Social media represent a possibility for the SFA Alumni Association to grow their audience engagement, memberships, and donations in a cost effective way. This opportunity comes with challenges and therefore needs to be framed and guided by effective policy to ensure best use and maximum effectiveness.

The group has provided the research and best practices on each social media network for the SFA Alumni Association to review and provide the new parameters for a social media posting policy. The successful competitors’ social media pages have been examined and descriptions of their use and their policies have been used as benchmarks. A variety of many examples of personal, professional, and fun social media posts were provided so that testing, analyzing, reviewing, and revising for effectiveness may be done in the future.
