Ancestral Caddo Ceramic Vessels from the J. B. Sparkman Site (41HP26), Hopkins County, Texas

Timothy K. Perttula

INTRODUCTION AND CONTEXT OF THE VESSELS

Two ancestral Caddo vessels were excavated by a J. B. Sparkman from a burial that had been exposed by erosion. The burial was found on the site in the Caney Creek valley in the upper Sabine River basin near the community of Black Oak in southeastern Hopkins County, Texas (Figure 1). The University of Texas purchased the two vessels from Mr. Sparkman in May 1931.

SUMMARY AND CONCLUSIONS

J. B. Sparkman excavated a Caddo burial with two ceramic vessel funerary offerings from a site in the Caney Creek valley in the upper Sabine River basin in East Texas. These vessels—a Taylor Engraved bottle with an interlocking scroll and a Simms Engraved carinated bowl with a series of three short vertical engraved lines and a notched lip. The burial likely dates to the latter part of the Titus phase, ca. A.D. 1550-1680, as these ceramic decorative styles are present in sites in this area only during that temporal interval (see Perttula et al. 1993).
