INTRODUCTION AND SITE SETTING

The W. L. Willeford site (41UR5) is a Late Caddo period Titus phase cemetery of unknown size. It is in the Little Walnut Creek basin, and Little Walnut Creek is a southward-flowing tributary to Little Cypress Creek in the East Texas Pineywoods (Figure 1).
Some time prior to 1930, Caddo vessels had been exposed by erosion at the site, and other vessels were plowed up in 1930. University of Texas (UT) archaeologists led by B. B. Gardner excavated at the site in July 1931, but found no burials. The UT archaeologists purchased Caddo vessels from the landowner, along with three elbow pipes, two celts, and two arrow points. Those vessels (n=15) are documented in the remainder of this article.

During the UT excavations at the W. L. Willeford Farm site, a sizeable assemblage of plain (n=110) and decorated (n=108) ceramic sherds were recovered from apparent habitation contexts near to the locations where the burial vessels had been reported. The decorated sherds are from Ripley Engraved and Wilder Engraved vessels (n=32), red-slipped fine wares (n=6) and various utility wares. These are from brushed (n=28) and brushed-punctated (n=3) Bullard Brushed vessels, La Rue Neck Banded jars (n=5), as well as sherds from Cass Appliqued (n=3), Belcher Ridged (n=1), Killough Pinched (n=1), Maydelle Incised (n=23), punctated (n=5), and incised-punctated (n=1) vessels. The occurrence of both Cass Appliqued and Belcher Ridged vessel sherds in the assemblage suggests that the site was occupied sometime after ca. A.D. 1500/1550.

DECORATION (INCLUDING MOTIF AND ELEMENTS WHEN APPARENT): The rim has horizontal brushing marks as well as two rows of tool punctations. The top row is below the lip and has been pushed through the brushing (Figure 5). The bottom row is at the top of the vessel body, immediately below the rim-body juncture. The vessel body has six widely-spaced vertical appliqued fillets that extend to within 13 mm of the base. They divide the vessel body into six plain panels.

ESTIMATED VOLUME (IN LITERS): 0.4

DECORATION (INCLUDING MOTIF AND ELEMENTS WHEN APPARENT): The rim of the vessel has three horizontal engraved lines, two of which have a series of open pendant triangles (Figure 8). At the top of the vessel body are two more horizontal engraved lines, the bottom line with open engraved pendant triangles, as well as upper and lower hooked arm vertical scrolls repeated four times around the body; the scrolls extend to just above the vessel base. There are hatched zones on the scrolls opposite the hooked arms (Figure 8). The scrolls begin at the apex of large pendant triangles with hatched corners; the upper set of large pendant triangles have either a small central excised circle (n=3) or a diagonal line (n=1), while the lower set of large pendant triangles have no inner central elements.

ESTIMATED VOLUME (IN LITERS): 0.7

DECORATION (INCLUDING MO-TIF AND ELEMENTS WHEN AP-PARENT): The carinated bowl section of the conjoined vessel has a series of four alternating half circles and ovals that are divided by vertical excised bars and triangles. The half circles and ovals have either a central vertical line or a triangle element (Figure 9b). The rim also has two 3.6 mm diameter suspension holes above the excised triangles.

The rim of the conjoined jar has a single horizontal engraved line. The jar body has four meandering vertical scroll. The upper and lower arms of the scroll begin at the apex of upper and lower pendant triangles (see Figure 9b). The pendant triangles have excised corners.

SUMMARY AND CONCLUSIONS

The W. L. Willeford Farm site (41UR5) in the Little Cypress Creek basin in East Texas is a Late Caddo period Titus phase settlement with a small cemetery. Vessels from the cemetery were obtained by the landowner around 1930, and University of Texas (UT) archaeologists purchased the collection in 1931. Excavations by UT recovered habitation debris (primarily plain and decorated ceramic sherds) and did not identify any ancestral Caddo burial features.

The 15 ceramic vessels from the site are all tempered with grog, which is consistent with other Caddo vessel assemblages in the Big and Little Cypress Creek basins. The vessel forms represented in the assemblage include bottles (n=2), carinated bowls (n=5), compound bowl (n=1), bowl (n=1), jars (n=5), and a unique conjoined carinated bowl-jar. Fine ware types identified in the vessels are Bailey Engraved, Ripley Engraved (var. McKinney and var. McKinney-Enis Smith), and Wilder Engraved (var. Wilder and var. unspecified). Identified utility ware types at the W. L. Willeford site are Harleton Appliqued and Maydelle Incised. The common occurrence of Ripley Engraved, var. McKinney and var. McKinney-Enis Smith suggests that the burial features at the site likely date to the latter part of the Titus phase, after ca. A.D. 1550.
