This Presentation is brought to you for free and open access by the School of Human Sciences at SFA ScholarWorks. It has been accepted for inclusion in Student Publications by an authorized administrator of SFA ScholarWorks. For more information, please contact cdsscholarworks@sfasu.edu.

Philosophy Statement

Throughout my life I have obtained a wide variety of knowledge and skills from hands on constructing and carpentry to computer work such as Auto-cad and Revit. My true passion is working with my hands building and designing things to create works of art others can enjoy. With my interior design degree I look to combine my skills for a life of excitement and enjoyment through any design process. I love learning new things and ways to better my skills for the world ahead of me. This project is a representation of my favorite phase in the design process, because there must be a building before one can make it beautiful on the inside. Wherever my future takes me I am grateful for the education I have gained in all aspects of the design process.

- Bret Butler
