical appliqued fillets that extend to within 4.0 cm of the base. The panels are filled with a series of vertical to diagonal incised lines (Figure 304).
TYPE: Unidentified utility ware vessel

Figure 304. Punctated-incised-appliqued jar rim and body sherds, Cecil Guest site.

Vessel Recordation Form, Boyd Farm, Camp County

There is only a single small engraved carinated bowl of unidentified type from the Boyd Farm site.

SITE NAME OR SITE NUMBER: Boyd Farm

VESSEL NO.: none

NON-PLASTICS: grog and hematite

VESSEL FORM: Carinated bowl

RIM AND LIP FORM: Direct rim and a rounded lip

CORE COLOR: A (fired and cooled in a high oxygen environment)

INTERIOR SURFACE COLOR: yellow (10YR 7/8); fire clouding on the base

EXTERIOR SURFACE COLOR: yellow (10YR 7/8)

WALL THICKNESS (RIM, BODY, AND BASE IN MM): 6.3 mm, rim

INTERIOR SURFACE TREATMENT: smoothed

EXTERIOR SURFACE TREATMENT: smoothed

HEIGHT (IN CM): 5.4

ORIFICE DIAMETER (IN CM): 14.0

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): 11.6

BASE DIAMETER (IN CM): 6.0

ESTIMATED VOLUME (IN LITERS): 0.45 liters

DECORATION: The horizontal engraved rim panel has diagonal, vertical, and curvilinear engraved lines that are continuous around the vessel (Figure 305). A red clay pigment has been rubbed in the engraved lines.
TYPE: Unidentified fine ware vessel

Figure 305. Engraved carinated bowl of unknown type, Boyd Farm site.

Vessel Recordation Forms, Lineburger Site (41CP493), Camp County

There are two Caddo vessels from the Lineburger site in the Tommy Johns collection, along with a large chipped biface (see below). One of the vessels is a small inverted rim carinated bowl with a typologically unidentifiable engraved motif, and the other is a small punctated jar.

SITE NAME OR SITE NUMBER: Lineburger

VESSEL NO.: none

NON-PLASTICS: grog

VESSEL FORM: Jar with four rim peaks and four lug handles (Figure 306)

RIM AND LIP FORM: Everted rim and a rounded lip

CORE COLOR: G (fired in a reducing environment and cooled in the open air)

INTERIOR SURFACE COLOR: black (10YR 2/1)

EXTERIOR SURFACE COLOR: light yellowish-brown (10YR 6/4); fire clouding on the body and base; organic residue on the rim and body

WALL THICKNESS (RIM, BODY, AND BASE IN MM): 5.3 mm, rim

INTERIOR SURFACE TREATMENT: smoothed on upper body

EXTERIOR SURFACE TREATMENT: none

HEIGHT (IN CM): 10.7; 11.0 cm at rim peaks

ORIFICE DIAMETER (IN CM): 9.8

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): 10.9

BASE DIAMETER (IN CM): 8.4

ESTIMATED VOLUME (IN LITERS): 0.69 liters
DECORATION: There are nine rows of small tool punctations on the vessel rim (Figure 306).

TYPE: Unidentified punctated utility ware vessel

**Figure 306. Punctated jar, Lineburger site.**

SITE NAME OR SITE NUMBER: Lineburger

VESSEL NO.: none

NON-PLASTICS: grog and hematite

VESSEL FORM: Carinated bowl

RIM AND LIP FORM: Inverted rim and a rounded lip

CORE COLOR: F (fired in a reducing environment and cooled in the open air)

INTERIOR SURFACE COLOR: yellowish-red (5YR 4/6)

EXTERIOR SURFACE COLOR: yellowish-red (5YR 4/6); fire clouding on the base

WALL THICKNESS (RIM, BODY, AND BASE IN MM): 5.4 mm, rim

INTERIOR SURFACE TREATMENT: smoothed

EXTERIOR SURFACE TREATMENT: smoothed

HEIGHT (IN CM): 8.9

ORIFICE DIAMETER (IN CM): 10.7

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): 12.1

BASE DIAMETER (IN CM): 5.7

ESTIMATED VOLUME (IN LITERS): 0.57 liters

DECORATION: The horizontal engraved rim panel has a series of unique elements, including vertical engraved lines, ovals, semi-circles, and diagonal engraved lines, without apparent rhyme or pattern (Figure 307).
TYPE: Unidentified engraved fine ware

Figure 307. Engraved carinated bowl of unknown type, Lineburger site.

Vessel Recordation Forms, Avinger Rest Stop/Carl Owens Site (41CS132), Cass County, Texas

In the present collections, we documented two prehistoric Caddo ceramic vessels from the Avinger Rest Stop/Carol Owens site (41CS132). One of these was a plain bottle with a flaring neck, and the other was a punctated rim jar.

SITE NAME OR SITE NUMBER: Avinger Rest Stop/Carl Owens

VESSEL NO.: none

NON-PLASTICS: grog

VESSEL FORM: Bottle with a flaring neck

RIM AND LIP FORM: Direct rim and a rounded lip

CORE COLOR: A (fired and cooled in a high oxygen environment)

INTERIOR SURFACE COLOR: brown (7.5YR 5/3)

EXTERIOR SURFACE COLOR: brown (7.5YR 5/4); fire clouding on the body

WALL THICKNESS (RIM, BODY, AND BASE IN MM): 5.2 mm, neck

INTERIOR SURFACE TREATMENT: smoothed on the upper neck

EXTERIOR SURFACE TREATMENT: smoothed

HEIGHT (IN CM): 12.1

ORIFICE DIAMETER (IN CM): 4.9

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): 3.8; 10.6 cm maximum body diameter

BASE DIAMETER (IN CM): 5.0

ESTIMATED VOLUME (IN LITERS): 0.24 liters
DECORATION: Plain (Figure 308)

TYPE: Unidentified plain ware bottle

**Figure 308.** Plain bottle from the Avinger Rest Stop/Carl Owens site.

SITE NAME OR SITE NUMBER: Avinger Rest Stop/Carl Owens

VESSEL NO.: none

NON-PLASTICS: grog

VESSEL FORM: Jar

RIM AND LIP FORM: Direct rim and a rounded, exterior folded lip

CORE COLOR: F (fired in a reducing environment and cooled in the open air)

INTERIOR SURFACE COLOR: pale brown (10YR 6/3); fire clouding on the rim

EXTERIOR SURFACE COLOR: pale brown (10YR 6/3); fire clouding on the rim and body

WALL THICKNESS (RIM, BODY, AND BASE IN MM): 6.8 mm, rim

INTERIOR SURFACE TREATMENT: smoothed

EXTERIOR SURFACE TREATMENT: smoothed on the body

HEIGHT (IN CM): 12.0

ORIFICE DIAMETER (IN CM): 12.3

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): 12.4

BASE DIAMETER (IN CM): 6.9

ESTIMATED VOLUME (IN LITERS): 0.89 liters

DECORATION: There are four rows of tool punctations on the vessel rim, and the body has diagonal brushing marks (Figure 309).
Vessel Recordation Forms, Unknown Site near Harleton, Lake O’ the Pines, Harrison County, Texas

It is suspected that this unknown site in Harrison County, Texas, may be the Peanut Patch or Patton site (41HS825), a large Titus phase cemetery on Arms Creek, a tributary to Big Cypress Creek in the near vicinity of Lake O’ the Pines. Vessels from this site have been previously documented in the Buddy Calvin Jones collection (Perttula 2006), now curated at the Gregg County Historical Museum. The two vessels in the Tommy Johns collection include a Ripley Engraved carinated bowl and a Hodges Engraved bottle with a spool neck.

SITE NAME OR SITE NUMBER: Lake O’ the Pines

VESSEL NO.: none

NON-PLASTICS: grog and bone

VESSEL FORM: Carinated bowl

RIM AND LIP FORM: Direct rim and a rounded, exterior folded lip

CORE COLOR: F (fired in a reducing environment and cooled in the open air)

HEIGHT (IN CM): 15.0

ORIFICE DIAMETER (IN CM): 22.0

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): 21.0

BASE DIAMETER (IN CM): 7.0

ESTIMATED VOLUME (IN LITERS): 3.0 liters

DECORATION: The rim panel has an engraved scroll motif repeated four times around the vessel, but instead of having upper and lower scroll fill zones of small brackets and ovals (see Thurmond 1990:Figure 6b), this vessel has tick marks on the upper and lower rim panel. The scroll dividers are brackets with a single central diagonal engraved line (Figure 310).
TYPE: Ripley Engraved, var. unspecified

Figure 310. Ripley Engraved, var. unspecified carinated bowl, probably from the Peanut Patch or Patton site (41HS825).

SITE NAME OR SITE NUMBER: Lake O’ the Pines
VESSEL NO.: none
NON-PLASTICS: grog
VESSEL FORM: Bottle with a spool neck
RIM AND LIP FORM: N/A
CORE COLOR: G (fired in a reducing environment and cooled in the open air)
HEIGHT (IN CM): N/A
ORIFICE DIAMETER (IN CM): 5.0
DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): N/A
BASE DIAMETER (IN CM): 7.2
ESTIMATED VOLUME (IN LITERS): N/A
DECORATION: The vessel body has two tiers of meandering scrolls outlined by cross-hatched zones that end in hooked arms. There are negative ovals within these cross-hatched zones (Figure 311). A red clay pigment has been rubbed in the engraved lines.

TYPE: Hodges Engraved

Figure 311. Hodges Engraved bottle, probably from the Peanut Patch or Patton site (41HS825).

Vessel Recordation Forms, Lone Star Lake Site (41MX65)

There are 39 vessels from the Lone Star Lake site (41MX65) in the Turner collection. Most of the vessels were purchased by Turner from various collectors, but nine vessels came from two burials (Vessels 59-62 in one burial and Vessels 63-67 from the second grave) excavated at the site by Robert L. Turner, Sr. and Robert L. Turner, Jr.
The 39 vessels include 26 (66.7%) fine wares, 11 (28.2%) utility wares, and two (5.1%) plain wares. The fine wares include Ripley Engraved carinated bowls and bowls (n=12), Taylor Engraved carinated bowls and bowls (n=3), Turner Engraved compound bowls (n=1), a Bailey Engraved bowl, Bailey Engraved bottles (n=3), Simms Engraved carinated bowls (n=1), a Wilder Engraved olla, Wilder Engraved bottles (n=2), a Hodges Engraved bottle, and an engraved carinated bowl of unidentified type. Among the utility wares are Karnack Brushed-Incised jars (n=3), Harleton Appliqued jars (n=3), La Rue Neck Banded jars (n=1), Maydelle Incised jars (n=1), vertically brushed jars (n=1), and incised-punctated jars (n=2). The plain wares include bottles (n=1) and bowls (n=1).

SITE NAME OR SITE NUMBER: Lone Star Lake

VESSEL NO.: 30

NON-PLASTICS: grog

VESSEL FORM: Carinated bowl

RIM AND LIP FORM: Direct rim and a rounded, exterior folded lip

CORE COLOR: G (fired in a reducing environment and cooled in the open air)

INTERIOR SURFACE COLOR: very dark gray (10YR 3/1)

EXTERIOR SURFACE COLOR: light yellowish-brown (10YR 6/4); organic residue on the body; fire clouding on the body and base

WALL THICKNESS (RIM, BODY, AND BASE IN MM): 8.9 mm, rim

INTERIOR SURFACE TREATMENT: smoothed

EXTERIOR SURFACE TREATMENT: burnished

HEIGHT (IN CM): 15.1

ORIFICE DIAMETER (IN CM): 30.5

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): 29.9

BASE DIAMETER (IN CM): 9.2

ESTIMATED VOLUME (IN LITERS): 4.1 liters

DECORATION: The rim panel has two distinct motifs that are each repeated four times around the vessel. The first motif includes two large nested ovals within triangles,
resembling an “eye,” divided by a cross-hatched bracket (Figure 312). The second motif is comprised of a group of four alternating nested triangles or bisected diamonds. Two of the nested triangles have small hatched triangles within them, a third nested triangle contains an oval or semi-circle, and the four nested triangle contains a semi-circle with a small central circle with excised rays.

TYPE: cf. Ripley Engraved, var. unspecified

Figure 312. Ripley Engraved, var. unspecified carinated bowl, Lone Star Lake site.

SITE NAME OR SITE NUMBER: Lone Star Lake
VESSEL NO.: 31
NON-PLASTICS: grog
VESSEL FORM: Carinated bowl
RIM AND LIP FORM: Direct rim and a rounded lip
CORE COLOR: F (fired in a reducing environment and cooled in the open air)
INTERIOR SURFACE COLOR: light yellowish-brown (10YR 6/4); fire clouding on the base
EXTERIOR SURFACE COLOR: light yellowish-brown (10YR 6/4); fire clouding on the rim, body, and base
WALL THICKNESS (RIM, BODY, AND BASE IN MM): 8.6 mm, rim
INTERIOR SURFACE TREATMENT: smoothed
EXTERIOR SURFACE TREATMENT: burnished
HEIGHT (IN CM): 14.1
ORIFICE DIAMETER (IN CM): 26.5
DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): 26.3
BASE DIAMETER (IN CM): 8.5
ESTIMATED VOLUME (IN LITERS): 3.4 liters
DECORATION: The rim panel has an engraved continuous scroll and semi-circle motif that is repeated four times around the vessel. The large semi-circle also has a small central engraved circle within it (Figure 313).

TYPE: Ripley Engraved, *var. Caldwell*

**Figure 313. Ripley Engraved, var. Caldwell carinated bowl, Lone Star Lake site.**

SITE NAME OR SITE NUMBER: Lone Star Lake

VESSEL NO.: 32

NON-PLASTICS: grog

VESSEL FORM: Jar

RIM AND LIP FORM: Everted rim and a rounded lip

CORE COLOR: B (fired and cooled in a reducing environment)

INTERIOR SURFACE COLOR: very dark grayish-brown (10YR 3/2)

EXTERIOR SURFACE COLOR: dark brown (10YR 3/3); fire clouding

WALL THICKNESS (RIM, BODY, AND BASE IN MM): 6.1 mm, rim

INTERIOR SURFACE TREATMENT: smoothed

EXTERIOR SURFACE TREATMENT: none

HEIGHT (IN CM): 28.0

ORIFICE DIAMETER (IN CM): 26.0

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): 22.0

BASE DIAMETER (IN CM): 9.0

ESTIMATED VOLUME (IN LITERS): 9.5 liters

DECORATION: The rim has a plain but roughened surface, much like selected examples of McKinney Plain (Suhm and Jelks 1962:97). The vessel body has vertical, horizontal, and curvilinear brushing extending to the vessel base (Figure 314).
TYPE: Unidentified utility ware vessel

Figure 314. Brushed jar, Lone Star Lake site.

SITE NAME OR SITE NUMBER: Lone Star Lake

VESSEL NO.: 33

NON-PLASTICS: grog

VESSEL FORM: Jar

RIM AND LIP FORM: Everted rim and a rounded lip

CORE COLOR: G (fired in a reducing environment and cooled in the open air)

INTERIOR SURFACE COLOR: black (10YR 2/1); organic residue

EXTERIOR SURFACE COLOR: pale brown (10YR 6/3); fire clouding on the rim and body

WALL THICKNESS (RIM, BODY, AND BASE IN MM): 7.8 mm, plain

INTERIOR SURFACE TREATMENT: smoothed

EXTERIOR SURFACE TREATMENT: none

HEIGHT (IN CM): 21.4

ORIFICE DIAMETER (IN CM): 19.5

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): 18.4

BASE DIAMETER (IN CM): 7.5

ESTIMATED VOLUME (IN LITERS): 3.7 liters

DECORATION: The rim has two rows of tool punctations, one row under the lip and the other at the rim-body juncture. The body has four sets of appliqued ridge diamonds that extend from the rim-body juncture to the vessel base, and completely cover the vessel body (Figure 315).

TYPE: Harleton Appliqued

Figure 315. Harleton Appliqued jar, Lone Star Lake site.
SITE NAME OR SITE NUMBER: Lone Star Lake
VESSEL NO.: 34
NON-PLASTICS: grog
VESSEL FORM: Jar with a short rim (Figure 316)
RIM AND LIP FORM: Everted rim and a rounded lip
CORE COLOR: B (fired and cooled in a reducing environment)
INTERIOR SURFACE COLOR: black (10YR 2/1)
EXTERIOR SURFACE COLOR: very dark grayish-brown (10YR 3/2); organic residue on the rim and body
WALL THICKNESS (RIM, BODY, AND BASE IN MM): 5.5 mm, rim
INTERIOR SURFACE TREATMENT: smoothed
EXTERIOR SURFACE TREATMENT: none

VESSEL NO.: 50

NON-PLASTICS: grog
VESSEL FORM: Bowl

RIM AND LIP FORM: Direct rim and a rounded, exterior folded lip

CORE COLOR: B (fired in a reducing environment)

INTERIOR SURFACE COLOR: red (10R 5/6)

EXTERIOR SURFACE COLOR: dark red (10R 3/6); fire clouding on the base

WALL THICKNESS (RIM, BODY, AND BASE IN MM): 4.7 mm, rim

INTERIOR SURFACE TREATMENT: smoothed

EXTERIOR SURFACE TREATMENT: smoothed

HEIGHT (IN CM): 7.5

ORIFICE DIAMETER (IN CM): 10.5

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): N/A

BASE DIAMETER (IN CM): 5.5

ESTIMATED VOLUME (IN LITERS): 0.47 liters

DECORATION: The rim panel has an engraved alternating nested triangle motif (Thurmond 1990:Figure 6h) repeated four times around the vessel. The dividers between the engraved nested triangles included one or two diagonal engraved lines as well as one or two diagonal hatched ladder elements (Figure 330). The vessel has an interior and exterior red slip.

TYPE: Ripley Engraved, var. Williams

Figure 330. Ripley Engraved, var. Williams bowl, Lone Star Lake site.

SITE NAME OR SITE NUMBER: Lone Star Lake

VESSEL NO.: 51a

NON-PLASTICS: grog

VESSEL FORM: Bottle

RIM AND LIP FORM: Direct rim and a rounded lip
CORE COLOR: G (fired in a reducing environment and cooled in the open air)

INTERIOR SURFACE COLOR: very dark gray (10YR 3/1)

EXTERIOR SURFACE COLOR: brown (10YR 5/4); fire clouding on the rim and body

WALL THICKNESS (RIM, BODY, AND BASE IN MM): 6.3 mm, neck

INTERIOR SURFACE TREATMENT: none

EXTERIOR SURFACE TREATMENT: smoothed

HEIGHT (IN CM): 13.5

ORIFICE DIAMETER (IN CM): 3.5

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): 5.0; 10.5 cm maximum body diameter

BASE DIAMETER (IN CM): 4.0

ESTIMATED VOLUME (IN LITERS): 0.22 liters

DECORATION: There is a single horizontal engraved line on the upper part of the bottle neck. The vessel body has a curvilinear scroll with two arms that meet in a large engraved open circle. Each scroll arm begins at an upper and lower triangular element on the vessel body (Figure 331). A red clay pigment has been rubbed in the engraved lines.

TYPE: cf. Wilder Engraved, var. Wilder

The central elements include two sets of alternating circles and diamonds. Within each of the large circles and diamonds are small centrally-placed circles with four rays or spurs (Figure 349).

TYPE: Ripley Engraved, var. McKinney

Figure 349. Ripley Engraved, var. McKinney carinated bowl, Lone Star Lake site.

Vessel Recordation Forms, Keith Site (41TT11)

The Turner collection has nine vessels from the Keith site (41TT11). Eight of the vessels are from Burial 1, and the ninth vessel is from Burial 2. According to Turner’s notes, the latter vessel was from a previously dug burial, and “the pot thrown back in probably because it was broken.” The nine vessels from the two burials include several varieties (particularly var. McKinney) of Ripley Engraved carinated bowls (n=4), a Ripley Engraved jar, a Wilder Engraved bottle, an engraved bowl of unidentified type, a plain bottle, and a plain bowl.

BASE DIAMETER (IN CM): 4.5

ESTIMATED VOLUME (IN LITERS): 0.23 liters
DECORATION: Plain (Figure 353)

TYPE: Unidentified plain ware bottle

Figure 353. Plain bottle, Burial 1, Pot 4, Keith site.

SITE NAME OR SITE NUMBER: Keith

VESSEL NO.: Burial 1, Pot 5

NON-PLASTICS: bone and grog

VESSEL FORM: Miniature bowl (Figure 354); glauconite residue on the vessel interior

RIM AND LIP FORM: Direct rim and rounded, exterior folded lip

CORE COLOR: A (fired and cooled in a high oxygen environment)

INTERIOR SURFACE COLOR: reddish-brown (5YR 5/4)

EXTERIOR SURFACE COLOR: reddish-brown (5YR 4/4); fire clouding

WALL THICKNESS (RIM, BODY, AND BASE IN MM): 4.5 mm, rim

INTERIOR SURFACE TREATMENT: smoothed

EXTERIOR SURFACE TREATMENT: smoothed

HEIGHT (IN CM): 3.0

ORIFICE DIAMETER (IN CM): 6.2

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): N/A

BASE DIAMETER (IN CM): 3.2

ESTIMATED VOLUME (IN LITERS): 0.08 liters

DECORATION: Plain (Figure 354)

TYPE: Unidentified plain ware vessel

Figure 354. Plain miniature bowl, Burial 1, Pot 5, Keith site.
SITE NAME OR SITE NUMBER: Keith

VESSEL NO.: Burial 1, Pot 6

NON-PLASTICS: bone and grog

VESSEL FORM: Carinated bowl

RIM AND LIP FORM: Direct rim and a rounded, exterior folded lip

CORE COLOR: F (fired in a reducing environment and cooled in the open air)

INTERIOR SURFACE COLOR: brown (7.5YR 5/4)

EXTERIOR SURFACE COLOR: grayish-brown (10YR 5/2)

WALL THICKNESS (RIM, BODY, AND BASE IN MM): 6.7 mm, rim

INTERIOR SURFACE TREATMENT: smoothed

EXTERIOR SURFACE TREATMENT: burnished

HEIGHT (IN CM): 7.5

ORIFICE DIAMETER (IN CM): 14.5

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): 13.5

BASE DIAMETER (IN CM): 6.0

ESTIMATED VOLUME (IN LITERS): 0.65 liters

DECORATION: The rim panel has an engraved pendant triangle motif (Thurmond 1990:Figure 6a) with alternating circle (n=2) and diamond (n=2) central elements. Each central element also has a small central circle with four excised rays or spurs (Figure 355).

TYPE: Ripley Engraved, var. McKinney

Figure 355. Ripley Engraved, var. McKinney carinated bowl, Burial 1, Pot 6, Keith site.
SITE NAME OR SITE NUMBER: Keith

VESSEL NO.: Burial 1, Pot 7

NON-PLASTICS: bone and grog

VESSEL FORM: Carinated bowl

RIM AND LIP FORM: Direct rim and a rounded, exterior folded lip

CORE COLOR: F (fired in a reducing environment and cooled in the open air)

INTERIOR SURFACE COLOR: reddish-brown (5YR 5/4)

EXTERIOR SURFACE COLOR: reddish-brown (5YR 4/4); fire clouding

WALL THICKNESS (RIM, BODY, AND BASE IN MM): 6.8 mm, rim

INTERIOR SURFACE TREATMENT: smoothed

EXTERIOR SURFACE TREATMENT: smoothed on the body and burnished on the rim

HEIGHT (IN CM): 8.0

ORIFICE DIAMETER (IN CM): 18.0

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): 15.8

BASE DIAMETER (IN CM): 6.0

ESTIMATED VOLUME (IN LITERS): 0.86 liters

DECORATION: The rim has a simplified engraved scroll and circle motif repeated two times around the vessel. The scroll elements resemble the continuous scroll (see Thurmond 1990:Figure 6f), but with scroll fill zones comprised only of excised triangles, and there are excised triangles on the central vertical engraved line of the scroll. The scroll elements alternate with engraved circles, each with small central excised diamonds within them (Figure 356).

TYPE: Ripley Engraved, var. unspecified

Figure 356. Ripley Engraved, var. unspecified carinated bowl, Burial 1, Pot 7, Keith site.
SITE NAME OR SITE NUMBER: Keith
VESSEL NO.: Burial 1, Pot 8
NON-PLASTICS: bone and grog
VESSEL FORM: Bottle
RIM AND LIP FORM: Missing
CORE COLOR: B (fired and cooled in a reducing environment)
INTERIOR SURFACE COLOR: very dark gray (10YR 3/1)
EXTERIOR SURFACE COLOR: gray (10YR 5/1)
WALL THICKNESS (RIM, BODY, AND BASE IN MM): 4.6 mm, body
INTERIOR SURFACE TREATMENT: none
EXTERIOR SURFACE TREATMENT: smoothed
HEIGHT (IN CM): 13.5+
ORIFICE DIAMETER (IN CM): N/A
DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): N/A; 10.2 cm at maximum body diameter
BASE DIAMETER (IN CM): 8.5
ESTIMATED VOLUME (IN LITERS): 0.46 liters
DECORATION: The body has four sets of curvilinear engraved scroll lines or arms that hook around each other and have small excised triangular areas where the upper and lower scroll lines meet. The scrolls originate from upper and lower hatched triangles (Figure 357).
TYPE: Wilder Engraved, var. Wilder

Figure 357. Wilder Engraved, var. Wilder bottle, Burial 1, Pot 8, Keith site.

SITE NAME OR SITE NUMBER: Keith
VESSEL NO.: Burial 2, Pot 1
NON-PLASTICS: grog

VESSEL FORM: Jar

RIM AND LIP FORM: Direct rim and a rounded, exterior folded lip

CORE COLOR: B (fired and cooled in a reducing environment)

INTERIOR SURFACE COLOR: gray (10YR 5/1)

EXTERIOR SURFACE COLOR: gray (10YR 5/1)

WALL THICKNESS (RIM, BODY, AND BASE IN MM): 4.8 mm, rim; 4.8 mm, body

INTERIOR SURFACE TREATMENT: smoothed

EXTERIOR SURFACE TREATMENT: burnished

HEIGHT (IN CM): 18.0

ORIFICE DIAMETER (IN CM): 14.5

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): 12.0

BASE DIAMETER (IN CM): 8.3

ESTIMATED VOLUME (IN LITERS): 2.3 liters

DECORATION: The rim has four horizontal engraved lines on it. The vessel body has four sets of engraved concentric circles of varying sizes, and the outer concentric circle has two hatched pendant triangles. The circles are divided by large brackets with a single S-shaped engraved line (Figure 358).

TYPE: Ripley Engraved, var. unspecified

Figure 358. Ripley Engraved, var. unspecified jar, Burial 2, Pot 1, Keith site.

Vessel Recordation Forms, Alex Justiss Site (41TT13)

There are five Ripley Engraved vessels in the Robert L. Turner collection from the Alex Justiss site. Four of these vessels were previously documented by Perttula (2003) during the course of PBS&J data recovery investigations at the site, but Burial 24, Pot 3 was overlooked during the previous study.
The Ripley Engraved vessels in the Turner collection include var. McKinney (n=1), var. Gandy (n=2), and var. Pilgrims (n=2) carinated bowls. Other ceramic types identified in the Alex Justiss ceramic funerary offerings from other collections are Pease Brushed-Incised, La Rue Neck Banded, Bullard Brushed, Harleton Appliqued, Wilder Engraved, Taylor Engraved, Simms Engraved, Avery Engraved, and Keno Trailed (Bell 1981; Rogers et al. 2003).

SITE NAME OR SITE NUMBER: Alex Justiss

VESSEL NO.: Burial 22; Perttula (2003:Figure 26) refers to this as Burial 22, Vessel 2.

NON-PLASTICS: grog

VESSEL FORM: Carinated bowl

RIM AND LIP FORM: Direct rim and a rounded, exterior folded lip

CORE COLOR: G (fired in a reducing environment and cooled in the open air)

INTERIOR SURFACE COLOR: dark grayish-brown (10YR 4/2)

EXTERIOR SURFACE COLOR: brownish-yellow (10YR 6/6); fire clouding on the base

WALL THICKNESS (RIM, BODY, AND BASE IN MM): 6.2 mm, rim

INTERIOR SURFACE TREATMENT: none

EXTERIOR SURFACE TREATMENT: smoothed

HEIGHT (IN CM): 11.0

ORIFICE DIAMETER (IN CM): 28.0

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): 24.5

BASE DIAMETER (IN CM): 10.1

ESTIMATED VOLUME (IN LITERS): 1.85 liters

DECORATION: The rim panel has an engraved pendant triangle motif (Thurmond 1990:Figure 6a) repeated four times around the vessel. The central element includes circles (or buttons) and diamonds that alternate twice on the rim panel. Each central element has a small central engraved diamond within it (Figure 359).
TYPE: Ripley Engraved, *var. McKinney*

**Figure 359.** Ripley Engraved, *var. McKinney* carinated bowl, Burial 22, Pot 2, Alex Justiss site.

SITE NAME OR SITE NUMBER: Alex Justiss

VESSEL NO.: Burial 22; Perttula (2003:Figure 27) refers to this as Burial 22, Vessel 3.

NON-PLASTICS: grog, hematite, and bone

VESSEL FORM: Carinated bowl

RIM AND LIP FORM: Direct rim and a rounded, exterior folded lip

CORE COLOR: F (fired in a reducing environment and cooled in the open air)

INTERIOR SURFACE COLOR: light yellowish-brown (10YR 6/4)

EXTERIOR SURFACE COLOR: light yellowish-brown (10YR 6/4); fire clouding on the body and base

WALL THICKNESS (RIM, BODY, AND BASE IN MM): 7.2 mm, rim

INTERIOR SURFACE TREATMENT: smoothed

EXTERIOR SURFACE TREATMENT: burnished

HEIGHT (IN CM): 9.5

ORIFICE DIAMETER (IN CM): 24.6

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): 20.1

BASE DIAMETER (IN CM): 8.6

ESTIMATED VOLUME (IN LITERS): 1.4 liters

DECORATION: The rim panel has an engraved scroll motif (see Thurmond 1990:Figure 6b) repeated four times around the vessel. The scrolls are divided by brackets filled with upper and lower oval elements and a single central horizontal engraved line, rather than a vertical S-shaped element (Figure 360).
TYPE: Ripley Engraved, *var. Gandy*

**Figure 360. Ripley Engraved, *var. Gandy* carinated bowl, Burial 22, Pot 3, Alex Justiss site.**

SITE NAME OR SITE NUMBER: Alex Justiss

VESSEL NO.: Burial 24, Pot 1

NON-PLASTICS: grog

VESSEL FORM: Carinated bowl

RIM AND LIP FORM: Direct rim and a rounded lip

CORE COLOR: G (fired in a reducing environment and cooled in the open air)

INTERIOR SURFACE COLOR: very dark gray (10YR 3/1)

EXTERIOR SURFACE COLOR: pale brown (10YR 6/3); fire clouding on the body and base

WALL THICKNESS (RIM, BODY, AND BASE IN MM): 7.0 mm, rim

INTERIOR SURFACE TREATMENT: smoothed

EXTERIOR SURFACE TREATMENT: burnished

HEIGHT (IN CM): 6.0

ORIFICE DIAMETER (IN CM): 16.3

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): 13.2

BASE DIAMETER (IN CM): 7.9

ESTIMATED VOLUME (IN LITERS): 0.59 liters

DECORATION: The rim panel has an engraved scroll motif (see Thurmond 1990:Figure 6b; see also Perttula 2003:Figure 28) repeated four times around the vessel. The scrolls are divided by brackets with two triangular tick marks, creating a poorly defined vertical and negative S-shaped element (Figure 361).
TYPE: Ripley Engraved, var. Gandy

Figure 361. Ripley Engraved, var. Gandy carinated bowl, Burial 24, Pot 1, Alex Justiss site.

SITE NAME OR SITE NUMBER: Alex Justiss
VESSEL NO.: Burial 24, Pot 2
NON-PLASTICS: grog
VESSEL FORM: Carinated bowl
RIM AND LIP FORM: Direct rim and a rounded, exterior folded lip
CORE COLOR: F (fired in a reducing environment and cooled in the open air)
INTERIOR SURFACE COLOR: brown (7.5YR 5/4)
EXTERIOR SURFACE COLOR: brown (7.5YR 5/4)
WALL THICKNESS (RIM, BODY, AND BASE IN MM): 8.7 mm, rim
INTERIOR SURFACE TREATMENT: smoothed
EXTERIOR SURFACE TREATMENT: burnished
HEIGHT (IN CM): 15.7
ORIFICE DIAMETER (IN CM): 30.0
DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): 30.1
BASE DIAMETER (IN CM): 9.5
ESTIMATED VOLUME (IN LITERS): 4.2 liters

DECORATION: The rim panel has an engraved horizontal interlocking scroll motif (see Thurmond 1990:Figure 6g) repeated four times around the vessel. Each upper and lower part of the rim panel also has a single engraved pendant triangle (Figure 362). The individual scrolls are divided by three vertical to curvilinear engraved lines rather than brackets (see also Perttula 2003:Figure 29).
TYPE: cf. Ripley Engraved, *var. Pilgrims*

**Vessel Recordation Forms, Graydon Adkins, Site 2 (41UR17)**

There are 11 Caddo ceramic vessels from the Graydon Adkins #2 site, 10 of which are from four of the burials (Burial 2, 4, 5, and 8) excavated there in the 1950s; one of the vessels does not have any provenience information, but may be from Burial 8 (see Turner 1997:Figure 18). The 11 vessels in the Turner collection include plain bowls (n=4), plain carinated bowls (n=1), plain bottles (n=1), punctated jars (n=1), an incised jar with strap handles (n=1), engraved bowls (n=2), and engraved bottles (n=1) of unidentified types. The percentage of plain wares in these funerary vessels is 55%.

SITE NAME OR SITE NUMBER: Graydon Adkins, Site 2
VESSEL NO.: Burial 2, Pot 2
NON-PLASTICS: grog
VESSEL FORM: Bowl
RIM AND LIP FORM: Direct rim and a rounded lip
CORE COLOR: H (fired in a reducing environment and cooled in the open air)
INTERIOR SURFACE COLOR: reddish-brown (5YR 4/3)
EXTERIOR SURFACE COLOR: dark reddish-brown (5YR 4/2)
WALL THICKNESS (RIM, BODY, AND BASE IN MM): 6.0 mm, rim; 13.2, base

DECORATION: The rim has 5-6 horizontal incised lines; the strap handles have vertical incised lines. The vessel body has sets of vertical incised lines (4-5 lines) separated by a single vertical incised line under each strap handle (Figure 371).
TYPE: Unidentified incised utility ware vessel

Figure 371. Incised jar, Graydon Adkins, Site 2.

Vessel Recordation Forms, Graydon Adkins, Site 1 (41UR21)

All three of the vessels in the Turner collection from the Graydon Adkins #1 site were given to Turner by Ralph Nicholas. The archeological context of these vessels is not known. The vessels include a plain carinated bowl, a Ripley Engraved, var. Galt compound bowl, and a carinated bowl with four opposed appliqued nodes on the rim panel.

SITE NAME OR SITE NUMBER: Graydon Adkins, Site 1

VESSEL NO.: No # (given to Turner by Ralph Nicholas)

NON-PLASTICS: grog

VESSEL FORM: Carinated bowl

RIM AND LIP FORM: Direct rim and a rounded lip

CORE COLOR: F (fired in a reducing environment and cooled in the open air)

INTERIOR SURFACE COLOR: grayish-brown (10YR 5/2)

EXTERIOR SURFACE COLOR: light yellowish-brown (10YR 6/4); fire clouding on the rim and body

WALL THICKNESS (RIM, BODY, AND BASE IN MM): 6.3 mm, rim; 7.2 mm, body; 10.3 mm, base

INTERIOR SURFACE TREATMENT: smoothed

EXTERIOR SURFACE TREATMENT: smoothed

HEIGHT (IN CM): 7.0

ORIFICE DIAMETER (IN CM): 23.0

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): 22.2

BASE DIAMETER (IN CM): 8.6

ESTIMATED VOLUME (IN LITERS): 0.97 liters
DECORATION: The exterior vessel surface is plain, but there is a single horizontal engraved line on the vessel interior at the carination point.

TYPE: Unidentified fine ware vessel

SITE NAME OR SITE NUMBER: Graydon Adkins, Site 1

VESSEL NO.: No # (given to Turner by Ralph Nicholas)

NON-PLASTICS: grog, bone, and hematite

VESSEL FORM: Compound bowl

RIM AND LIP FORM: Everted rim and a rounded lip

CORE COLOR: F (fired in a reducing environment and cooled in the open air)

INTERIOR SURFACE COLOR: reddish-yellow (7.5YR 6/6); fire clouding on the rim, body, and base

EXTERIOR SURFACE COLOR: reddish-yellow (7.5YR 6/6); fire clouding on the body and base

WALL THICKNESS (RIM, BODY, AND BASE IN MM): 5.5 mm, rim; 5.5 mm, body; 7.2 mm, base

INTERIOR SURFACE TREATMENT: smoothed

EXTERIOR SURFACE TREATMENT: burnished

HEIGHT (IN CM): N/A

ORIFICE DIAMETER (IN CM): 27.0

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): N/A

BASE DIAMETER (IN CM): 8.8

ESTIMATED VOLUME (IN LITERS): N/A

DECORATION: The upper rim panel has a single centrally-placed horizontal engraved line on it. The lower rim panel has an engraved scroll and circle motif (see Thurmond 1990:Figure 6c) repeated four times around the vessel. The circle element also has a single small central circle within it.
TYPE: Ripley Engraved, var. Galt

SITE NAME OR SITE NUMBER: Graydon Adkins, Site 1

VESSEL NO.: No # (given to Turner by Ralph Nicholas)

NON-PLASTICS: grog and hematite

VESSEL FORM: Carinated bowl

RIM AND LIP FORM: Direct rim and a rounded lip

CORE COLOR: F (fired in a reducing environment and cooled in the open air)

INTERIOR SURFACE COLOR: light yellowish-brown (10YR 6/4)

EXTERIOR SURFACE COLOR: light yellowish-brown (10YR 6/4); fire clouding on the rim

WALL THICKNESS (RIM, BODY, AND BASE IN MM): 4.9 mm, rim; 4.2 mm, body; 6.3 mm, base

INTERIOR SURFACE TREATMENT: none

EXTERIOR SURFACE TREATMENT: smoothed

HEIGHT (IN CM): N/A

ORIFICE DIAMETER (IN CM): 16.0

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): N/A

BASE DIAMETER (IN CM): 5.9

ESTIMATED VOLUME (IN LITERS): N/A

DECORATION: There are four evenly-spaced appliqued nodes on the rim panel.

TYPE: Unidentified utility ware vessel
Vessel Recordation Forms, Keeling Site, Upshur County, Texas

The Caddo vessels that we documented from the Keeling site are held at the Northeast Texas Rural Heritage Museum in Pittsburg, Texas. During excavations by the Keeling family, a total of 15 Titus phase burials were explored, and these vessels are among the many funerary offerings.

The utility ware vessels from the Keeling site include an appliqued jar, Harleton Appliqued jars (n=5), Karnack Brushed-Incised jars (n=1), and an incised-punctated-brushed jar. Among the fine wares are engraved bowls (n=1) of unidentified type, several varieties of Ripley Engraved carinated bowls (n=9), Taylor Engraved carinated bowls (n=1), Turner Engraved, *var. Horton* compound bowls (n=1), a Wilder Engraved jar, a compound bowl with both Taylor Engraved and Ripley Engraved motifs/decorative elements, a carinated bowl with Simms Engraved and Taylor Engraved motifs/decorative elements, a Bailey Engraved olla, a Keno Trailed, *var. Phillips* bowl (dating to the late 17th-early 18th century), a Poynor Engraved, *var. Blackburn* carinated bowl, Ripley Engraved bottles (n=3), a Wilder Engraved, *var. Wilder* bottle, and Hodges Engraved bottles (n=1). There are also plain carinated bowls (n=1) and bottles (n=2) in the collection.

In addition to the 34 Caddo vessels from the Keeling site in this collection, there are also four ground stone celts (siltstone, ferruginous sandstone, quartzite, and graywacke), a gray chert large biface, a gray chert flake tool, a Gary point preform of quartzite, a quartzite polishing stone, and two pieces of fired kaolin clay. Although not documented as part of this project, there were reportedly 72 arrow points recovered from the 15 burials, among them 66 Talco (91.7%) and six Bassett (8.3%) points.

**SITE NAME OR SITE NUMBER:** Keeling

**VESSEL NO.:** 2003.010.001

**NON-PLASTICS:** grog-bone-hematite

**VESSEL FORM:** Jar with two opposed suspension holes (Figure 372)

**RIM AND LIP FORM:** Everted rim and a rounded lip

**CORE COLOR:** B (fired and cooled in a low oxygen environment)

**INTERIOR SURFACE COLOR:** very dark gray (10YR 3/1)

**EXTERIOR SURFACE COLOR:** black (10YR 2/1); organic residue

**WALL THICKNESS (RIM, BODY, AND BASE IN MM):** 5.4 mm, rim

**INTERIOR SURFACE TREATMENT:** smoothed
EXTERIOR SURFACE TREATMENT: none

HEIGHT (IN CM): 6.4

ORIFICE DIAMETER (IN CM): 9.5

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): 8.8

BASE DIAMETER (IN CM): 7.0

ESTIMATED VOLUME (IN LITERS): 0.36 liters

DECORATION: There are four vertical appliqued ridges that extend from near the rim to near the base.

TYPE: Unidentified appliqued utility ware vessel, cf. Cass Appliqued

Figure 372. cf. Cass Appliqued jar, Keeling site, Vessel .001.

SITE NAME OR SITE NUMBER: Keeling

VESSEL NO.: 2003.010.002

NON-PLASTICS: grog

VESSEL FORM: Bowl

RIM AND LIP FORM: Direct rim and a rounded lip

CORE COLOR: G (fired in a reducing environment and cooled in the open air)

INTERIOR SURFACE COLOR: very dark gray (10YR 3/1)

EXTERIOR SURFACE COLOR: pale brown (10YR 6/3)

WALL THICKNESS (RIM, BODY, AND BASE IN MM): 6.5 mm, rim

INTERIOR SURFACE TREATMENT: smoothed

EXTERIOR SURFACE TREATMENT: burnished

HEIGHT (IN CM): 7.0

ORIFICE DIAMETER (IN CM): 11.5
DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): N/A

BASE DIAMETER (IN CM): 4.9

ESTIMATED VOLUME (IN LITERS): 0.32 liters

DECORATION: The upper part of the vessel has a horizontal engraved panel filled with 12 opposed sets of triangular engraved elements (Figure 373).

TYPE: unidentified fine ware vessel

Figure 373. Engraved bowl of unknown type, Keeling site, Vessel .002.

SITE NAME OR SITE NUMBER: Keeling

VESSEL NO.: 2003.010.003

NON-PLASTICS: grog-hematite

VESSEL FORM: Jar with four rim peaks and four appliqued lugs (Figure 374)

RIM AND LIP FORM: Direct rim and a rounded, exterior folded lip

CORE COLOR: G (fired in a reducing environment, and cooled in the open air)

INTERIOR SURFACE COLOR: very dark gray (10YR 3/1)

EXTERIOR SURFACE COLOR: brown (10YR 5/3); fire clouding

WALL THICKNESS (RIM, BODY, AND BASE IN MM): 6.0 mm, rim

INTERIOR SURFACE TREATMENT: smoothed

EXTERIOR SURFACE TREATMENT: none

HEIGHT (IN CM): 17.5 cm; 18.2 cm at the rim peaks

ORIFICE DIAMETER (IN CM): 14.8

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): 13.0

BASE DIAMETER (IN CM): 7.5

ESTIMATED VOLUME (IN LITERS): 2.3 liters
DECORATION: There are single rows of tool punctates on the rim, one under the lip and on the rim peaks, the other at the rim-body juncture. A horizontal appliqued ridge is nested under this punctated row. The remainder of the rim is covered with short vertical appliqued ridges (Figure 374).

On the body are four repeating sets of appliqued scroll (four in number per set) and circle elements, with a central appliqued node within each appliqued circle. There are also four small hooked arm appliqued ridges above the appliqued scrolls. The area not covered with appliqued elements is covered with brushing marks (Figure 374).

TYPE: Harleton Appliqued

Figure 374. Harleton Appliqued jar, Keeling site, Vessel .003.

SITE NAME OR SITE NUMBER: Keeling

VESSEL NO.: 2003.010.004

ORIFICE DIAMETER (IN CM): 16.0

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): 13.5

BASE DIAMETER (IN CM): 6.5

ESTIMATED VOLUME (IN LITERS): 2.3 liters

DECORATION: The rim is horizontally brushed, with four sets of two appliqued nodes under each rim peak. There is a distinct raised collar at the rim-body juncture (Figure 378).
The vessel body has four panels, defined by vertical appliqued fillets, of concentric appliqued fillet semi-circles and a central circle, with a large central appliqued node within the central circle. Each appliqued fillet panel divider begins with a triangular appliqued fillet element underneath the rim-body juncture (Figure 378).

**TYPE:** Harleton Appliqued

**Figure 378. Harleton Appliqued jar, Keeling site, Vessel .007.**

**SITE NAME OR SITE NUMBER:** Keeling

**DIAMETER AT BOTTOM OF RIM OR NECK (IN CM):** 17.2

**BASE DIAMETER (IN CM):** 6.0

**ESTIMATED VOLUME (IN LITERS):** 0.79 liters

**DECORATION:** The rim panel has a central ticked oval repeated four times around the vessel; within each oval is a vertical ticked scroll line. Between each of the ovals is a diagonal scroll line (also ticked) and upper and lower fill zones defined by sets of four negative ovals (Figure 379). The largest of the negative ovals has a small vertical dash or
spur within it, similar to the small dashed mark or spur used on the circle and nested triangle and alternate nested triangles motifs on Ripley Engraved vessels (Thurmond 1990:Figure 6e, h). Both the interior and exterior vessel surfaces have a red slip.

TYPE: cf. Ripley Engraved, var. unspecified

HEIGHT (IN CM): 5.7

ORIFICE DIAMETER (IN CM): 9.6

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): 10.5

BASE DIAMETER (IN CM): 5.2

ESTIMATED VOLUME (IN LITERS): 0.33 liters

DECORATION: The rim panel has alternating sets of closely-spaced vertical and diagonal engraved lines. The vessel body has hooked arms scrolls that are repeated four times on the vessel (Figure 392). The hooked arm scrolls are divided by upper and lower nested triangles (two times) or a sideways triangle with a small central triangular element within it. A red pigment has been rubbed in the engraved lines on both rim panels.

TYPE: cf. Simms Engraved and/or Taylor Engraved

DECORATION: The body of the vessel has vertical brushed marks and incised lines on it (Figure 393).

TYPE: cf. Karnack Brushed-Incised

Figure 393. cf. Karnack Brushed-Incised jar, Keeling site, Vessel .022.

SITE NAME OR SITE NUMBER: Keeling
VESSEL NO.: 2003.010.023
NON-PLASTICS: grog
VESSEL FORM: Carinated bowl; the vessel has a glauconite staining
RIM AND LIP FORM: Direct rim and a rounded, exterior folded lip
CORE COLOR: G (fired in a reducing environment and cooled in the open air)
INTERIOR SURFACE COLOR: very dark gray (10YR 3/1)
EXTERIOR SURFACE COLOR: brown (10YR 5/3); fire clouding on the base and lower body
WALL THICKNESS (RIM, BODY, AND BASE IN MM): 5.7 mm, rim
INTERIOR SURFACE TREATMENT: none
EXTERIOR SURFACE TREATMENT: burnished
HEIGHT (IN CM): 4.0
ORIFICE DIAMETER (IN CM): 7.3
DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): 6.3
BASE DIAMETER (IN CM): 3.3

ESTIMATED VOLUME (IN LITERS): 0.18 liters

DECORATION: The rim panel has a circle and nested triangle motif (Thurmond 1990:Figure 6e) repeated four times around the vessel. Each central circle has only a single central excised dot. The nested triangle element is repeated twice on the upper and lower rim, alternating with excised triangular elements (Figure 394). A white kaolin clay pigment has been rubbed in the engraved lines.

DECORATION: The vessel body has a negative meandering scroll outlined by upper and lower cross-hatched areas. These cross-hatched areas end in four sets of hooked arms. The lower cross-hatched area encompasses four empty engraved circles (Figure 405).

TYPE: Hodges Engraved

Figure 405. Hodges Engraved bottle, Keeling site, Vessel .034.

Vessel Recordation Forms, Moughon Site, Upshur County, Texas

The one vessel from the Moughon site that we have documented is a large engraved bottle classified as Ripley Engraved, *var. Ripley*. As mentioned above, this is a new variety of Ripley Engraved defined on the basis of the current vessel documentation project.

SITE NAME OR SITE NUMBER: Moughon

VESSEL NO.: Burial 2, Pot 10

NON-PLASTICS: grog
VESSEL FORM: Bottle with a straight to flaring neck and four extreme body peaks (Figure 406)

RIM AND LIP FORM: Direct rim and a rounded lip

CORE COLOR: B (fired and cooled in a reducing environment)

INTERIOR SURFACE COLOR: black (10YR 2/1)

EXTERIOR SURFACE COLOR: black (10YR 2/1)

WALL THICKNESS (RIM, BODY, AND BASE IN MM): 6.2 mm, neck

INTERIOR SURFACE TREATMENT: smoothed on the upper neck

EXTERIOR SURFACE TREATMENT: burnished

HEIGHT (IN CM): 20.0

ORIFICE DIAMETER (IN CM): 4.6

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): 5.4; 11.4 cm is the maximum body diameter

BASE DIAMETER (IN CM): 7.5

ESTIMATED VOLUME (IN LITERS): 0.60 liters

DECORATION: The body has four repeating sets of adjacent circles and diamonds, underneath three horizontal engraved lines at the base of the bottle neck. The central engraved circle has a smaller circle within it that has triangular tick marks that face inward. The larger engraved diamond element has two smaller diamonds within it, the middle diamond having triangular tick marks that face outward (Figure 406). Underneath and above the central engraved circles are curvilinear zones with outward-facing triangular tick marks, and there is a small engraved rectangle within each of the zones. A red clay pigment has been rubbed in the engraved lines.

TYPE: Ripley Engraved, var. Ripley

**Figure 406. Ripley Engraved, var. Ripley bottle, Burial 2, Pot 10, Moughon site.**
Sulphur River Basin Site

Red Martin was an artifact collector that worked the shoreline at Lake Wright Patman, amassing an impressive range of chipped stone artifacts and ceramic sherds from a range of sites that he mounted in glass frames. There is no information available on which sites—or their locations—the materials were collected from at Lake Wright Patman. Tommy Johns purchased the collection some years ago. In addition to the projectile points and ceramic sherds, there is a single prehistoric Caddo pottery vessel in the collection.

Vessel Recordation Form, Red Martin, Cass County, Texas

The one Red Martin collection vessel we documented from Lake Wright Patman is a small brushed-appliqued jar, probably of the Pease Brushed-Incised type (Suhm and Jelks 1962:Plate 60). Pease Brushed-Incised vessels were made and used by Caddo Indian peoples in both Middle (ca. A.D. 1200-1400) and Late Caddo (ca. A.D. 1400-1680) period times in the lower Sulphur River basin (Jelks 1961; Cliff 1997; Perttula 1998).

SITE NAME OR SITE NUMBER: Red Martin Collection, Lake Wright Patman

VESSEL NO.: No #

NON-PLASTICS: grog and bone

VESSEL FORM: Jar

RIM AND LIP FORM: Everted rim and a rounded lip

CORE COLOR: F (fired in a reducing environment and cooled in the open air)

INTERIOR SURFACE COLOR: light yellowish-brown (10YR 6/4); fire clouding on the rim

EXTERIOR SURFACE COLOR: light yellowish-brown (10YR 6/4); fire clouding on the rim and base

WALL THICKNESS (RIM, BODY, AND BASE IN MM): 5.8 mm, rim

INTERIOR SURFACE TREATMENT: smoothed

EXTERIOR SURFACE TREATMENT: none

HEIGHT (IN CM): 10.7
ORIFICE DIAMETER (IN CM): 12.5

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): 10.7

BASE DIAMETER (IN CM): 6.6

ESTIMATED VOLUME (IN LITERS): 0.80 liters

DECORATION: The rim has horizontal brushing marks on it. The vessel body has multiple widely-spaced vertical appliqued ridges with vertical brushing between the ridges (Figure 407).

Figure 407. Brushed-appliqued jar, Red Martin Collection.

Neches-Angelina River Basin Sites

Vessel Recordation Forms, Unknown Cherokee County Site

According to Robert L. Turner’s notes, the vessels from the unknown Cherokee County site originally came from the R. G. Upton collection. They were found in about 1930 at the “forks of Bowles and White Oak creeks” in west central Cherokee County.

The three vessels from this site include a deep bowl, a small Killough Pinched jar, and a brushed-incised-appliqued jar. The occurrence of the Killough Pinched vessel suggests the site from which the vessels came likely dates to the Late Caddo Frankston phase (ca. A.D. 1400-1650).

SITE NAME OR SITE NUMBER: Unknown Cherokee County site, Upton

BASE DIAMETER (IN CM): 6.0

ESTIMATED VOLUME (IN LITERS): 0.79 liters

DECORATION: The rim has horizontal brushing marks and incised lines. The vessel body has panels defined by vertical appliqued fillets. Within each panel are closely-spaced vertical incised lines (Figure 410).

TYPE: cf. Reavely Brushed-Incised (Hart 1982)

Figure 410. cf. Reavely Brushed-Incised jar, Unknown Cherokee County site.

Vessel Recordation Forms, Deshazo Site (41NA27)

Bob Turner and his father excavated nine burials (Burials 1-9) from Area A at the southern end of the Deshazo site in the late 1930s (Story 1995:1). They recovered a total of 13 vessels from these burials, and they have been described by Fields (1995:203-208).

The fine ware vessels include Patton Engraved bowls and jars (n=2), Taylor Engraved carinated bowls (n=1), Natchitoches Engraved bowls (n=1), a possible Hume Engraved bowl, and unidentified engraved carinated bowls and compound bowls (n=2). The utility wares are incised-brushed jars (n=1), brushed-punctated jars (n=1), punctated jars (n=1), appliqued jars (n=1), and a brushed-appliqued jar (n=1). There is also a plain bowl (n=1).

SITE NAME OR SITE NUMBER: Deshazo

VESSEL NO.: Burial 1 (Turner); Fields (1995:206) refers to this as Vessel 12

NON-PLASTICS: grog

VESSEL FORM: Bowl

RIM AND LIP FORM: Direct rim with a rounded lip

CORE COLOR: H (fired in a reducing environment and cooled in the open air)

INTERIOR SURFACE COLOR: brown (7.5YR 5/3)

EXTERIOR SURFACE COLOR: dark grayish-brown (10YR 4/2)

WALL THICKNESS (RIM, BODY, AND BASE IN MM): 4.6 mm, rim
INTERIOR SURFACE TREATMENT: burnished on the rim and smoothed on the body

EXTERIOR SURFACE TREATMENT: smoothed

HEIGHT (IN CM): 8.0

ORIFICE DIAMETER (IN CM): 11.0

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): N/A

BASE DIAMETER (IN CM): 4.4

ESTIMATED VOLUME (IN LITERS): 0.35 liters

DECORATION: The vessel has two engraved hooked arm scrolls (composed of three engraved lines) within oval engraved panels consisting of two arcing lines. The outer line of the oval panels have triangular tick marks, as does the outer line of the hooked arm element. There are also hatched triangular elements on the outside of the oval panels and hooked arm scrolls, at both the top and bottom of the bowl (Figure 411).

The oval panels and scrolls are set within an area of the vessel delimited by two upper (under the lip) and lower (above the base) sets of horizontal engraved lines. In the case of the upper set of horizontal engraved lines, the area between the two lines is filled with 38 hatched pendant triangles (Figure 411). In one area at the rim, there are five additional hatched pendant triangles below the second horizontal engraved line.

There is an engraved open cross on the vessel base.

TYPE: Patton Engraved, var. Patton

NON-PLASTICS: bone

VESSEL FORM: Jar

RIM AND LIP FORM: Everted rim and a rounded lip

CORE COLOR: F (fired in a reducing environment and cooled in the open air)

INTERIOR SURFACE COLOR: light yellowish-brown (10YR 6/4); fire clouding on the rim

EXTERIOR SURFACE COLOR: light yellowish-brown (10YR 6/4); fire clouding on the body and base

WALL THICKNESS (RIM, BODY, AND BASE IN MM): 5.3 mm, rim

INTERIOR SURFACE TREATMENT: smoothed

EXTERIOR SURFACE TREATMENT: none

HEIGHT (IN CM): 9.9
ORIFICE DIAMETER (IN CM): 10.9

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): 9.5

BASE DIAMETER (IN CM): 4.7

ESTIMATED VOLUME (IN LITERS): 0.64

DECORATION: There are six rows of tool punctations on the rim, divided by two sets of vertical rows of punctations repeated four times on the rim. On the body, there are 13 rows of tool punctations, divided by three sets of vertical rows of punctations repeated five times on the body (Figure 414).

TYPE: Unidentified punctated jar

Figure 414. Punctated jar, Deshazo site, Burial 2.

SITE NAME OR SITE NUMBER: Deshazo

VESSEL NO.: Burial 3 (Turner); Fields (1995:206) refers to this as Vessel 11

NON-PLASTICS: grog

VESSEL FORM: Bowl

RIM AND LIP FORM: Direct rim and a rounded lip

CORE COLOR: F (fired in a reducing environment and cooled in the open air)

INTERIOR SURFACE COLOR: reddish-brown (5YR 4/3)

EXTERIOR SURFACE COLOR: reddish-brown (5YR 4/3); fire clouding on the body

WALL THICKNESS (RIM, BODY, AND BASE IN MM): 6.0 mm, rim

INTERIOR SURFACE TREATMENT: burnished on the rim and smoothed on the body

EXTERIOR SURFACE TREATMENT: burnished

HEIGHT (IN CM): 11.0

ORIFICE DIAMETER (IN CM): 14.5

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): 13.7
BASE DIAMETER (IN CM): 7.0

ESTIMATED VOLUME (IN LITERS): 0.64 liters

DECORATION: There are two horizontal engraved lines on the rim, forming a panel filled with rows of large hatched pendant triangles on the rim, including 30 hatched triangles pendant from both upper and lower horizontal lines (Figure 415).

TYPE: cf. Hume Engraved

Figure 415. cf. Hume Engraved bowl, Deshazo site, Burial 3.

SITE NAME OR SITE NUMBER: Deshazo

VESSEL NO.: Burial 4 (Turner); Fields (1995:206) refers to this as Vessel 10

NON-PLASTICS: bone and grog

VESSEL FORM: Jar

RIM AND LIP FORM: Everted rim and a rounded lip

CORE COLOR: F (fired in a reducing environment and cooled in the open air)

INTERIOR SURFACE COLOR: strong brown (7.5YR 5/6); fire clouding

EXTERIOR SURFACE COLOR: reddish-brown (5YR 5/4); fire clouding

WALL THICKNESS (RIM, BODY, AND BASE IN MM): 6.3 mm, rim; 4.3 mm, body

INTERIOR SURFACE TREATMENT: smoothed

EXTERIOR SURFACE TREATMENT: burnished

HEIGHT (IN CM): 9.5

ORIFICE DIAMETER (IN CM): 11.0

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): 10.6

BASE DIAMETER (IN CM): 4.0

ESTIMATED VOLUME (IN LITERS): 0.63 liters
DECORATION: There are two horizontal engraved lines on the rim, each with downward-pointing triangular tick marks.

TYPE: Patton Engraved, var. Allen

SITE NAME OR SITE NUMBER: Deshazo

VESSEL NO.: Burial 5 (Turner); Fields (1995:203) refers to this as Vessel 4

NON-PLASTICS: grog and large pieces of bone

VESSEL FORM: Jar

RIM AND LIP FORM: Direct rim and a rounded lip

CORE COLOR: B (fired and cooled in a reducing environment)

INTERIOR SURFACE COLOR: dark reddish-gray (5YR 4/2)

EXTERIOR SURFACE COLOR: dark reddish-gray (5YR 4/2); fire clouding

WALL THICKNESS (RIM, BODY, AND BASE IN MM): 5.8 mm, rim

INTERIOR SURFACE TREATMENT: smoothed

EXTERIOR SURFACE TREATMENT: none

HEIGHT (IN CM): 10.0

ORIFICE DIAMETER (IN CM): 9.0

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): 9.0

BASE DIAMETER (IN CM): 5.5

ESTIMATED VOLUME (IN LITERS): 0.54 liters

DECORATION: The only decoration is two opposed appliqued nodes below the vessel lip (Figure 416).

TYPE: Unidentified appliqued utility ware vessel

Figure 416. Appliqued jar, Deshazo site, Burial 5.
SITE NAME OR SITE NUMBER: Deshazo

VESSEL NO.: Burial 5 (Turner); Fields (1995:203-204) refers to this as Vessel 7

NON-PLASTICS: grog and bone; the vessel has a sandy paste

VESSEL FORM: Miniature Jar

RIM AND LIP FORM: Direct rim and a rounded lip

CORE COLOR: A (fired and cooled in a high oxygen environment)

INTERIOR SURFACE COLOR: red (2.5YR 5/8); fire clouding

EXTERIOR SURFACE COLOR: red (2.5YR 5/8); fire clouding

WALL THICKNESS (RIM, BODY, AND BASE IN MM): 6.7 mm, rim

INTERIOR SURFACE TREATMENT: none

EXTERIOR SURFACE TREATMENT: none

HEIGHT (IN CM): 6.7

ORIFICE DIAMETER (IN CM): 6.3

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): 6.3

BASE DIAMETER (IN CM): 3.6

ESTIMATED VOLUME (IN LITERS): 0.25 liters

DECORATION: There is a single row of tool punctations under the vessel lip. The body has diagonal brushing marks that extend to within 10 mm of the vessel base (Figure 417).

TYPE: Unidentified brushed-punctated utility ware

Figure 417. Brushed-punctated jar, Deshazo site, Burial 5.

SITE NAME OR SITE NUMBER: Deshazo

VESSEL NO.: Burial 5 (Turner); Fields (1995:207-208) refers to this as Vessel 15

NON-PLASTICS: bone
VESSEL FORM: Carinated bowl

RIM AND LIP FORM: Direct to slightly everted rim and a rounded, exterior folded lip

CORE COLOR: H (fired in a reducing environment and cooled in the open air)

INTERIOR SURFACE COLOR: yellowish-red (5YR 4/6)

EXTERIOR SURFACE COLOR: dark reddish-gray (5YR 4/2)

WALL THICKNESS (RIM, BODY, AND BASE IN MM): 5.1 mm, rim

INTERIOR SURFACE TREATMENT: smoothed

EXTERIOR SURFACE TREATMENT: smoothed

HEIGHT (IN CM): 6.7

ORIFICE DIAMETER (IN CM): 11.7

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): 10.3

BASE DIAMETER (IN CM): 4.7

ESTIMATED VOLUME (IN LITERS): 0.47 liters

DECORATION: The rim has six rectangular engraved panels. Five have three horizontal-vertical scroll lines, a fourth vertical engraved line, and a fifth small rectangle with excised corners. The sixth panel is unique, with two vertical engraved lines, two horizontal-vertical scroll lines, and upper and lower rows of triangular tick marks (Figure 418).

TYPE: Unidentified engraved fine ware vessel, cf. Natchitoches Engraved?

**Figure 418. Engraved carinated bowl of unknown type, Deshazo site, Burial 5.**

SITE NAME OR SITE NUMBER: Deshazo

VESSEL NO.: Burial 6 (Turner); Fields (1995:207) refers to this as Vessel 14

NON-PLASTICS: bone and hematite

VESSEL FORM: Bowl; there is a collar between the rim and the body (Figure 419)
RIM AND LIP FORM: Everted rim and a rounded lip

CORE COLOR: F (fired in a reducing environment and cooled in the open air)

INTERIOR SURFACE COLOR: brown (7.5YR 5/3)

EXTERIOR SURFACE COLOR: strong brown (7.5YR 5/6); fire clouding on the rim and body

WALL THICKNESS (RIM, BODY, AND BASE IN MM): 5.0 mm, rim

INTERIOR SURFACE TREATMENT: smoothed

EXTERIOR SURFACE TREATMENT: burnished

HEIGHT (IN CM): 8.0

ORIFICE DIAMETER (IN CM): 13.5

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): N/A

BASE DIAMETER (IN CM): 5.5

ESTIMATED VOLUME (IN LITERS): 0.43 liters

DECORATION: The rim has five rectangular engraved panels marked by vertical engraved bands filled with tool punctates. Within each rim panel is a single horizontal engraved and ticked line, an attached vertical engraved band filled with punctates, and a single curvilinear interlocking scroll line that has two short vertical engraved bands filled with tool punctates (Figure 419).

On the vessel body, there is a continuous curvilinear engraved scroll with hatched attachments, that meanders around either five sets of vertical engraved bands filled with punctates or four opposed sets of hatched zones (Figure 419). One scroll section has a second engraved line instead of a hatched zone that has triangular tick marks on it.

TYPE: cf. Natchitoches Engraved

Figure 419. cf. Natchitoches Engraved bowl, Deshazo site, Burial 6.

NON-PLASTICS: grog, bone, and hematite

VESSEL FORM: Compound bowl

RIM AND LIP FORM: Direct rim and a rounded, exterior folded lip
CORE COLOR: F (fired in a reducing environment and cooled in the open air)

INTERIOR SURFACE COLOR: brown (7.5YR 5/3)

exterIOR surface color: strong brown (7.5YR 5/6); fire clouding on the rim and base

wall thickness (rim, body, and base in mm): 6.3 mm, rim

interior surface treatment: smoothed

exterIOR surface treatment: smoothed on the lower panel and body

height (in cm): 11.2

orifice diameter (in cm): 14.5

Diameter at bottom of rim or neck (in cm): 13.5

Base diameter (in cm): 4.0

estimated volume (in liters): 1.28 liters

decoration: The upper rim panel has 11 alternating upper and lower engraved triangles filled with either hatched (upper set) or cross-hatched (lower set) lines. The lower rim panel has 12 rectangular panels defined by narrow bands of engraved cross-hatching. Alternating panels either have a central small engraved circle or are plain (Figure 421).

Type: Unidentified engraved fine ware vessel

Figure 421. Engraved compound bowl of unknown type, Deshazo site, Burial 8.

Site name or site number: Deshazo

Vessel no.: Burial 9 (Turner); Fields (1995:203) refers to this as Vessel 5

Non-plastics: grog and bone

Vessel form: Jar

Rim and lip form: Everted rim and a rounded lip

core color: G (fired in a reducing environment and cooled in the open air)
INTERIOR SURFACE COLOR: very dark gray (10YR 3/1)

EXTERIOR SURFACE COLOR: brown (7.5YR 4/3)

WALL THICKNESS (RIM, BODY, AND BASE IN MM): 7.0 mm, rim

INTERIOR SURFACE TREATMENT: smoothed

EXTERIOR SURFACE TREATMENT: none

HEIGHT (IN CM): 13.5

ORIFICE DIAMETER (IN CM): 14.5

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): 12.5

BASE DIAMETER (IN CM): 9.0

ESTIMATED VOLUME (IN LITERS): 1.18 liters

DECORATION: The rim has faint vertical brushing marks. There is a horizontal appliqued fillet at the rim-body juncture, and four panels on the vessel body defined by vertical appliqued fillets that extend from the rim-body juncture to the base. The body panels have diagonal brushing marks (Figure 422). Each panel has a centrally placed appliqued node.

TYPE: Unidentified brushed-appliqued utility ware

Figure 422. Brushed-appliqued jar, Deshazo site, Burial 9.

Vessel Recordation Forms, Stephens Farm Site (41NA202)

The Stephens Farm site (41NA202) was excavated by Robert L. Turner, Jr. and his father in 1940-1941 (Turner 2008). Turner (2008:9) is of the opinion that the ceramic vessels and vessel sections were from “at least one shallow grave of an individual that had been plowed up and the grave offerings scattered from the yearly cultivation of the area.” In addition to the ceramic vessels, the Turner’s recovered more than 7240 glass trade beads and two silver beads.

The six vessels from the Stephens Farm site include both fine wares and plain wares. The engraved fine wares are of the Natchitoches Engraved (n=1) and Patton Engraved types (n=1), both types found in Historic Caddo contexts in the Neches-
Angelina River basins, especially in contexts dating after ca. A.D. 1720. The plain wares include a plain bowl and three plain bottles, all small in size.

SITE NAME OR SITE NUMBER: Stephens Farm

VESSEL NO.: none

NON-PLASTICS: grog, bone, and hematite

VESSEL FORM: Bowl

RIM AND LIP FORM: Direct rim and a rounded, exterior folded lip

CORE COLOR: F (fired in a reducing environment and cooled in the open air)

INTERIOR SURFACE COLOR: brown (10YR 5/3)

EXTERIOR SURFACE COLOR: brown (7.5YR 5/4)

WALL THICKNESS (RIM, BODY, AND BASE IN MM): 6.7 mm, rim; 4.4 mm, body

INTERIOR SURFACE TREATMENT: smoothed

EXTERIOR SURFACE TREATMENT: smoothed

Vessel Recordation Form, Indian Creek Site, Nacogdoches County, Texas

The Indian Creek site is located in western Nacogdoches County (Robert L. Turner, Jr., 2009 personal communication). Its exact location is unknown and the site has not been formally recorded with the State of Texas. The one vessel from the site is a punctated jar.

SITE NAME OR SITE NUMBER: Indian Creek

VESSEL NO.: none

NON-PLASTICS: grog

VESSEL FORM: Jar

RIM AND LIP FORM: Direct rim and a rounded lip

CORE COLOR: A (fired and cooled in a high oxygen environment)

INTERIOR SURFACE COLOR: very pale brown (10YR 7/4)

EXTERIOR SURFACE COLOR: very pale brown (10YR 7/4)

WALL THICKNESS (RIM, BODY, AND BASE IN MM): 6.2 mm, rim
INTERIOR SURFACE TREATMENT: smoothed

EXTERIOR SURFACE TREATMENT: none

HEIGHT (IN CM): 4.7

ORIFICE DIAMETER (IN CM): 5.7

DIAMETER AT BOTTOM OF RIM OR NECK (IN CM): 5.7

BASE DIAMETER (IN CM): 2.9

ESTIMATED VOLUME (IN LITERS): 0.16 liters

DECORATION: There are vertical rows of tool punctations covering the rim and vessel body surface (Figure 429).

TYPE: Unidentified punctated utility ware

Figure 429. Punctated jar, Indian Creek site, Nacogdoches County, Texas.

Sabine River Basin Site

The Bison site, Area B (16SA30/X16SA4), was excavated by Southern Methodist University prior to construction of Toledo Bend Reservoir (Woodall 1969). This Late Caddo site was situated on a low bluff overlooking Brown’s Bend of the Sabine River.

During the excavations, Woodall (1969:29-39) identified a midden deposit on the bluff, as well as 16 burials, two large pits filled with trash (likely storage pits), a hearth, five small (38-53 cm in diameter) pits with charred deposits, and 14 post holes, possibly associated with an arbor structure. The burials included a variety of funerary offerings, including 84 ceramic vessels (identified by Woodall [1969] as Wilder Engraved, Ripley Engraved, Taylor Engraved, Belcher Engraved, Glassell Engraved, Pineland Punctated- Incised, Pease Brushed-Incised, Belcher Ridged, Karnack Brushed-Incised, Harleton Appliqued, and Cass Appliqued, along with several plain vessels), two sandstone ear spools, and 31 arrow points (Bassett and a corner-notched form). According to Jeff Girard (August 2009 personal communication), additional burials were excavated at the site by persons unknown after Woodall’s work was completed and before the site was inundated.
Vessel Recordation Form, Bison, Area B (16SA30/X16SA4)

The one Caddo vessel from the Bison, Area B site in the present collections is a plain bone-tempered jar.

SITE NAME OR SITE NUMBER: Bison, Area B

VESSEL NO.: 7

ESTIMATED VOLUME (IN LITERS): 0.81 Liters

DECORATION: Plain (Figure 430)

TYPE: Unidentified plain ware vessel

Figure 430. Plain jar, Bison site, Area B.
Pottery Vessel Comparisons and Ceramic Traditions

The majority of the 463 pottery vessels in the Turner and Johns collections (not including vessels from the Johns site, see Perttula et al. 2010) are from Late Caddo period Titus phase (ca. A.D. 1430-1680) cemeteries in the Big Cypress Creek basin in Northeast Texas (see Figures 1 and 6). As such, they are dominated by engraved fine ware vessels of different size ranges, particularly a number of varieties of Ripley Engraved carinated bowls and compound bowls, a diverse set of decorated utility ware cooking jars and bowls, many of them decorated with brushing, and a low proportion of plain wares. They are also grog-tempered ceramic vessel assemblage, but with a significant use of crushed and burned bone temper or hematite temper, and the majority of vessels were fired in a low oxygen or reducing environment.

There are also assemblages from two post-A.D. 1680 Historic Caddo period in the Angelina River basin in East Texas (Nacogdoches County), but they comprise less than 5% of the vessels under consideration in this report (see Table 1).

Finally, the pottery vessels from the Graydon Adkins site, No. 2, are apparently from a Middle Caddo period cemetery (see Turner 1997). There are a few vessels, based on decorative elements, from the Rumsey and Harold Williams site that may also be from Middle Caddo burials at these sites (see below).

In the discussions that follow, the analyses of the character of the different mortuary assemblages is based primarily on the sites with the largest samples of vessels. In particular, our interest is in examining differences and similarities in technological, functional, and stylistic attributes between mortuary vessel assemblages in post-15th century Titus phase and Allen phase cemeteries in the Big Cypress and Angelina River basins, respectively, and also consider the character of the one discrete Middle Caddo (ca. A.D. 1200-1400) cemetery at Graydon Adkins, Site 2.

Vessel Forms

Titus phase mortuary vessel assemblages in the Big Cypress Creek basin are dominated by carinated bowls and jars, i.e., serving bowls and cooking pots. These vessel forms comprise 66.3% of the assemblages (Table 2). Other important vessel forms in these Titus phase assemblages are bottles (13.3%), bowls (10.3%), and compound bowls (9.3%). Rare vessel forms include ollas at two sites and a single chalice at the Tuck Carpenter.

*percentage

The one Middle Caddo period mortuary vessel assemblage in the Big Cypress basin, conversely, is dominated by bowls and bottles. These vessel forms comprise 72.6% of the vessels from Graydon Adkins, Site 2 (see Table 2). Jars and carinated bowls represent only 27.3% of the vessels documented from this cemetery.
The two Allen phase mortuary vessel assemblages considered in this report are dominated by jars and bowls (see Table 2). They account for 73.9% of the vessels in the small sample from the Deshazo and Stephens Farm sites. Bottles and carinated bowls were much less frequently placed as funerary offerings in the burials of the Southern Caddo peoples living in the Angelina River basin.

Much larger Titus phase (n=1347) and Frankston-Allen phase (n=415) mortuary vessel assemblages from the region (see Perttula 2000:Table 7) confirm the relative proportions of the different vessel forms in cemeteries from these two different groups in the region. In the larger Titus phase vessel sample, carinated bowls and jars represent 82% of the mortuary vessels, compared to 66% from our sample. Conversely, jars and bowls comprise 72% in the larger Frankston-Allen phase vessel sample and almost 74% in the vessel sample discussed in this report.

**Vessel Sizes**

The ceramic vessels from the Titus phase sites documented in this report were made in a wide range of sizes, based on volume (as well as orifice diameter and overall vessel height). These vessels range from as small in volume as 0.1 liters (bowls and a single bottle) to as large as 18.4 liters (an utility ware jar).

Among the different forms of vessels, generally speaking, the principal vessel forms are on average less than 1.0 liter in volume (Table 3). This includes 31% of the jars, 56% of the carinated bowls and 39% of the compound bowls, 100% of the bottles, and 92% of the bowls. The median vessel size for the bottles is 0.26-0.50 liters, while the median peak size of the bowls is 0.11-0.25 liters. The one chalice falls in the 0.26-0.50 liter range, while the two ollas range between 1.51-2.25 liters in volume. The large (greater than 3 liters) and very large (greater than 6 liters) vessels at the various Titus phase sites are exclusively jars, carinated bowls, and compound bowls.

Among the jars, they occur in five size ranges, dominated by small to large volume jars, with occasionally a very large to extra large jar placed in a burial: small (0.11-1.0 liters, 31%), medium (1.01-3.0 liters, 38.9%), large (3.01-5.25 liters, 9.2%), very large (6.01-7.75 liters, 9.2%), and extra large (9.26-18.5 liters, 11.1%). The very large and extra large jars, probably storage vessels, account for 20.3% of the Titus phase jars discussed herein. At the Johns site, 14.1% of the utility ware jars fall in these size categories (see Table 3).

Among the carinated bowls, there are five size ranges: small (0.11-0.50 liters, 20.3%, perhaps miniature offerings included with children and adolescents); medium-sized (0.51-1.25 liters, 40.6%); large (1.26-2.25 liters, 15%); very large (2.51-4.25 liters, 18.0%); and extra large (4.26-5.0 liters, 5.3%) (see Table 3). The medium to large sizes account for 55.6% of the engraved carinated bowls, and almost 23.3% of the carinated bowls are very large to extra large in size. The large to extra large sized carinated bowls—as well as the compound bowls—placed in Titus phase burials were likely originally employed to serve foods to groups of people, perhaps during feasts or other community ceremonies, as opposed to representing individual serving vessels.

The engraved compound bowls have four size ranges: small (0.26-0.50 liters, 2.8%, perhaps miniature offerings included with children and adolescents); medium-sized (0.51-1.25 liters, 47.2%); large (1.26-2.0 liters, 16.7%); very large (2.01-3.25 liters, 13.9%); and extra large (4.01-6.5 liters, 19.4%) (see Table 3). The medium to large sizes account for 63.9% of the engraved compound bowls, and a substantial 33.3% of the compound bowls are very large to extra large in size.

The Middle Caddo vessels from Graydon Adkins, Site 2 include one medium-sized jar (2.4 liters), a medium-sized carinated bowl (0.91 liters), two medium-sized bottles (0.36-0.68 liters), and five bowls that range in size from 0.35-0.98 liters. The absence of any large, very large, or extra large vessel sizes is notable by comparison to their abundance in Big Cypress Creek Titus phase mortuary vessel assemblages.

Allen phase vessels from the Deshazo and Stephens Farm sites are small to medium-sized (Table 4); the neckless bottles are miniatures. The largest vessels in these
two assemblages are jars and compound bowls, a characteristic also apparent in the Titus phase vessel assemblages.

Rim and Lip Form

Distinct rim and lip forms characterize each of the different vessel forms at the Titus phase sites (Table 5). These differences in the vessel-rim profile, as well as the treatment of the lip of the vessel itself, are presumably related to the form and apparent intended function of these vessels, with different rim-lip co-associations for serving versus cooking/storage vessels.

Totals 113 151 39 35 46 2 1

J=jar; CB=carinated bowl; CPB=compound bowl; Bw=bowl; Bt=bottle; O=olla; Ch=chalice
*percentage; bolded and underlined classes represent significant representation by vessel ware

Carinated bowls, bowls, and bottles (as well as the few ollas) tend to have direct rims, while jars and compound bowls (the upper rim panels) tend to have everted rims. Inverted rim vessels are restricted to carinated bowls and bowls (7.9-8.6%, see Table 5). Carinated bowls primarily are characterized by rounded lips that are exterior folded (i.e., folded out away from the vessel surface). Compound bowls have both simple rounded lips as well as exterior folded lips. Bowls tend to have direct rims and rounded lips, as do Titus phase bottles. Jars, on the other hand, have primarily everted rims, with rounded lips; exterior folded lips are found on 22% of the jars (see Table 5).

The rim and lip forms of the Middle Caddo vessels from Graydon Adkins, Site 2 are generally similar to the later Titus phase vessel assemblages, with the exception that none of the vessels have exterior folded lips and there are no inverted rim vessels. Jars have both everted and direct rims with rounded lips (n=2); bowls (n=5) have direct rims and rounded lips, as do the bottles (n=2), and carinated bowls (n=1).

Allen phase vessels also have a range of rim and lip profiles (Table 6). Bowls usually have direct rims and rounded lips—as was the case with the Titus phase bowls—
and jars have everted rims and rounded lips. Exterior folded lips are a common feature on Allen phase carinated bowls, and the one compound bowl also has an exterior folded lip (see Table 6). Overall, where the Titus and Allen phase rim and lip form attributes differ is in the relative proportions of inverted rim vessels—3.9% of the Titus phase vessel sample compared to 17.6% of the Allen phase vessels—and exterior folded lips: 45.2% of the Titus phase vessels and only 23.5% of the Allen phase vessels (see Tables 5 and 6).

*percentage; bolded and underlined classes represent significant representation by vessel ware*

A few of the different ceramic wares in the Titus phase vessel assemblages have distinctive rim and lip attributes. This includes scalloped and Redwine mode lips; spool necks and bottle collars; effigy heads and tab tails; rim peaks (where the rim has been quad rated by four peaks, where “the rim is drawn up into four peaks without, however, giving the vessel a square mouth” [Krieger 2009:37]); body peaks; handles of various attachment forms (strap, loop, and lug); and suspension holes (Table 7).

*percentage

As Table 7 indicates, these distinctive formal attributes are confined almost exclusively to the fine wares and utility wares. Redwine mode and scalloped lip vessels, as well as spool necks and collars, are attributes only recognized in the engraved fine ware vessels, as are body peaks in fine ware bottles. Effigy vessels are equally represented (1.3-1.6% of these wares) in the fine wares and the utility wares. Rim peaked vessels comprise 3.2% of the fine wares in the Titus phase assemblages, and 5.9% of the utility wares; at the Johns site, 8.7% of the utility ware jars have rim peaks (Perttula et al. 2010:Table 7). Handles of any kind are rare in both the fine wares (0.6%) and utility wares (2.9%), as are fine ware (0.8%) and utility ware (0.3%) vessels with suspension holes.
Temper and Paste

Between 97-100% of the fine ware, utility ware, and plain ware vessels from the Titus phase mortuary assemblages are tempered with grog (or crushed pieces of fired clay) (Table 8). Other important temper inclusions include burned bone (especially among the utility wares) and hematite (also most common among the utility wares). The vessels must have been fired at a high enough temperature and for a sufficient length of time that almost all organic materials in the paste were successfully combusted; the only exception were two fine ware vessels tempered with grog that still had visible charred organic remains in the paste (Table 8).

Less than 1% of the Titus phase vessels have a sandy paste (see Table 8). This suggests, as was also the case at the Johns site (Pettula et al. 2010:Table 8), that a naturally sandy clay was not sought out by local Caddo potters for the manufacture of
either fine wares, utility wares, or plain wares, although such alluvial clays were employed only rarely in vessel manufacture.

Despite the apparent homogeneity of the temper recipes documented for the Titus phase vessel assemblage as a whole, there are considerable divergences between specific sites in the use of either bone or hematite temper in the vessel paste (Table 9). The most common use of bone temper is in Titus phase sites in the Greasy Creek and Tankersley Creek drainages (see Figure 6), while the use of crushed pieces of hematite in vessel manufacture is most frequent at the Cecil Guest site in the Dry Creek basin, at the Rumsey and Keeling sites on Greasy Creek, and the B. J. Horton site on Big Cypress Creek (see Figure 6). At the Johns site on Prairie Creek, bone temper use was also considerable (34.3%), and 11.2% of the vessels in this mortuary assemblage have hematite temper (Perttula et al. 2010:Table 8).

The vessels from the Graydon Adkins, Site 2, also on Greasy Creek, are tempered with grog (100%). Bone temper was a frequent constituent (45.4%), but hematite (9.1%) was only rarely added as a temper to the paste of this Middle Caddo period mortuary assemblage.

The Allen phase vessels in all three ceramic wares are also predominantly tempered with grog (Table 10). However, both bone temper (63% of the vessels, especially the utility wares) and hematite temper (47% of the vessels, especially the plain wares) are common aplastics. Not too surprisingly, therefore, both Allen phase sites discussed in this report occur within the area (middle Sabine and Angelina-Attoyac stream basins) of a recently defined Late Caddo bone-tempered brushed ceramic tradition in East Texas (Perttula 2009:Figure 6-70).

Firing Conditions

Regardless of the vessel ware, the ceramic vessels placed in the burials at the different Titus phase mortuary assemblages were fired almost exclusively in a reducing or low oxygen environment, probably smothered in the coals (Table 11). By ware, the percentage of vessels fired in a reducing environment ranges from 85.2-95.8%, with the highest proportions among the fine wares and utility wares; the same firing conditions have been documented in the mortuary vessels from the Johns site (Perttula et al. 2010:Table 9).

*percentage; bolded and underlined classes represent significant representation by vessel ware

As is the case with other Titus phase ceramic assemblages in the Big Cypress Creek basin (see Perttula 2005; Perttula et al. 1998, 2008, 2010), the majority (44.4-70.8%) of the vessels (especially the utility wares and fine wares) were actually fired in a reducing environment, but then cooled in a high oxygen environment (see Table 11). This led to the oxidation of a thin band at the vessel surface of either one (32.2%, firing conditions G and H) or both (32.5%, firing condition F) surfaces (see Table 11), leaving a dark gray to black core and a lighter brown to yellowish-brown vessel surface. The carinated bowls and bowls tended to be fired and cooled such that both vessel surfaces were oxidized, while utility wares must have been fired differently, since it is more common to see utility ware vessels with a thin oxidized band at the outer vessel surface (firing condition G, see Table 11); perhaps these vessels were fired with the orifice facing down into the coals (the same firing/cooling tendencies among the different wares are documented in the Johns site vessels, Perttula et al. 2010:Table 9).

All of the vessels from Graydon Adkins, Site 2 are fired in a reducing environment. Almost 73% of these vessels have then been cooled in a high oxygen environment, leading to the oxidation of a thin band at the vessel surface of either one (18.2%) or both (54.5%) surfaces, leaving a dark gray to black core and a lighter brown to yellowish-brown vessel surface.
Although the sample size of Allen phase vessels is small, the examination of firing conditions suggest that in a general way, the vessels were fired in the same manner as the Titus phase vessel assemblages. This is to say, a significant proportion of the Allen phase vessels (73.7%) have been fired in a reducing environment, and most of these vessels (68.4%) have also been subsequently cooled in a high oxygen environment (Table 12). Nevertheless, the overall frequency of vessels fired in a high oxygen environment is much more substantial in the Allen phase vessel assemblages (26.3%) than is the case among these Titus phase vessel assemblages (4.8%), or in the Titus phase vessels at the Johns site (4.2%).

Decorative Methods

Fine Wares

The fine ware vessels from the Titus phase sites in the Big Cypress Creek basin are decorated almost exclusively with engraved designs on the rim and/or body. Trailed (0.4%) and red-slipped (1.2%) fine wares are also present. Less than 7% of the engraved fine wares are either red-slipped, punctated under the lip, or have appliqued elements on the vessel rim or body (Table 13). The low occurrence of red-slipped engraved vessels, as well as vessels decorated simply with red-slipping, suggest that the Titus phase ceramic vessel assemblages are part of an eastern Titus phase ceramic tradition (Perttula 2005:404). The eastern Titus phase ceramic tradition includes “sites from the Prairie and Greasy Creek areas and Big Cypress Creek downstream to the Lake O’ the Pines area” (Perttula 2005:404), as well as the Dry Creek area (see Figure 6). At the Johns site in the Greasy Creek area, only 2.1% of the fine ware vessels have a red slip (Perttula et al. 2010:Table 11). The Allen phase fine ware vessels are uniformly engraved (Table 13).

</tbody>
</table>
Utility wares at the Titus phase sites include 20 different combinations of decorative methods, including brushing, punctation, appliqué, incision, neck banding, and pinching (see Table 13). Rarely does a utility ware vessel only have one form of decoration, either on the rim and/or on the vessel body (see below for a more detailed consideration of the decoration of utility ware vessels). Vessels with punctations (either as the sole decorative method or in combination with other decorations) are predominant in the utility wares (55.7%), along with vessels having brushed, appliqued, or incised decorations (see Table 13). The relative frequency of brushed ceramic vessels at the
various cemeteries (37.8%) is another indication that the vessels placed in the burials are the product of an eastern Titus phase ceramic tradition that is more commonly dominated by utility wares with brushed rims and/or vessel bodies (Perttula 2005:405).

Neck banded vessels comprise 6.6% of the Titus phase utility wares, and 0.9% have a pinched decoration (see Table 13). At the Johns site, 11.0% of the utility ware vessels are neck banded, and 2.8% have pinched decorations (Perttula et al. 2010:Table 11).

Allen phase utility ware vessels from the Deshazo and Stephens Farm sites are principally brushed and/or appliqued (see Table 13). There is one jar decorated solely with punctations across the rim and vessel body.

At Graydon Adkins, Site 2, the fine ware vessels (n=3) are engraved. The utility wares (n=2) include either punctated and incised vessels. Middle Caddo vessels at the Rumsey site are red-slipped (n=1, Vessel 56), incised (n=2, including Dunkin Incised, Vessel 30; see also Vessel 50), incised-punctated (n=2, Vessels 36 and 46), and punctated-appliqued (n=1, Vessel 42), while only engraved vessels (n=4) at the Harold Williams site (three from Area A, see Turner and Smith 2003, and from a general collection) can be confidently identified as having Middle Caddo decorative styles.

The different identified and currently recognized fine ware and utility ware ceramic types in the vessel assemblages from the various documented sites in the Big Cypress Creek and Neches-Angelina River basins are provided in Table 14.

*x=present*  
*Middle Caddo ceramic types; **, likely an import from the Neches River basin in East Texas; +, includes a chalice*  

Most of the vessels in this report are from Late Caddo period Titus phase burial features at a number of sites in the Big Cypress Creek basin. The fine wares from these Titus phase contexts are dominated by a number of varieties of Ripley Engraved carinated bowls, compound bowls, bowls, and bottles—and there are several varieties that are predominant (see below) in the assemblage as a whole. Other resident engraved types include two varieties of Turner Engraved, a new type, Wilder Engraved, and Johns Engraved. Three other engraved fine ware types—Bailey Engraved, Belcher Engraved, Hodges Engraved, Simms Engraved, and Taylor Engraved—may be trade wares from Belcher phase Caddo groups that lived to the east along the Red River below the Great Bend, and Keno Trailed vessels may also have been manufactured in this area beginning in the late 17th century (see Schambach and Miller 1984). The Poynor Engraved vessel in the Big Cypress mortuary vessel assemblages is likely a Late Caddo Frankston phase trade ware from the upper Neches River basin in East Texas. Hood Engraved was defined by Perttula (2009) from Frankston phase vessel assemblages in the upper Neches River basin in East Texas; it is not clear, absent chemical and/or petrographic studies of the vessel paste, if the Hood Engraved effigy vessel is a local and resident engraved fine ware type among Big Cypress Creek Titus phase ceramic assemblages.
In addition to Ripley Engraved, \textit{var. Ripley} bottles, all currently defined varieties of Ripley Engraved are represented at the Titus phase sites in the present documented collections (Table 15). In assemblages with more than a sample of nine vessels that have been identified to variety status, the most common Ripley Engraved varieties are \textit{var. Carpenter}, \textit{var. McKinney}, \textit{var. Galt}, and \textit{var. Gandy}.

*K=Keith site; G=Guest site; W=Harold Williams site; H=B. J. Horton; K=Keeling site; LSL=Lone Star Lake site; R=Rumsey site; TC=Tuck Carpenter site
**=percentage; +=incised decoration

At the Keeling, Lone Star Lake, and Rumsey sites (as well as the Keith site), Ripley Engraved, \textit{var. McKinney} is the predominant variety (see Table 15). At the Tuck Carpenter site, the dominant variety is Ripley Engraved, \textit{var. Carpenter}. No one Ripley Engraved variety is dominant at the Johns site, in the Prairie Creek drainage, but var. Galt, var. Gandy, var. Carpenter, and var. Cash are the most common varieties (Perttula et al. 2010:Table 12). It seems to be the case that each site in the Titus phase mortuary vessel assemblages has its own distinctive relative proportion of Ripley Engraved varieties. These differences in the popularity of stylistic motifs may represent distinct stylistic preferences among Caddo potters widely distributed across the Big Cypress Creek basin; the existence of different communities of contemporaneous Caddo peoples, with each community using a distinct suite of vessel motifs; differences in belief systems
and iconography (Gadus 2009); and changes over time in the popularity of particular rim motifs (or varieties of Ripley Engraved) (see discussion in Turner 1978; Thurmond 1990; Perttula 1992). If changes over time in the use of specific stylistic motifs is not a principal factor accounting for these differences, it does not help that currently only the Tuck Carpenter, Harold Williams, and Alex Justiss sites have radiocarbon dates from Titus phase features. These dates (n=5) range widely from cal AD 1430-1640 (Perttula 2005:Table 11-2).

Interior engraved vessels are also present in the Titus phase vessel assemblages. For example, at the Tuck Carpenter site, 10.3% of the engraved fine wares have an interior engraved line encircling the carination point. All of these vessels are Ripley Engraved carinated bowls, including var. McKinney (n=2), var. Gandy (n=3), var. Galt (n=3), var. Cash (n=1), var. Carpenter (n=4), and var. Reed (n=2). At the Johns site, 8% of the fine wares—six different varieties of Ripley Engraved, particularly var. McKinney, var. Galt, and var. Williams—have an interior engraved line (Perttula et al. 2010:261).

The engraved vessels from the Middle Caddo Graydon Adkins, Site 2 include one with cross-hatched geometric lines, another with an engraved panel, and a third vessel with vertical and cross-hatched engraved lines. None of these vessels can be currently identified to a defined Caddo area fine ware type. At the Harold Williams site. Middle Caddo period engraved fine wares include single examples of Nacogdoches Engraved (a bottle with an engraved rattlesnake motif), Spoonbill Engraved (a red-slipped carinated bowl with interior engraved pendant triangles on an interior thickened rim), and a Washington Square Paneled carinated bowl; there is also a carinated bowl with an engraved rectilinear design.

The Allen phase engraved fine wares from the Deshazo and Stephen Farm sites include Patton Engraved, Natchitoches Engraved, and cf. Hume Engraved (see Table 14). Patton Engraved is the principal engraved fine ware in Allen phase ceramic assemblages (Fields 1995).

Utility Wares

The principal utility ware types in the Titus phase vessel assemblages include Bullard Brushed or Winfield Brushed (see Krieger 2009; Perttula et al. 2010), La Rue Neck Banded, and Harleton Appliqued, with moderate amounts of Pease Brushed-Incised, Mockingbird Punctated, McKinney Plain, and Maydelle Incised (see Table 14). We suspect that these six types are resident utility wares for the Titus phase Caddo communities living in the Big Cypress Creek basin. Karnack Brushed-Incised and Moore Noded vessels may be trade wares from Belcher phase Caddo groups that lived to the east along the Red River below the Great Bend (Webb 1959; Girard 2007). Killough Pinched (see Table 14) is a utility ware usually associated with Frankston and Allen phase Caddo communities in the Neches-Angelina River basins in East Texas.
Much of the decorated utility wares found in Titus phase mortuary vessel assemblages has been typologically identified over the years as “Miscellaneous Fulton Aspect [Late Caddo] Utility Pottery” (Suhm and Jelks 1962:Plates 79 and 80; see also Thurmond 1990), which has hindered the full appreciation of the stylistic, temporal, and stylistic diversity that exists among these decorated utility wares; it has also hampered any consistent typological identifications or definitions. The diversity apparent in the decorated utility wares has a considerable potential to shed light on the existence and spatial distribution of communities of Caddo potters sharing or not sharing utility ware decorative practices and traditions from both short-term and long-term temporal scales.

In order to more systematically categorize the decorated utility wares in the collections, specifically the utility ware jars from Titus phase cemetery contexts, we devised a rim and body coding system to sort the unique rim and body decorative elements and motifs found on these vessels. This was done with the idea of better characterizing the relative proportions (and locations of different decorative elements and motifs on the vessels themselves) of the different decorative elements and motifs in the present utility ware vessel assemblages. Rim codes on the utility ware jars begin with 01, for plain rims, and at present there are 40 different identified rim codes (Table 16). Body codes also begin with 01, for utility ware vessels with plain bodies, and extend to 34. To categorize the decoration of utility ware vessels, it is necessary to list both rim and body codes, with the rim code listed first in the sequence; for example 02/01 is a jar with a row of tool punctates beneath the lip only (02) and a plain body (01).

**Table 16.** Titus phase utility wares (jars), decorative elements and motifs, rim and body codes, sites in Camp, Upshur, and Titus counties.

The utility ware jars from the mortuary vessel assemblages excavated from the Titus phase sites discussed in this report are classified using the rim/body codes listed in Table 16. Table 17 includes the rim/body codes for the sample of 109 jars, the sites where the different rim/body coded vessels are from, as well as current ceramic type assignments based primarily on Suhm and Jelks (1962).

</table>

* There were also seven bowls and/or carinated bowls with utility ware designs

It is immediately apparent from an inspection of Table 17 that many of the rim/body code combinations identified in the Titus phase jars are not currently typologically identifiable, although they have distinctive and separable rim/body codes. The stylistic diversity in the Titus phase jars is apparent from the fact that the 109 vessels are represented by 91 different rim/body codes. Of these rim/body code combinations, only 10 (comprising only 23% of the vessel sample) are represented by more than two vessels in the jar assemblage: 07/05 (rows of tool punctations/vertical incised, n=4 vessels); 05/03 (horizontal brushed/vertical brushed, n=3); 07/03 (rows of tool punctations/vertical brushed, n=3); 05/01 (horizontal brushed/plain body, n=3); 18/10 (vertical appliqued/vertical appliqued ridges, n=2); 01/10-26 (plain rim/vertical appliqued ridges and appliqued ridge chevrons, n=2); 13/01 (neck banded/plain body, n=2); 19/01 (random tool punctations/plain body, n=2); 16/01 (four rows of tool punctuations/plain body, n=2); and 04/01 (two rows of tool punctuations/plain body, n=2).

Were one so inclined, whether they be a typological “lumper” or a “splitter,” use of the rim/body codes could be used—in conjunction with available information on the temporal context and spatial distribution of the different rim/body code classes—to redefine the typological character of Titus phase utility ware jars. Such an attempt is beyond the scope of the current vessel documentation project. Nevertheless, this is certainly feasible (and well worth exploring) given the large numbers of Titus phase vessels that have been documented in detail in recent years (cf. Gadus and Fields 1996; Cast et al. 2006; Perttula 2005, 2006; Perttula et al. 1998, 2007, 2008, 2009, 2010; Perttula, Walters, and Nelson 2009; Perttula and Sherman 2009; Rogers et al. 2003), as Caddo ceramic typological refinements (as an example, see the descriptive classification proposed Schambach et al. [n.d.] for southern Arkansas Caddo vessels) would be useful in multiple ways to better understand the Titus phase archeological record and the Caddo peoples that lived in Northeast Texas.

The Titus phase jars tend to be decorated on both the rim and the vessel body, as 64.2% of the vessels in our sample have rim and body decorations (see Table 17). A
smaller set of jars are decorated only on the rim (30.3%), and only 2.8% are decorated only on the vessel body, either with appliqued elements or incised lines.

Of those vessels decorated on both the rim and the body, the rim decoration is frequently done with a different decorative method than the body decoration, as in a punctated rim and a vessel body with incised lines. The rim and body decorated jars from the Titus phase sites include 13 different kinds of similar rim codes (i.e., punctated, incised, punctated-incised, etc.), with many different body codes (see Table 17). The most important rim/body code classes in the rim-body decorated jars are those with punctated rims (22%), brushed rims (11.9%), incised rims (5.5%), and neck banded rims (4.6%), and a plethora of body decorations, including incised lines, appliqued elements, and brushing.

Few specific rim/body code classes are proportionally abundant in the Titus phase jars, and even with the lumping into groups of rim-body code classes (i.e., all vessels with punctated rims and appliqued bodies, regardless of the decorative elements of either), only seven different rim/body code groups are represented by more than 2.8% of the rim-body decorated jars: punctated rim/appliqued body (8.3%, no one rim/body class is dominant); punctated rim/incised body (5.5%, 07/05 is the dominant rim/body code class); brushed rim/brushed body (4.6%, 05/03 is the dominant rim/body code class); brushed rim/appliqued body (4.6%, no one rim/body class is dominant); incised rim/incised body (2.8%, no one rim/body class is dominant); appliqued rim/appliqued body (2.8%, 18/10 is the dominant rim/body class); and brushed-appliqued rim/appliqued body (2.8%, no one rim/body code class). More specifically within the various groups of rim and body decorated jars, the four most common rim/body code jar classes for the Titus phase rim and body decorated jars are 07/03 (tool punctated rows on the rim/vertical brushed body); 07/05 (tool punctated rows on the rim/vertical incised lines on the body); 05/03 (horizontal brushed rim/vertical brushed body); and 18/10 (vertical appliqued ridges on the rim/vertical appliqued ridges on the body) (see Table 17).

Titus phase jars with decorations only on the rim are dominated by those with punctations (9.2%), punctations and incised lines (7.3%), or incised lines (4.6%), with a few vessels (between 0.9-2.8% for each rim coded class) having brushed, neck banded, punctated-appliqued, or appliqued rim decorations (see Table 17). The rim punctated vessels typically have rows of punctations of various sorts, usually punctations made with a tool of some kind. The rim punctated-incised jars are not dominated by any particular rim/body code combination, although rows of punctations and incised elements (i.e., triangles, panels, and scrolls) filled with tool punctations are important characteristics of these jars. The rim incised jars primarily have simple geometric elements (i.e., vertical, horizontal, opposed and diagonal lines).

Lip Notching

Only two of the 463 vessels discussed in this report (0.4%) have lip notching. The first is a post-A.D. 1500 Simms Engraved carinated bowl from the Lone Star Lake site (41MX65), while the other is a late 17th-early 18th century Keno Trailed, var. Phillips
bowl (cf. Schambach and Miller 1984) from the Keeling site. In the present set of vessel assemblages, lip notching appears to be an infrequent post-16th century form of vessel lip treatment.

**Pigments**

The ceramic fine ware vessels placed in the Titus phase and Allen phase burials frequently had a clay pigment rubbed in the engraved designs. In the case of the Titus phase vessels, a total of 34.8% of the fine wares from the sites have such pigments (Table 18); by comparison, 47.1% of the fine wares in the Titus phase vessels from the Johns site have pigments (Perttula et al. 2010:Table 13). Approximately 22% of the Allen phase fine wares (Patton Engraved and Taylor Engraved vessels) discussed in this report have a clay pigment rubbed into the engraving (Table 19).

The pigments added to the surface decorations of the fine wares include a white kaolin clay mixture and a red hematite clay mixture, with the white kaolin clay pigment being the preferred pigment (see Tables 18 and 19). Overall, the white kaolin clay pigment is the dominant pigment among fine ware carinated bowls (all varieties of Ripley Engraved, particularly var. McKinney, var. Galt, and var. Carpenter styles, along with a cf. Belcher Engraved vessel, a Taylor Engraved vessel from the Rumsey site), compound bowls (primarily Turner Engraved, var. Turner vessels), and the single Turner Engraved chalice from the Tuck Carpenter site. Red clay pigments are proportionally more common on the Titus phase fine ware bottles (including Wilder Engraved, Ripley Engraved, Hodges Engraved, Taylor Engraved, and Bailey Engraved vessels), the ollas (Wilder Engraved), and the compound or conjoined vessels, while white (as on a Johns Engraved bowl from the Tuck Carpenter site) or red clay pigments are equally represented among the engraved bowls; Ripley Engraved carinated bowls at the Tuck Carpenter sometimes have a red pigment. The Middle Caddo Nacogdoches Engraved bottle also has a red pigment.

Both white (Hah ki yo in the Caddo language) kaolin clay and a red (Hatinu in Caddo) hematite-rich clay were used as pigments that were rubbed in the engraved decorations of a number of fine ware vessels in northeastern Texas Caddo ceramic traditions. The use of pigments is a long-standing northeastern Texas Caddo ceramic practice (Campbell 1936:Table 7), applied to 14–16% of the fine ware vessels in the sample of vessels examined by Campbell (1936), but at much higher proportions at the Johns site, and clay pigments were also used as stand-alone offerings. For instance, elite burials in shaft tombs in Mound C (dating from ca. the mid-late ninth century A.D. to the late 13th-early 14th century A.D.) at the George C. Davis site (41CE19) had clay pigment offerings, including gray, green, red, purple, brown, yellow, and blue-gray colors (Story 1997:7–65).

Given the long-term importance of clay in Caddo burial rituals (Gonzalez 2005:57), particularly the washing of the body in red clay, and the possible significance of the color white as a counterpoint to red clay—indeed, the general symbolic significance of different colors as part of cosmological underpinnings of world views (cf.
Cobb and Drake (2008; Walker 2004)—the white clay may have been imbued with other than a life-giving force. This alternating preference for either red or white clay pigments has a resonance that extends beyond simple differences in pigment choice. Lankford (1992) discusses the importance of the use of these two colors in social, political, and cosmological dualisms or divisions in Southeastern societies, and it is likely that similar dualisms characterized prehistoric Caddo groups living at Caddo sites in northeastern Texas (Hart and Perttula 2010). In the context of the use of different colors of pigments in mortuary rituals, Lankford’s (1992:76–77) suggestion that the two colors symbolize the Lower world of change (red) and the Upper world of order (white) seems apt. It is probable as a means by which to explain the symbolic meaning and use of different pigments on mortuary vessels that cosmological and world views of the Caddo peoples living in northeastern Texas began to change some time after the early 15th century A.D. with different trends in pigment use, at least as seen in parts of the region (cf. Perttula 2009). These new cosmological and world views came to dominate beliefs and mortuary ritual usage after ca. A.D. 1560 and then continued into the Historic Caddo (post-A.D. 1650) period, in Allen phase mortuary vessels in any case, when fine ware engraved vessels always have white pigments rubbed in the design. Before that time, the use of red pigments appears to have been the predominant practice. In the case of the Titus phase vessels discussed herein, the preferred use of white clay pigment on certain kinds of vessels seems to have been in place by the early 15th century A.D.

Ethnographic accounts of the Caddo in the 17th and 18th centuries occasionally mention their use of red and white colors, paints, pigments, and feathers, but not in mortuary ceremonies. Red and white colors sometimes were used in opposition when applied as paints or pigments on material items in ceremonies, such as the calumet, where the pipe was placed upon a structure of three sticks painted red, and with a white deerskin placed across the sticks (Foster 1998). Red ochre was apparently a valuable commodity, and the Caddo mined it and carried it long distances between settlements (Hatcher 1927:209). Caddo men painted their faces with ochre to make themselves look redder (Hatcher 1927:176), but there are other instances where Caddo men painted their faces red and white (Foster 1998:206). White feathers—a sign of peace—were attached to calumets by the Caddo (Hatcher 1927:151). George Sabo (May 2009 personal communication) indicates that such examples of color use by the Caddo peoples “suggest an association of red and white with an ongoing cycle of life in which birth and death are subsumed.”

According to Bobby Gonzalez of the Caddo Nation of Oklahoma (April 2008 personal communication), “the red pigment means life and is very sacred among the Caddo. The red pigment is now used on peyote staffs, and during ritual ceremonies and prayer meetings, the red pigment is painted on and in the ears as well as on the top of the head in the middle of a man’s hair line, running from front to back; the women and men paint themselves in the morning when the sun comes up.”

The Caddo “also use the red pigment when someone dies. If the deceased is a man we paint them in the middle hair line and on the face on each side of the eyes; if the deceased is a woman, another Caddo woman would paint her under the eyes.”
“The white clay is also very sacred to the Caddo and was used for altars during Caddo peyote meetings. The white clay is used by the Caddo in doctoring people with cuts, burns, stomach problems, and other reasons” (Bobby Gonzalez, April 2008 personal communication). Even today, Caddo home places in Oklahoma have white and red clay altars, and some families still use these colors.

Pipes

There are ceramic elbow pipes (n=7) and platform pipes (n=3) in the Turner collection from the Tuck Carpenter (n=4), B. J. Horton (n=1), Harold Williams (n=3), and Rumsey (n=2) sites in the Big Cypress Creek basin. Turner also has a single engraved elbow pipe from the Deshazo site (41NA27) in the Angelina River basin.

Platform pipes

The three platform pipes in the Turner collection are from the Rumsey site and the Harold Williams/Albert Hilton site (Table 20). Two of the three platform pipes are plain, but the third (from Area A at the Harold Williams site in what appears to be a Middle Caddo period context, see Turner and Smith 2003:Figure 10b-c) has appliqued nodes on the platform (see below).

Table 20. Ceramic platform pipes from the Turner collection.

*PH=pipe height; PL=pipe length; SED=stem exterior orifice diameter; SID=stem interior orifice diameter; ST=stem thickness; BOD=bowl orifice diameter; BHT=bowl height; BT=bowl thickness

The plain platform pipe from the Rumsey site has a broad bowl with a flat lip centrally placed on the platform (Figure 431a). The butt end of the stem has a rounded plan view, but a definite prow in profile. The plain platform pipe from the Albert Hilton Farm/Harold Williams site (Area A) also has a broad and centrally placed bowl on the platform (Figure 431b), although it is much shorter in height than the Rumsey pipe, but the overall pipe length is 30% longer (see Turner and Smith 2003:Figure 10d). The butt end of the stem is rounded in plan and profile views, similar to the butt end of some varieties of Red River pipes.

Figure 431. Platform pipes: a, Rumsey site; b, Albert Hilton or Harold Williams site; c, Harold Williams, Area A.

The second platform pipe from the Harold Williams site is from Area A east (Turner and Smith 2003:Figure 10b-c). This pipe has a broad bowl with a rounded lip, as
well as a rounded butt end of the stem in profile and plan view. What distinguishes this pipe is the addition of five appliqued nodes around the back side (away from the stem opening) of the stem and encircling one side of the bowl (Figure 431c). These appliqued attachments (ca. 11.4 mm in height) resemble finger-like appendages.

**Elbow pipes**

Titus phase elbow pipes are in the Turner collections from the Tuck Carpenter, B. J. Horton, Harold Williams, and Rumsey sites (Table 21). These pipes are grog-tempered, have generally small bowls with flat lips, and several different bowl-stem profiles (Figure 432).

*PH=pipe height; PL=pipe length; SED=stem exterior orifice diameter; SID=stem interior orifice diameter; ST=stem thickness; BOD=bowl orifice diameter; BHT=bowl height; BT=bowl thickness

Figure 432. Elbow pipes from the Tuck Carpenter site: a, Burial 23; b, Burial 26; c, Burial 25; d, Burial 15. a is at the top left, and d is at the bottom right.

The Rumsey elbow pipe has an L-shaped profile (Figure 433a), and L-shaped elbow pipes are generally thought to be one of the earliest forms of elbow pipes in the Northeast Texas Caddo region, becoming popular in the period between ca. A.D. 1350-1450. The stem and bowl meet at almost right angles on the Rumsey pipe. A second L-shaped elbow pipe is present in Burial 26 at the Tuck Carpenter site, except this pipe, and pipe bowl, is much taller (Figure 433b, see Table 21).
Figure 433. Elbow pipes from the Rumsey, Tuck Carpenter, Harold Williams, and B. J. Horton sites: a, Rumsey site; b, Tuck Carpenter, Burial 26; c, Tuck Carpenter, Burial 23; d, Harold Williams, Burial N; e, B. J. Horton, Burial 4; f, Tuck Carpenter, Burial 25; g, Tuck Carpenter, Burial 15.

Variety A elbow pipes from Burial 23 at the Tuck Carpenter site and Burial N at the Harold Williams site have a distinctive attachment at the back end of the bowl, as if one end of a longer butt end of the pipe stem has been folded back onto the bowl itself. In most cases at the Johns site (Perttula et al. 2010), the stem of the Variety A elbow pipes is set at a slight angle to the bowl, or at a right angle to the bowl, as in the case of the elbow pipe from Burial 23 at the Tuck Carpenter site (see Figure 433c). The Harold Williams Variety A elbow pipe, however, has a short stem that meets the bowl at an acute angle (cf. Variety C elbow pipes at the Johns site) (see Figure 433d). These pipes tend to be about the same size as the other elbow pipes, with rounded stems under the bowl, but with a shorter and broader bowls that would have held more smoking materials (see Table 21).

The elbow pipe from the B. J. Horton site is similar to the Variety B elbow pipes defined by Perttula et al. (2010) from the John site. Variety B pipes are short in length and height, and the stem is not as rounded under the bowl as the Variety A pipes (see Figure 433e). The angle of the stem and bowl approaches a right angle. The pipe from Burial 25 at the Tuck Carpenter site is also a Variety B pipe (see Figure 433f and Table 21).

The final elbow pipe form (Variety E) is from Burial 15 at the Tuck Carpenter site. It has a rounded stem, a short bowl, and a short stem that meets the stem at an acute angle (see Figure 433g).

The Deshazo site elbow pipe was found in the right hand of the individual buried in Grave 6 (Good 1982:Figure 34; Napoleon 1995:Figure 53A-A’). It is a small pipe, tempered with bone and grog, with a Patton Engraved design on the bowl and stem. The pipe has a rounded lower stem, and the stem and bowl meet at near a right angle (Figure 434). An interesting attribute of this pipe is a narrow connecting ridge of clay between the bowl and the stem exterior orifice. The pipe is a maximum of 29.5 mm in height; the bowl is only 17.7 mm in height. The bowl has an exterior orifice diameter of 23.2 mm, and it is 4.2 mm thick. The exterior stem diameter is 20.0 mm.

Figure 434. Engraved elbow pipe from the Deshazo site, Burial 6.

Large Chipped Bifaces

A single large and thin chipped biface was found at the Lineburger site in Camp County, Texas. This biface, made from a dark grayish-brown Central Texas chert, is well knapped with small retouch/pressure flakes along both edges of the piece; there is no evidence of polish on either face. The biface has basal notches and a short expanding
stem (20.8 mm in stem width and 11.8 mm in stem length). The biface is 174.5 mm in length, 72.0 mm in width, and only 7.6 mm in thickness.

Conclusions

In the summer of 2009, we completed the detailed analysis and photo documentation of two large collections owned by Robert L. Turner, Jr. and Tommy Johns of Caddo ceramic vessels from more than 20 prehistoric to early historic cemeteries in Northeast and East Texas. A companion CD (Perttula et al. 2010) presents our analyses and photo documentation of the material culture remains (ceramic vessels, ceramic pipes, etc.), arrow points from the Johns site (41CP12) in the Tommy Johns collection, also completed in the summer of 2009.

It has been our purpose in completing the analysis of these Caddo ceramic vessel collections, and distributing this information on CDs, to make this important information on Caddo vessel assemblages a part of the public record, as we believe that there is substantial information to be gained on Caddo archeology as a result of this effort. If nothing else, the analysis records and photographs from these private collections are now available for future study by Caddo archeologists, interested members of the public, and the Caddo peoples themselves.

In this volume, we summarize our findings from the analysis of 463 ceramic vessels, 10 ceramic pipes, and one large chipped stone biface from Caddo sites in the Big Cypress Creek and Neches-Angelina River basins. The vast majority of the documented material culture remains we have summarized come from many Late Caddo period Titus phase cemeteries (most notably, the Tuck Carpenter site, see Turner [1978, 1992]) along tributaries of Big Cypress Creek, including several on Dry Creek, Greasy Creek, Prairie Creek, Tankersley Creek, and Ellison Creek (see Figure 6), although there are a few Middle Caddo period (ca. A.D. 1200-1400) vessels from three sites in the Dry and Greasy Creek valleys.

The Titus phase ceramic vessels (carinated bowls, compound bowls, bowls, bottles, and jars, with the rare occurrence of ollas and a single chalice from the Tuck Carpenter site) from mortuary contexts in these Big Cypress Creek basin sites are dominated by grog-tempered fine wares—particularly a number of varieties of Ripley Engraved, as well as Wilder Engraved, and Turner Engraved, a new ceramic type—often times with either a red or white pigment rubbed in the engraved lines. Bone and hematite were regularly added as temper to the vessel paste. Fine wares represent approximately 66% of the Titus phase vessel assemblages. Utility wares comprise another 27% of the Titus phase vessel sample, and 7% are plain wares (primarily small plain bowls and bottles). Among the Titus phase utility wares, we have documented a wide variety and combination of rim and body decoration methods and decorative elements, including punctated, incised, appliqued, brushed, and neck banded decorative methods; many of these vessels cannot be identified as belonging to a currently defined Northeast Texas ceramic type. Most of the utility ware jars in the Titus phase vessel sample are decorated on both the rim and body, but with different decorative elements and motifs on each part.
of the vessel. The definition herein of distinct rim and body code classes in the Titus phase utility ware jars provides a more comprehensive categorization of the decorative category of these wares, and represents a ceramic vessel classification effort that we look forward to building upon with other Titus phase ceramic vessel assemblages.

Most of the remainder of the documented collections discussed in this volume are from the Deshazo (41NA27) and Stephens Farm (41NA202) sites in Nacogdoches County, in the Angelina River basin in East Texas. These are Historic Caddo period Allen phase sites with small cemeteries. They include Patton Engraved, cf. Hume Engraved, Taylor Engraved, and Natchitoches Engraved fine wares, brushed, punctated, and pinched utility wares, and different plain ware forms.
